EM Portfolio Morning Brief — Wednesday, 4 November 2026

Coverage: full watchlist sweep; past 24 hours (3–4 Nov) plus gaps left by the 3 Nov brief. **Data caveat:** the search index is thin for 3–4 Nov and several hosts (koreatimes, sedaily, sec.gov, lse.co.uk, ewn.co.za, agenciabrasil) could not be opened. Almost everything below is search-snippet level, not checked against filings. "QUIET" means *searched, nothing indexed*, not *verified nothing happened*. Conflicts are flagged inline. Most Asian 4 Nov closes are in; Brazil, US and Gulf 4 Nov closes are not.

1. Top of the stack

1. **Brazil: Ibovespa fell a sixth straight session on 3 Nov, -1.42% to 165,528.92, and USD/BRL closed R$5.487 (+0.79%), a third consecutive BRL loss.** Cautious ahead of Copom, with foreign outflows and fiscal/economic-team worries, including fear of an interest-rate cap (BPMoney, NC News, Revista Oeste, headline only). That is about -1.4% and BRL ~0.9% weaker than the 30 Oct levels (167,921 / R$5.44). **The Copom decision is due this evening (~18:30 BRT, after the close);** the Selic is 13.75% per Rankia, though other pages give 14% or 14.25% — verify on the BCB site. The Money Times live blog expects a hold at 13.75%; SpaceMoney says the market is split between hold and cut (Money Times, Rankia). The last retrievable Focus (13 Oct) had a November cut, so the path has probably shifted (Rankia). Exposure: BLTN, EMGA, BBAS3 (Q3 on 11 Nov, secondary), B3SA3, XP, MOVI3, LREN3, CYRE3, CVCB3.
2. **Indonesia: MSCI's 11 Nov review remains the biggest binary in the book (BBRI, BRPT, INDF, MEDC, BUKA, HIDR).** Announcement 11 Nov, effective 1 Dec; MSCI said it will consider "a range of options" for Indonesia absent progress (Newsquawk). The August review kept the FIF/NOS freeze and cut GOTO and CPIN from the Global Standard indexes (Stockbit); CGS International (2 Oct) expects the freeze to continue (RCTI+). Bank Indonesia held at 5.75% on 21 Oct against hike expectations, raising the deposit-facility rate and cutting reserve requirements (Bisnis). IHSG last found: 5,282.31 on 28 Oct, down from 7,000+ in March (Bisnis).
3. **Korea: KOSPI rebounded +0.62% to 5,683.80 on 4 Nov after -3.59% on 3 Nov,** on a ~400-point intraday swing; foreigners sold about KRW2.5tn net while retail and institutions bought (AJU Press, summary only; BiGGo). USD/KRW ~1,341.5 (direction conflicts across sources). The 3 Nov selloff followed renewed AI-spending fears (SEDaily). Read-through to SK Inc, Samsung C&T and Samsung Life (Samsung Electronics stake). Bank of Korea next meets **26 Nov** with a hike expected after the 22 Oct hold at 3.00% (QNA).
4. **Albemarle and Pan American Silver report Q3 after the close today.** ALB: Q2 warned of a sequential Q3 decline in Energy Storage sales, EBITDA and margin, and held a $20/kg lithium scenario (Eastern Progress); one aggregator shows consensus EPS $2.53 / revenue $1.52bn (single source, fn2.ai); call 5 Nov 8:00 ET. PAAS call 5 Nov 10:00 ET; gold output guided Q4-weighted (per 3 Nov brief).
5. **Ping An (2318): the 9M number is confirmed and ugly.** Net profit attributable RMB96.645bn, **-27.3%** (9M25 RMB132.856bn), on investment income collapsing to RMB49.5bn from RMB157.7bn; operating profit +8.3% to RMB125.9bn; revenue -12.6% (EconoTimes, Macau Business, FinanzWire). This closes the 3 Nov open item; the H1 +36% comparison remains unreconciled (implies a sharp Q3 reversal or a different basis).

