GGOF Portfolio Brief — Thursday, November 5, 2026

Covers the past 24 hours (Wed Nov 4 into Thu Nov 5 morning). ***Source caveat:*** *web search is US-only, returns mostly snippets, and had almost no indexed same-day news. Pages from CNBC, Fox Business, Schwab, Finviz, Korea Times and JoongAng Daily could not be opened. No primary filing was read this run. "QUIET" means nothing was found in the window, not that nothing happened. Items marked (unverified) rest on one source, a snippet or conflicting sources. Not searched or nothing usable: the Japanese small caps (3445, 7912, 7911, 6425), IPX, JUP, BUKA, CDZI, DIDIY, CAT, LLY, IBKR, WMT, the Mag 7 constituents, and most Group 2 second-tier names. Treat those as unknown.*

1. Top of the stack

Korea: conflicting reads on the chip sell-off, one potentially severe (unverified). Kospi closed Nov 4 at 5,683.80 (+0.62%) after swinging between about +3% and −3.4% intraday; Samsung Electronics closed −0.68% at ₩218,000 and SK hynix −0.14% (JoongAng Daily, TradingKey). This corrects Wednesday's brief, which carried the Nov 4 rebound as intraday and unverified. A search summary of a Korea Times headline says Kospi fell about 5.3% on Nov 5 to roughly 5,384 on fears that a Democratic sweep brings AI-infrastructure regulation (Korea Times headline). A direct follow-up search found no corroboration, so treat that as unverified until a close is confirmed. US chips were weak on Nov 4: Nvidia −3.1% to $200.13 and Micron about −7% (TradingKey). That is a negative read-through for 005930, 000660, SMH and MAGS. Nvidia reports Nov 17 (per a Google Finance summary, unverified).

Ceconomy (CEC GY): all offer conditions reported satisfied; closing date still unknown. The EC cleared JD.com on Nov 3 with 10-year conditions, and Ceconomy and JD reportedly said all closing conditions are met (EC release, 4investors, MarketScreener). Timing sources conflict: "within days" (Dr. Web) versus "H2 2026" (IT Boltwise). An undated snippet mentions Nov 10 (unverified). JD's stake is also unreconciled (59.8% at offer end versus 85.2% in one report). Expect a settlement notice; check the ad-hoc release.

Allied Gold (AAUC CN): correction. The Zijin takeover is dead, and the stock is live. Allied terminated the C$44 arrangement on Jul 29 because China approval missed the outside date. Zijin instead bought about 12.8M shares at C$32.55 (about 9.2%, no board seat) (Yahoo Finance, Mining.com, 6-K MD&A). This replaces Wednesday's "possibly a closed deal" flag. AAUC now trades on fundamentals; a Q3 MD&A appears to be filed already (unverified).

Lion Finance (LIO LN): strong 3Q. Profit GEL 661.9m (+21% y/y); 9M GEL 1,865.7m (+18.6%), ROAE 27.2%; operating income before cost of risk GEL 880.6m (+25.4%); loan growth about 25%; Q3 dividend GEL 3.25 per share (+22.6%) plus a new GEL 62m buyback (Yahoo UK, Investegate RNS, Investing.com). Share reaction and ex-dividend date not found.

Position mechanics: the EULIF/CRML timetable is not confirmed. Wednesday's brief carried implementation on Nov 5 and CRML trading on Nov 6 at a 0.045 ratio. This run found no source confirming those dates. The ratio is VWAP-floating with a 0.045 maximum, and the original fixed ratio was 0.035 (EUR ASX announcement, Aug 19). Check the ASX EUR announcements and the broker on how the OTC ADR (EULIF) is handled before relying on any date.

2. What matters, by group

Group 1 — Rails / shipping / financials

- **CEC GY — MATTERS.** See §1.
- **AAUC CN — MATTERS (correction).** See §1.
- **ZIM US — MATTERS (negative timing risk), no new news.** Israel's review of the original application is closed and Hapag-Lloyd and FIMI must file a new complete application with fresh board approvals. Revised principles were presented Sep 24 with no price increase (Seatrade Maritime, Ynet, FreightWaves). One report cites a new review

deadline of Feb 2027, extendable to Jun 2027 (Forwarder News, Oct 14, single source). Whether the new filing has happened is unconfirmed. Q3 date not found.

