**Coverage:** full watchlist sweep. The window runs from the Wed 11 Nov Asia close through Thu 12 Nov (Asia and Gulf closes; Europe intraday; US 11 Nov close, with the bond market shut for Veterans Day).

**Data caveat:** this run again had search-snippet access only. msci.com, sec.gov, infomoney, thestandard.com.hk and several Gulf and Korean hosts could not be fetched.

- "QUIET" means we searched and found nothing. It does not mean we verified that nothing happened.
- **Brazil's October IPCA (09:00 BRT today) was not yet indexed at writing time.**
- Conflicts between sources are flagged inline.

## 1. Top of the stack

1. **Banco do Brasil (BBAS3): a large Q3 miss, guidance halved and the payout cut to the legal minimum.**
   - Adjusted net income was **≈R$1.27–1.3bn (-66.5% y/y)**, against Bloomberg consensus of ≈R$3bn. That is below even BTG's R$1.9bn. ROE was 2.8% (InfoMoney, Exame).
   - **2026 guidance cut to R$9–11bn** from R$18–22bn. Cost-of-credit guidance rose to R$80–83bn from R$65–70bn (SpaceMoney).

   - The stock had already fallen ≈33% from 23 Oct to 5 Nov. Today's reaction was not yet found.
   - The guidance cut is worse than even the bearish previews. This is a position-review item.
2. **Indonesia: the MSCI outcome is milder than feared, but the rupiah hit a record low and the vice president has resigned.**
   - **MSCI deletes BRPT from Global Standard** and moves BRMS to Small Cap. Additions remain frozen (MSCI list, Akurat).
     - UNTR does not appear among the deletions; this is unverified against the full list.

- Exposure: HIDR, BBRI, BRPT, INDF, MEDC, BUKA.

3. **US chip shocks hit North Asian tech and China internet.**

   - **A separate report says US Commerce is drafting rules to block Chinese AI firms from using advanced chips remotely** through overseas data centres. Alibaba fell 6.8% to HK$93.80, Tencent fell, and **HS Tech fell 2.36%** (Yahoo Finance, MarketScreener). The draft is unverified beyond press reports.

     - Holders must decide whether to take up or sell their rights.
   - **Emaar (answers yesterday's question): an all-cash offer of AED15 per Emaar Development share**, not a share swap.
     - Premium of 18.6% to the 1-month VWAP.

5. **Korea: two Young Poong legal catalysts in two days.**
   - **Today:** Seoul Central District Court ruled for Young Poong/MBK. It **cancelled the resolutions of Korea Zinc's 28 Mar 2025 AGM**, which was held while Young Poong's votes were restricted under the cross-shareholding rule. Korea Zinc will appeal (Asia Economy, FN News).
   - **Tomorrow at 14:00 KST:** the Seoul High Court rules on the **₩527.2bn Korea Zinc share issue to HMG Global**. Young Poong won the first instance, which voided the issue (Newspim).