2. What matters, by region/theme

EM macro thread (dollar/EM FX, China policy, commodities)

- **Dollar / rates / Fed:** DXY, US 10y, midterm results and Fed December odds for 3–4 Nov were **not found** (searches returned only 2018/2022 coverage). Carried: Fed held 3.75–4.00% on 28 Oct with two hawkish dissents; possible December hike chatter (Yahoo). A 27 Oct backdrop piece cites elevated oil and rate uncertainty (ROIC). October jobs report Fri 6 Nov (date carried, not re-verified).
- **EM FX:** BRL R$5.487 (weakest of the run). KRW ~1,341.5. IDR ~17,985 on 20 Oct (nothing newer, Kontan). MXN: no level found; Banxico on hold at 6.50% since June (Zeta). INR, CNH: nothing current. BSP reportedly raised 50bp on 22 Oct (ambiguous snippet, Inquirer).
- **China policy:** no verified 3–4 Nov Hang Seng/HSTECH closes. The 3 Nov brief's "capital-market support talk" is still unverified; the only related item is a PBOC CNY500bn funding initiative dated 17 Oct (date reliability uncertain, TBN). RatingDog October PMI: a Trading Economics line shows services 51.6 (prior 51.5), composite 52.4 — which column is the actual is unclear, treat as provisional (TE).
- **Commodities:** no verified 3–4 Nov prints for copper, gold, silver, Brent/WTI or lithium. Last verified: gold ~$3,945, silver ~$50.5–51.7 (2 Nov, Yahoo); Brent ~$107–110 (undated pieces, Caspian Post). Discard an index.vn "11-6-2026" gold-down-3% article (mis-dated). OPEC+ meets 29 Nov (carried).

Korea

- **KOSPI/BoK:** see Top. Samsung Electronics Q3 OP KRW107.44tn (+783% y/y) was slightly below expectations and KOSPI fell ~3% on 29 Oct (Korea Times). Context: KOSPI was 6,807 on 13 Jul (Asiae), so the index is ~17% lower — worth confirming the drawdown.
- **LG Chem pref (051915) — MATTERS pre-print.** Q3 actuals still not found; a StockHub forecast has 3Q26 OP ~KRW613.6bn (StockHub); ignore an undated "KRW860bn" JoongAng item (probably 2025). LG Energy Solution prelim OP quoted at KRW756bn and KRW731.2bn in different sources.
- **Samsung C&T (028260):** Q3 reported 28 Oct; holds 5.05% of Samsung Electronics, 19.34% of Samsung Life, 43.1% of Samsung Biologics (search item, not opened). **Samsung Life (032830):** Q3 date unconfirmed, ~12–14 Nov inferred (last year 13 Nov, Asiae). **SK Inc (034730):** QUIET; treasury stake ~24.8%; SK hynix KRW40tn buyback to 19 Nov (secondary). **LS Corp (006260):** aggregator lists Q3 ~18 Nov, low confidence (companiesmarketcap).
- **Amorepacific Holdings (002790), F&F (383220), Hyosung (004800), Iljin Holdings (015860), LG Corp (003550), SK Discovery (006120), Young Poong (000670):** QUIET (no Q3 dates found; Korean Q3 filings due by 14 Nov — check DART). **LG Electronics pref (066575):** NOISE, 7 Oct prelim miss already priced.

Greater China / HK / Taiwan / Japan

- **Ping An (2318):** see Top.
- **BYD (1211 HK) — October sales still not found** (English and Chinese searches). Sept 463,561; Oct 2025 base 441,706; YTD cumulative conflicts (3,078,490 vs 3,131,576) (CnEVPost, MarkLines). Check the HKEX filing directly — now overdue by two sessions.
- **TSMC (2330 TT):** QUIET; October sales expected ~10 Nov. Sept NT$511.86bn (+54.6%), Jan–Sep NT$3,898.73bn (+41.1%), Q4 guide US$52.3–54.3bn (TSMC, SEC). Exposed to the AI-spending wobble.
- **Suzuki (7269 JP):** H1 date still unconfirmed, likely 5–6 Nov (last year 6 Nov, RTT); Q1 FY26 OP ¥158.0bn (+11.2%) (Suzuki).

