EM Portfolio Morning Brief — Tuesday, 3 November 2026

Coverage: full watchlist sweep; past 24 hours (2–3 Nov) plus gaps left by the 2 Nov brief. **Data caveat:** several hosts (sec.gov, kitco, spacemoney, gameoverdrive, ad-hoc-news) were blocked in the research environment, and 3 Nov market closes outside Korea were mostly not yet indexed. Most items are search-snippet level, not checked against filings. "QUIET" below means *searched, nothing indexed*, not *verified nothing happened*. Conflicts are flagged inline.

1. Top of the stack

1. **Korea: KOSPI gave back the 2 Nov bounce, -3.59% to 5,648.79 on 3 Nov.** Foreigners net sold KRW1.52tn and institutions KRW511bn on renewed AI-spending fears hitting Samsung Electronics and SK hynix (SEDaily, JoongAng). This follows +2.24% to 5,859.08 on 2 Nov (Korea Times). USD/KRW ~1,341 vs 1,343.8 (direction wording conflicts in the source). Book read-through: SK Inc (via SK hynix/SK Square), Samsung C&T and Samsung Life (Samsung Electronics stake — inference), plus TSMC/HK tech sentiment. Bank of Korea held 3.00% on 22 Oct with a November hike expected (Kyunghyang); the November meeting date (26 Nov?) is unverified.
2. **Brazil: Copom decision Wed 4 Nov is the live event; B3 reopens today after the Finados closure.** B3 was closed 2 Nov (verified, Bora Investir/B3). Last confirmed levels are 30 Oct: Ibovespa 167,921 (-18.12% on the week), USD/BRL ~R$5.44 (Paranashop). **3 Nov closes not yet indexed.** Selic is 13.75%; the last retrievable Focus (13 Oct) had a 25bp cut in November (Rankia), which conflicts with the ~63% hold / ~28% cut options-implied odds cited on 2 Nov — **no base case can be stated**. 3 Nov also brings the first post-election Focus, Itaú Q3 after the close, and the US midterms. **BBAS3 -29% on 26 Oct** is now partly corroborated (two blogs: close R$17.47 vs R$24.72, intraday circuit breaker, gameoverdrive) but no primary confirmation; Q3 on 11 Nov (BTG expects ~R$1.9bn vs R$3.9bn in Q2).
3. **Ero Copper: record Q3, 2 Nov.** Operating cash flow $191.2m (+39% QoQ), adjusted EBITDA $200.6m, net income $116.2m ($1.10/share), net debt down ~$100m to $353.5m (0.5x), copper 18,345t (+6% QoQ), record 17,414oz gold from stockpiles; FY copper guidance 67.5–77.5kt unchanged (Ero 6-K, via search, not fetched). Call 3 Nov 10:30 ET. Positive read-through for the copper complex even as gold/silver rebound from a one-year low.
4. **Two earnings events 4 Nov after the close: Albemarle and Pan American Silver.** ALB Q3 after the NYSE close Wed 4 Nov, call 8:00 ET Thu 5 Nov (ALB release) — this corrects the 2 Nov brief's call timing. PAAS Q3 after close 4 Nov, call 10:00 ET 5 Nov (6-K); gold output guided to be Q4-weighted. Silver rebounded 3–4% on 2 Nov to ~$50.5–51.7 after breaking below $50 on Friday (revises the 2 Nov brief's ~$48.9; figures vary by timestamp, USAGold); gold bounced ~1.7–1.9% to ~$3,945 from a one-year low (CNBC, Kitco).
5. **Indonesia: MSCI review on 11 Nov is the biggest binary in the book (BBRI, BRPT, INDF, MEDC, BUKA, HIDR).** MSCI has said that absent sufficient progress by the November review it will consider "a range of options" for the treatment of Indonesia; the FIF/NOS freeze continues (Newsquawk, Investortrust). IDX's rule excluding high-shareholding-concentration stocks from IHSG is in force from 2 Nov (Kabar Bursa). Effective date 1 Dec.