- **BHF US — QUIET.** Delaware, New York and Massachusetts insurance approvals were outstanding as of the Q2 10-Q; HSR expired, FINRA approved May 19; outside date auto-extended to **Dec 6** (10-Q). No Q3 date or approval news found.
- **UNP / NSC — QUIET, with dated filings ahead.** STB procedural schedule (STB release): opposition comments, protests and conditions requests due **Nov 18** (Pulse2); a Nov 13 responsive environmental filing deadline appears in one source only (Legal 500). Replies Feb 16, 2027; final briefs May 28, 2027; statutory deadline Aug 28, 2027 (single-source snippet). Expect filings from BNSF, CSX, shippers and unions around Nov 18.
- **ALTI US — QUIET.** Q3 confirmed for Mon Nov 9 after the close, call 5:00pm ET (BusinessWire via FinancialContent). This confirms the date carried previously.

Group 2 — Luxury / consumer / Korea / autos / energy / alternatives

- **005930 KS / 000660 KS — MATTERS.** See §1. 028260 KS, 034730 KS, 051910 KS, 373220 KS: nothing at stock level; one headline says battery stocks rose on the midterm outcome (no per-stock data, unverified).
- **EULIF US / CRML — MATTERS (timing unconfirmed).** See §1. Background: Greenland approved the Tanbreez transfer, taking CRML to 92.5% (Börse Express, unverified). Small holders can receive cash via a sale facility (CRML update).
- **IPAR US / ITP FP — MATTERS (call today).** Q3 net sales $430M, flat; 9M $1.115B (+1%). European-based sales $306M (vs $295M), US-based $127M (vs $137M). Coach fragrance +23%, Montblanc +12%; DKNY −9%, Ferragamo −22%. About $10M of giftsets slipped into Q4; the Middle East war was a 1% headwind. ITP: €265.5M (+4.8%), targeting the upper end of guidance (Premium Beauty News, Quiver Quant, Ideal Investisseur). These are the pre-announced sales figures. EPS and full-year guidance were not found; the Nov 5 call (11:00 ET per the previous brief) is the catalyst.
- **CDI FP / MC FP — QUIET (live structural event).** Dior converts to an SCA and absorbs Agache, triggering a mandatory cash offer. EGMs in December, offer opens Q1 2027 subject to AMF review; indicative price €469.05 (about 1.17 LVMH shares per Dior share), floating on LVMH's one-month average; an independent expert will review (Ideal Investisseur, single source). This differs from Wednesday's "fixed 5 business days before the EGM" wording; the exact mechanism is unconfirmed.
- **RACE IM / EXO NA — QUIET.** Ferrari Q3 (Nov 3) and raised guidance were covered Wednesday. Exor H1 NAV per share 157.9 (−3.9%) with a €500M buyback (Motorionline); no dated Nov 4–5 news.
- **PSH LN / PSUS US — QUIET.** Nothing new. Reported earlier: BofA Underperform (Oct 13) and Citi Sell $45 (Oct 9) on the Pershing complex (StreetInsider listing); the exact security covered is unverified.
- **COTY US — QUIET, date unconfirmed.** Last year FQ1 came Nov 5 after the close with a call Nov 6. FQ1 FY27 guide: like-for-like revenue down low-to-mid single digits, gross margin down 50–100bp (Goldesel). Check Coty IR.
- **NPN SJ / PRX NA — QUIET.** Next earnings listed Nov 30 (TipRanks), outside the window; Wednesday's brief said Nov 24. Dates differ; unverified.
- **GENT MK / GENS SP — QUIET.** Q3 2025 came Nov 27 and Nov 26, so Q3 2026 is probably late November (Genting 2Q26 release); unconfirmed.
- **9433 JP KDDI — CATALYST Fri Nov 6.** H1 results Nov 6, materials 3:45pm JST, webcast 4:00pm (KDDI IR). Prior-year H1 for reference: operating revenue ¥2,963.2bn, profit ¥377.7bn, interim dividend ¥40 (KDDI newsroom). **9432 JP NTT** — 2026 date not found; last year's H1 was Nov 4 (NTT IR). Check whether it is already out.
- **BX US — QUIET.** Q3 reported Oct 22 (revenue about $3.06bn, EPS $0.83). Dividend $1.12 payable Nov 9, record date Nov 2 (Blackstone).
- **ENI IM / TTE FP / REP SM — QUIET.** Eni Q3 ~Oct 23 (adjusted profit €2.8bn, buyback raised, extra dividend); Total Q3 Oct 29 (adjusted net operating income $9.7bn, $2.5bn buyback for Q4 and another for Q1, gearing 9.1%) (Investegate). Repsol Q3 release not retrieved; the third buyback promised with Q3 was not seen. Lower oil is a headwind for all three (see Group 4).