- **JD.com (9618 HK):** Q3 ~12–13 Nov inferred. **HUYA:** Q3 17 Nov. **QUIET:** 361 Degrees, Bank of East Asia, China BlueChemical, China Dongxiang, Universal Entertainment, Daqo, DiDi, Dingdong, Hello Group, KWEB (tracks HSTECH; last found HSI 22,958 / HSTECH -2.8% on ~29 Oct, ambiguous date, The Standard).

Brazil / LatAm

- **Macro:** see Top. Itaú Q3 (3 Nov after close) results not indexed (Q2 recurring profit R$12.4bn, ROE 24.3%, Itaú). 3 Nov Focus not retrieved. Post-election economic team: no appointment found. Next Copom 8–9 Dec. Discard a snippet showing Ibovespa 185,674 / R$5.25 "terça (3)" (no month, conflicts).
- **BLTN / EMGA — MATTERS:** BRL and DI rates moved against holders again on 3 Nov; no NAV found. BLTN most directly exposed to Copom and economic-team news.
- **BBAS3:** Q3 on 11 Nov (secondary, Investing.com); the 26 Oct "-29%" is still not confirmed by a primary source. **LREN3** (Q3 5 Nov unverified, Q2 guidance cut on World Cup, Nord) and **MOVI3** MATTERS (rate-sensitive). **B3SA3, XP, CYRE3 (12 Nov unverified), CVCB3 (6 Nov unverified), AGRO3:** QUIET, driven by rates/BRL.
- **PRIO3:** QUIET; record Q3 production 191.6 kboe/d per prior brief; weak BRL tailwind, softer oil headwind. **Gran Tierra (GTE):** Q3 after close 5 Nov, call 6 Nov (not re-verified). **Hepsiburada (HEPS):** Q3 date unannounced; ~5–6 Nov likely from last year's pattern (Tiger). **AMX:** QUIET. **Bunge (BG):** NOISE; BMO PT $135 from $130 on 3 Nov, ex-dividend $0.72 on 17 Nov (MarketScreener); COO promotion headline unconfirmed.

Middle East / Africa

- **MTN (MTN SJ) / IHS — completion still unverified.** New: SA Competition Tribunal nod reported 30 Sep (TimesLive); EWN 7 Oct "a step closer to concluding" (EWN, not opened); Nigeria FCCPC conditional approval 24 Aug (corrects the "~29 Aug" in the watchlist, Nairametrics). MTN guides to an H2 close with remaining conditions "principally regulatory". Ignore the Guardian "MTN completes" headline (Guardian) — unreliable. Check JSE SENS and IHS 6-Ks.
- **TBC Bank (TBCG LN):** Q3/9M on **6 Nov**, confirmed by 7 Oct RNS (RNS copy). Baselines: Q2 net profit GEL386m (+12%), GEL1.75 dividend (Kalkine); Q3 2025 GEL368m (ticker.app). Ignore the UzDaily "loss" headline (Uzbek subsidiary, soums).
- **Gulf and South Africa:** TASI/ADX/DFM November closes not found (last TASI 10,908 on 17 Aug, Peninsula). **QUIET:** Alpha Dhabi, Aramex (~12–13 Nov inferred), Emaar, First Abu Dhabi Bank, Saudi National Bank, Yamama Cement, Absa.

Southeast Asia / India

- **Indonesia:** see Top. **QUIET apart from MSCI exposure:** BBRI, BRPT, INDF, MEDC, BUKA, HIDR.
- **Philippines:** PSEi 5,779.73 around 22 Oct (ambiguous). Ayala Land, GT Capital QUIET. **Malaysia:** Genting QUIET. **India:** no Sensex/Nifty close for 3 Nov indexed (latest 27 Aug, stale). Reliance, Bank of India QUIET.
- **Vietnam funds — VOF NAV reconciled in part.** 24 Jun NAV $929m ($7.66/sh) is the likely source of the "$927.4M" cited on 2 Nov; the 2 Oct RNS shows **$815m, $6.89/sh, £5.22** (LSE, not re-opened). Share price 415p on 15 Oct (StockAnalysis), implying a ~20% discount (my arithmetic, assuming 2 Oct NAV current). October monthly NAV due ~10 Nov. **VEIL:** QUIET.
- **ReNew (RNW):** Court Meeting, General Meeting and rollover-election dates **still not retrieved** (scheme document of 28 Oct unreadable here). Background: May 2026 announcement targets effectiveness in Q1 2027

(SC 13E3 ex.); $7.02 terms per StockTitan.