2. What matters, by region/theme

EM macro thread (dollar/EM FX, China policy, commodities)

- **Dollar / rates / Fed:** Fed held 3.75–4.00% on 28 Oct with two hawkish dissents (per 2 Nov brief); Kitco's 2 Nov headline says "Fed tightening bets persist" and Yahoo flags a possible December hike after a GDP beat (Yahoo). DXY, 10y and NFP consensus for 2–3 Nov **not found**. US midterms today; October jobs report Fri 6 Nov (date carried from prior brief). Nasdaq started November with a ~1% loss on 30 Oct and US futures were mixed on 2 Nov (CNBC, headline only).
- **EM FX:** BRL is the epicenter (~R$5.44, worst week since 2008). KRW ~1,341. IDR ~18,127 on 26 Oct (nothing newer). INR, MXN, CNH: nothing current indexed (latest USD/CNY fix found was June — unusable).
- **China policy:** Hang Seng closed **23,393.32 (+0.42%) on Mon 2 Nov**, HSTECH +2.25% led by Xiaomi, CATL, Alibaba and Tencent, on talk of possible capital-market support (ad-hoc-news snippet, BigGo). **Correction:** the 2 Nov brief attributed ~23,393/HSTECH +2.25% to 30 Oct; those figures appear to be the 2 Nov print (the 30 Oct close is unresolved; one other source shows 23,294.42). No specific policy announcement verified. NBS October PMI 49.3 (from 2 Nov brief) stands; the RatingDog October PMI is not indexed.
- **Commodities:** Gold ~$3,945, silver ~$50.5–51.7 (above). Copper: no reliable 2 Nov level (a ticker showed ~+2.2%, unverified); reference points are COMEX record ~$6.88/lb and LME $14,437/t. **Oil:** the 2 Nov brief's Brent ~$110 is unconfirmed — gold headlines say oil softened on 2 Nov, and an undated wrap shows Brent $108.78 / WTI $97.82 (Newsquawk). Treat as ~$109–110. OPEC+ next meets 29 Nov. Lithium: no November price found.

Korea

- **Amorepacific Holdings (002790) — correction.** The 2 Nov brief's "Q3 ~4 Nov" looks stale: operating company Amorepacific Corp (090430) reported Q3 on 29 Oct — sales +11.1% to ~KRW1.13tn, OP +25.4% to ~KRW115.2bn, net profit -14.3% to KRW58.5bn on non-operating costs (Korea Times, AP Group). Holdings' own date unverified.
- **LG Chem pref (051915) — MATTERS pre-print.** Q3 actuals not found. Q2 OP was KRW600bn on KRW14.18tn sales (Quartr); a 22 Oct Korean report expects petrochemicals to swing to a ~KRW300bn H2 loss (Daum); LG Energy Solution prelim Q3 OP KRW756bn but only KRW339bn ex-US subsidies (Asiae).
- **F&F (383220):** DB Securities cut target 10% to KRW90,000, Buy (StockHub, snippet). **LG Electronics pref (066575):** NOISE — 7 Oct prelim Q3 OP KRW781.8bn, ~24% below consensus (RTT). **SK Inc (034730):** earlier Align Partners stake/value-up items stand; SK hynix KRW40tn buyback runs to 19 Nov (secondary, Akostec). **Samsung Life (032830):** H1 NP KRW1.89tn (+35.8%; one source says 1.97tn, Edaily); Q3 typically mid-Nov.
- **QUIET (searched, nothing indexed):** Hyosung (004800), Iljin Holdings (015860), LG Corp (003550), LS Corp (006260; an aggregator lists next earnings 18 Nov, companiesmarketcap), SK Discovery (006120), Samsung C&T (028260; Q3 reported 28 Oct), Young Poong (000670). Korean Q3 filings are due by 14 Nov — check DART.

Greater China / HK / Taiwan / Japan

- **BYD (1211 HK) — October sales still not found** after English and Chinese searches. Reference: Sept 463,561 (domestic -12.97% y/y, CnEVPost); YTD through Sept 3,131,576 vs 3,260,146 (-3.94%, MarkLines); Oct 2025 base 441,706. Check the HKEX filing directly; overdue.
- **TSMC (2330 TT):** QUIET; Sept revenue NT$511.86bn (+54.6% y/y), 2026 USD growth guided ~44%, Q4 US$52.3–54.3bn (TSMC, NeoTeo). October sales ~10 Nov (unconfirmed); exposed to the AI-spending wobble.

- **Suzuki (7269 JP):** H1 results date unconfirmed — the 2 Nov brief's "4 Nov" is unsupported; likely window ~4–6 Nov (last year 6 Nov, Suzuki IR). FY guidance reportedly profit down on ¥6.8tn sales (FilingReader, ambiguous). High oil is a cost headwind (inference).
- **JD.com (9618 HK):** no Q3 date notice; ~12–13 Nov plausible (last year 13 Nov, iTiger). **QUIET, no dedicated news found:** 361 Degrees, Bank of East Asia, China BlueChemical, China Dongxiang, Ping An (9M NP -27.3% vs H1 +36% reconciliation still open), Universal Entertainment, Daqo, DiDi, Dingdong, Hello Group, HUYA (Q3 17 Nov), KWEB (tracks HSTECH, +2.25% on 2 Nov — inference).