- **VOW GY / P911 GY / 8TRA GY — QUIET.** No dated news. Background: Porsche AG leaving VW's CO2 pool for a deal with XPeng; Traton preparing for a possible IPO and a CNHTC partnership (undated, VW press releases).
- **ALGM US — QUIET (today).** FQ2 results were covered Wednesday (sales $277m, +29%); nothing new. **6707 JP Sanken** — FY3/26 net loss ¥9.8B (EE Times Japan); H1 date unconfirmed.
- **MF FP, BVI FP, PUIG SM, INDUA SS, IPRV LN, MSE FP, PGHN SW — QUIET (nothing found).** MF: interim dividend €2.55 payable Nov 19, Investor Day Dec 2 (carried). BVI: undated report that Wendel is selling down (allnews.ch, unverified).

Group 3 — Small/mid-cap & special situations

- **LIO LN — MATTERS (positive).** See §1.
- **SMH LN — MATTERS (negative).** See §1. No SOX percentage was found for Nov 4.
- **SLV US / SIL US — MATTERS-lite, data conflict.** Spot silver was reported at $52.85 on Nov 5, up 1.16% from $52.24 on Wednesday (FXStreet, Goodreturns). That is far above the roughly $49.7 Kitco level cited in Wednesday's brief for the Nov 3 close. Gold is reported at about $4,060 to "above $4,100" versus about $3,929 on Nov 3. These gaps (about +5% silver, +3–4% gold in a day or two) are unexplained, so a data-source mismatch cannot be ruled out. Verify against Kitco before acting.
- **GPH CN — QUIET (policy-date risk).** No company news. Sources conflict: Trading-Treff says battery and anode controls are suspended to Nov 10 and US graphite exports to Nov 27; Crux Investor says Nov 27 (Trading-Treff, Crux Investor). Confirm against the MOFCOM announcement. Warrants not searched; series note unchanged.
- **NAK US — QUIET, binary.** Oral argument was Jun 25; the summary-judgment ruling is still pending, no ruling found (Mining News North).
- **DDL US — QUIET, pending.** Meituan's $717m purchase of the China business still awaited SAMR approval as of Aug 20; termination fee $150m if Meituan fails to close, $75m if the deal fails on regulatory grounds (TechNode, Panabee). No decision found.
- **VZLA US — QUIET.** No company news; likely tracks silver, which rose Nov 5.
- **BUKA IJ, CDZI US, DIDIY US, 3445 JP, 7912 JP, 7911 JP, IPX LN, JUP LN, 6425 JP — NOT RESEARCHED / nothing found.** Carried dates (unverified): RS Technologies Q3 Nov 13; DiDi Q3 possibly Nov 12 or late November. Japanese March-year-end companies normally report H1 in early to mid November.
- **EP059897 Pfd — UNRESOLVED.** Not identified; owner to supply ISIN/issuer. Not searched or guessed.

Group 4 — Futures / macro hedges

- **Expired contracts (see §4):** NQU6, ESU6, Z U6, WNU6, UXQ6; QCQ6 is past its Aug delivery month; YBYU6 unresolved.
- **US equities, Nov 4:** closing levels were not confirmed. One search summary of a Yahoo Finance headline says the Dow rallied about 1,500 points and the Nasdaq rose about 1.4% on the Democratic sweep (Yahoo Finance, unverified). Another snippet shows S&P +0.36%, Nasdaq +0.83%, Dow −0.38%, which matches the Nov 3 close in Wednesday's brief and is likely stale. Wednesday's brief had Nasdaq-100 futures down about 2% after the close; the direction of the Nov 4 session needs verification. The rally in the Dow against falling chips would imply rotation out of tech (inference).
- **Rates:** 10-year about 4.87% on Nov 5 (4.88% Wednesday, down more than 6bp; another snippet 4.906%) (CNBC, Nov 5 headline). A market report says December hike odds barely moved on the election; no percentage was found, so Wednesday's ~78% is unrefreshed. 30-year, dollar, HYG and IEF moves not found (IEF likely firmer with yields lower; inference).
- **Oil:** Brent reported near $94.70 on Nov 4 (World Oil Monitor) but also $100.60 intraday (Oilprice) and above $94 on Nov 5 (Goodreturns). Wednesday's brief had $104–105 on Nov 3. The direction (lower on US–Iran deal hopes, per Tradingpedia) is consistent; the level is not. EIA commercial crude −0.865M barrels versus a −1.7M forecast (Investing.com).
- **Copper:** no Nov 4 quote found (Wednesday: about $6.39–6.40/lb).

- **Uranium:** no November price found. Latest: Cameco Sep 30 spot $89.63, term $96.50 (secondary page).
- **UK:** FTSE 100 and the Bank of England decision today (Nov 5): no result found. The last confirmed BoE hold was Jul 30 at 3.75% (6–3); that date is from a search snippet and unverified.
- **Week in context:** Oct 29–30 tech rout; Nov 2–3 Apple/Palantir prints and Kospi −3.6%; Nov 3–4 Democratic sweep; Nov 4 chip weakness (Nvidia, Micron) alongside a strong Dow; Nov 5 yields lower and a possibly severe Kospi chip sell-off. Swing factor: AI-capex return and AI-regulation risk versus a Fed that is still discussing hikes. Next: BoE and Tapestry Thu, payrolls Fri.