Metals & mining / US-listed

- **Ivanhoe (IVN):** Q3 financials (due 3 Nov) not indexed; Q3 Kamoa-Kakula copper 76,401t (prior brief). **Ero (ERO):** record Q3 of 2 Nov stands. **Teck:** SAMR decision undated; last substantive item 2 Oct (BNN/Reuters); Anglo expected final approval around year-end (Engineering News).

3. Probably noise

- **BG BMO target raise / COO headline** — minor, one source.
- **LG Electronics pref Q3 miss** — priced since 7 Oct.
- **Guardian "MTN completes IHS"** — contradicted by MTN's own H2 guidance.
- **UzDaily TBC "loss"** — Uzbek subsidiary in soums.
- **sb24horas Ibovespa 185,674 / R$5.25 snippet; index.vn "11-6-2026" gold-down item** — mis-dated.
- **Undated Benzinga Dow 52,495 / S&P 7,712 print** — cannot be placed in time.
- **LG Chem "KRW860bn" JoongAng item** — likely a 2025 article.

4. Time-sensitive / positions watch

Mechanics / decisions

- **US T-bill (US912797SA68):** CUSIP 912797SA6 matured **1 Oct 2026**. More corroboration today: a TradingView listing of a zero-coupon bill maturing 1 Oct 2026 (TradingView), Gabelli's 30 Sep fund holdings (Gabelli), and SEI holdings listing "TREASURY BILL 10/01/2026" (SEI). TreasuryDirect itself still unconfirmed. **Decision: remove from the book or roll the proceeds.** Row kept in `watchlist-em.md` with the note updated.
- **RNW:** retrieve the Court Meeting / General Meeting / rollover-election deadline from the 28 Oct scheme document (investor.renew.com 6-K or SC 13E3/A on EDGAR); decide rollover vs cash.
- **MTN/IHS:** completion unannounced; closing plausible within two weeks. Check JSE SENS / IHS 6-K.
- **Brazil tonight:** Copom decision after the close; BLTN/EMGA/BBAS3/MOVI3/LREN3 are the rate-sensitive book. Economic-team announcement could matter more than Copom for BRL.
- **Indonesia 11 Nov:** MSCI outcome could force index-related selling; HIDR (ETF) directly exposed.
- **Teck/Anglo:** SAMR decision undated.
- **VOF/VEIL:** pull October NAVs (~10 Nov); VOF discount ~20% on the 2 Oct NAV.

Dated calendar (next ~2 weeks; secondary-sourced unless noted)

5. Follow-up questions to investigate

1. **Copom/BRL:** what was the 4 Nov decision and vote split, and what is the revised Focus path? Does the economic-team/rate-cap risk justify cutting BLTN/EMGA duration or hedging BRL?
2. **BBAS3:** primary-source confirmation of the late-October ~29% drawdown ahead of the 11 Nov print.
3. **Ping An (2318):** reconcile H1 +36% with 9M -27.3% (implied Q3 loss?) and quantify the investment-income swing.
4. **BYD (1211):** October sales from the HKEX filing; domestic vs export mix.
5. **RNW:** scheme-document dates and the rollover election terms.
6. **MTN/IHS:** what conditions remain after the Tribunal nod, and the expected closing date?
7. **MSCI Indonesia:** what are the plausible 11 Nov outcomes and index-weight impact on BBRI, BRPT, INDF, MEDC, BUKA, HIDR?
8. **LG Chem pref:** Q3 actuals and the petrochemicals loss run-rate.
9. **ALB/PAAS:** Q3 prints vs Q2 guidance (storage decline; Q4-weighted gold output).
10. **Macro prints:** DXY, UST 10y, midterm result, Fed December odds, copper/Brent settles — all missing in this run; source from Bloomberg/Reuters terminals.
11. **VOF:** is the ~20% discount real on the October NAV, and what is behind the ~12% NAV fall since June?
12. **Korea:** confirm KOSPI's drawdown from July highs and the foreign-flow trend before the 26 Nov BoK meeting.