Brazil / LatAm

- **PRIO3:** record Q3 production 191.6 kboe/d, 17.2m bbl sold (PRIO); Q3 release date unconfirmed. Beneficiary of high oil and weak BRL.
- **Gran Tierra (GTE):** Q3 after close Thu 5 Nov, call Fri 6 Nov 10:00 ET (single source, Finviz) — resolves the prior unverified flag.
- **América Móvil (AMX):** NOISE — Q3 (20–21 Oct) revenue MXN250.6bn (+7.6%), EBITDA MXN102.2bn (+8.9%), net MXN24.3bn (+7%) (Quartr). **Hepsiburada (HEPS):** Q3 date unconfirmed (5 Nov inferred from last year); Q2 net loss TRY1.89bn, EBITDA -75.5% (Oxford Eagle).
- **Bunge (BG):** QUIET/NOISE; BMO PT raise to $135 reported 3 Nov (unconfirmed), ex-dividend $0.72 on 17 Nov (Equibles).
- **BLTN / EMGA:** BRL drawdown unquantified (no NAV found) — MATTERS. **LREN3** (Q3 5 Nov) and **MOVI3** (carry-over from -18% on 28 Oct) MATTERS; **B3SA3, XP, CYRE3 (12 Nov), CVCB3 (6 Nov), AGRO3** QUIET, driven by the rate/BRL shock. Dates carried from secondary calendars. **Banxico/MXN:** nothing for November found. Post-election economic team: unverified (only Durigan's March appointment at Fazenda found, Band).

Middle East / Africa

- **MTN / IHS — completion still unverified.** Nothing newer than IHS holder approval (4–5 Aug, Nairametrics), the 7 Aug Latam tower sale (SENS) and Nigeria's conditional approval. Effective date is three business days after conditions precedent; IHS must hold ≥$355m cash at closing; company guided to 2026 completion (IHS). The Guardian "MTN completes" headline remains misleading (Guardian).
- **Saudi/UAE:** latest TASI/DFM/ADX snapshot is 27 Oct (TASI 9,986; DFM 5,864; ADX 9,746, unofficial, Cbonds). **QUIET:** Absa, Alpha Dhabi, Aramex (~12–13 Nov inferred), Emaar, FAB, SNB (Q3 NP SAR6.45bn, per prior brief), Yamama (Q3 NP SAR74.7M, +108%, per prior brief). **TBC Bank** Q3 6 Nov (carried, not re-verified).

India / Southeast Asia / Vietnam

- **ReNew (RNW) — live merger-arb, dates still not retrieved** (sec.gov blocked). $7.02 cash scheme; scheme document dated 28 Oct (SC 13E3/A). A secondary summary gives the rollover election deadline as the later of 80 days after circular publication and 10 business days before the sanction hearing (StockTitan); if the circular went out 28 Oct that is ~16 Jan 2027 (my arithmetic, unconfirmed), implying meetings are probably **later than mid-Nov**. Effectiveness expected Q1 2027.
- **VOF / VEIL — data stale, one conflict.** VOF 2 Oct RNS: NAV $815M, $6.89/share, £5.22/share (LSE); 30 Jun discount -20.6% (VOF). The 2 Nov brief cited June NAV $927.4M — bases/dates may differ; verify. VEIL: no October NAV or discount (Kalkine).

- **Indonesia:** IHSG 5,282.31 on 28 Oct (Bisnis); nothing for 29 Oct–2 Nov. BBRI latest results found are H1 NP Rp30.9tn (+17.5%, Bisnis covers Q1); Q3 not indexed. **QUIET:** BRPT, INDF, MEDC, BUKA, HIDR, Bank of India, Reliance (Q2 beat per prior brief), Genting, Ayala Land (~10 Nov inferred), GT Capital. PSEi 2 Nov likely closed (All Souls', unverified).