Group 5 — US large-cap core

- **PLTR — QUIET (no new news).** Q3 beat-and-raise and the 6% TCV slowdown covered Wednesday; no Nov 4 move found.
- **MAGS — MATTERS (unquantified).** Nvidia −3.1% on Nov 4; Mag 7 moves otherwise not found. See §1.
- **TPR — CATALYST today.** FQ1 FY27 release and call Thu Nov 5 at 8:00am ET; results not indexed. Company guide adjusted EPS about $1.55 versus consensus $1.48; FY27 guide revenue $8.4–8.5B, EPS $7.80–7.90. Shares fell 8.8% after the August report on a softer FY27 revenue outlook (RTTNews, Finviz).
- **COST — QUIET, October sales not found.** Not located in two searches; probably due imminently (four weeks to about Nov 1). September base: net sales $30.02B (+13.0%), total comps +11.4%, +7.6% ex gas/FX. The October 2025 comparison base was $21.75B (+8.6%), comps +6.6% (Costco).
- **IBKR, CAT, LLY, WMT — NOT RESEARCHED / nothing found.** Carried: WMT FQ3 expected Nov 19 (aggregator, unverified); IBKR next metrics about Dec 1.

---

3. Probably noise

- **Intraday Kospi swings (+3% to −3%) on Nov 4.** The close was +0.62%. The Nov 5 −5% report is unconfirmed, so do not trade on it until a close is verified.
- **Conflicting Brent levels ($94 vs $100+).** Direction is lower; sources do not agree on the level.
- **Gold and silver quotes from Indian retail sites (Goodreturns).** Local-currency conversions; use Kitco or COMEX settlement.
- **Aggregator "estimated" earnings dates (Coty, ALTI beyond Nov 9, WMT, DiDi).** Trust company IR notices.
- **Undated or old items:** Nov 10 "deadline" for Ceconomy (parqet snippet), Radio Algeria oil quotes.

Undated but live: ZIM refiling and Israeli decision; BHF state insurance approvals (outside date Dec 6); NAK court ruling; DDL SAMR decision; Graphite Creek permit outcome; Dior/Agache steps (December EGMs, Q1 2027 offer); Genting rights-issue EGM; UNP/NSC STB schedule.

Decisions to consider: (1) EULIF holders: confirm with the broker whether implementation has occurred and how the ADR converts, because this run could not confirm the dates; (2) CEC GY: conditions met, so the risk is settlement mechanics and

timing; (3) tech and Korea chip exposure (MAGS, SMH, 005930, 000660) given Nvidia/Micron weakness and a possibly severe Nov 5 Kospi fall; verify the Kospi close first; (4) re-establish the lapsed copper, equity-index, FTSE, Treasury and uranium hedges if intended; (5) AAUC is no longer a merger-arb position, so reassess sizing and thesis.

5. Follow-up questions to investigate

1. **Kospi / 005930 / 000660:** What was the Nov 5 close, and is the stated cause (AI-infrastructure regulation under a Democratic Congress) credible?
2. **CEC GY:** When does JD close, what is JD's actual stake, and what are the delisting and squeeze-out steps?
3. **EULIF/CRML:** What is the real implementation date, and how are OTC ADR holders treated?
4. **AAUC CN:** With the Zijin deal terminated, where is the stock relative to the C$44 offer, and when did Q3 results come out?
5. **US equities Nov 4:** Did the Dow rally about 1,500 points while chips fell? What does the rotation say for MAGS and PLTR?
6. **Gold / silver:** Why do spot quotes ($4,060+ and $52.85) sit so far above Wednesday's Kitco levels?
7. **Brent:** Is it near $94 or $100+, and how much of the drop is an Iran-deal premium that could reverse?
8. **ZIM US:** Has the new Hapag-Lloyd/FIMI application been filed, and what is the Israeli timeline?
9. **IPAR / ITP:** What did the Nov 5 call say about 2026 EPS and the Q4 giftset shift?
10. **TPR:** Did FQ1 beat the $1.55 guide, and did FY27 guidance change?
11. **Dior/Agache:** Is the offer price fixed at a set date before the EGM, or floating on a one-month LVMH average (€469.05 indicative)?
12. **Watchlist hygiene:** What are YBYU6 and EP059897? Which Dec-dated contracts replace the expired futures? Update the AAUC and EULIF labels.