Metals & mining / US-listed

- **Ivanhoe (IVN):** Q3 financials due 3 Nov, not yet indexed. Kamoa-Kakula Q3 76,401t Cu; 290–310kt guidance held but trending low, implying ~77.9kt in Q4 (Deep Dive).
- **Teck:** unchanged. China SAMR wants copper-concentrate supply commitments; remedies don't currently include asset sales; other jurisdictions cleared; both sides expect close by March 2027 (BNN/Reuters). Decision could land any time.
- **First Quantum:** already reported Q3 on 28 Oct (closes the prior "date not found"): Cu 108,959t (+8% QoQ), guidance narrowed to 405–435kt from 405–475kt; net earnings $167m vs $207m in two renderings (Ariva, Vermögenszentrum). Mildly negative.
- **Equinox (EQX):** Q3 production 237,019oz incl. Orla (combination closed 31 Jul, Finviz); financials date unconfirmed (9 Nov unverified). **Goldgroup (GORO):** 28 Sep binding $75m investment in Luca Mining for the Cozamin mine (search summary, no URL). **Capstone (CS):** no 2026 Pinto Valley restart item exists — the "restart 2 Nov" claim is unsupported. **Vizsla (VZLA):** no new news; Panuco employee deaths in January and Macquarie-led $220m financing mandate (April, Pulse); current status unverified.
- **QUIET:** Allied Gold (no Q3 date; Q2 production 97,429oz, 6-K), Kootenay Silver, Freeport (27 Oct beat not re-verified).

3. Probably noise

- **AMX Q3** — a fortnight old, in line; no price reaction found.
- **LG Electronics pref Q3 miss** — already priced since the 7 Oct prelim.
- **Samsung C&T Q3 (28 Oct)** — stale.
- **BYD "October sales" chatter and the HK 30 Oct/2 Nov index mix-up** — a dating error, not a market event.
- **BBAS3 "-29%"** — plausible but blog-sourced; don't act without a primary print.
- **Single-source Polymarket December-hike odds** — sentiment, not a forecast.
- **Brazilian R$5.08 spot snippet** — a mis-dated August page.

4. Time-sensitive / positions watch

Mechanics / decisions

- **US T-bill (US912797SA68):** CUSIP 912797SA6 matured **1 Oct 2026** — confirmed by a CME/Econoday auction listing (not citable) and fund holdings (Gabelli, SEI); TreasuryDirect not reachable. **Decision: remove from the book or roll the proceeds.** Row left in `watchlist-em.md` with the note upgraded.
- **RNW:** locate the Court Meeting, General Meeting and rollover-election dates in the 28 Oct scheme document; decide on rollover vs cash.
- **MTN/IHS:** completion unverified — check MTN SENS and IHS 6-Ks.
- **Teck/Anglo:** SAMR decision undated.

- **Indonesia:** MSCI 11 Nov outcome could force index-related selling; HIDR (ETF) is directly exposed.
- **Brazil:** BRL/DI exposure into Copom (BLTN, BBAS3, B3SA3, XP, MOVI3, LREN3, CYRE3).
- **VEIL/VOF:** pull the latest RNS; reconcile VOF NAV $927.4M vs $815M.

5. Follow-up questions to investigate

1. **Copom 4 Nov:** hold or cut, given the post-election DI curve and the 2 Nov Focus? Actual 3 Nov Ibovespa/USD-BRL closes?
2. **BBAS3:** primary confirmation of the 26 Oct fall and the Treasury auction cancellations; agribusiness NPL exposure for 11 Nov.
3. **BLTN/EMGA:** NAV drawdown on the BRL week; hedge status.
4. **RNW:** Court Meeting/General Meeting dates, long-stop date, rollover election deadline (read the scheme document).
5. **MTN:** outstanding approvals (South Africa?) and expected close date.
6. **Indonesia:** which holdings (BBRI, BRPT, INDF, MEDC, BUKA) are most exposed to the HSC exclusion and to an MSCI downgrade?
7. **Korea:** do SK Inc and Samsung Life/C&T carry enough look-through Samsung Electronics/SK hynix exposure to matter after -3.6%? Confirm the BoK date and Q3 dates (DART).
8. **BYD:** October sales vs 441,706 (Oct 2025) and 463,561 (Sept).
9. **Ping An:** reconcile 9M NP -27.3% vs H1 +36%.
10. **Suzuki:** confirm H1 date and oil-cost commentary.
11. **VOF/VEIL:** current discount and buyback activity; VOF NAV conflict.
12. **LG Chem:** Q3 actuals and petrochemical loss size.
13. **Ivanhoe/Teck/ALB/PAAS:** results and SAMR read-through for the metals complex.

Watchlist maintenance this run: T-bill row maturity (1 Oct 2026) corroborated and flagged for removal/roll; Amorepacific Holdings note updated (operating co. Q3 already reported); RNW note updated; no identities changed or dropped.
