GGOF Portfolio Brief — Friday, November 6, 2026

Covers Nov 5 into Nov 6. ***Source caveat:*** *web search returned snippets only; WebFetch was blocked for most news hosts (CNBC, Finviz, FXStreet, JoongAng, Seoul Economic Daily and others), so no article body or primary filing was read this run. Figures marked (unverified) rest on a single snippet or conflicting sources. "QUIET" means nothing was found in the window, not that nothing happened. Not usefully covered: NTT, Industrivärden, Partners Group, Naspers/Prosus, IPRV, MSE, ALGM, LG Chem, LG Energy Solution, Samsung C&T, SK Inc, the Japanese small caps, SIL/SLV prices, copper, uranium, FTSE 100, HYG/IEF and the December futures. Treat those as unknown.*

1. Top of the stack

An AI/tech rout hit US and Korean equities. Treat it as the dominant fact for every equity and hedge position today. On Nov 5 the S&P 500 fell 4.36% to 7,353.73, the Nasdaq fell 5.52% to 24,315.00 (a correction, more than 10% below the Oct 6 record) and the Dow fell 1,833 points (−3.44%) to 51,523.06, the worst day since April 2025 (CNBC live blog snippet, Fox Business, CNN, Investing.com). Nvidia fell about 9% and Qualcomm more than 9% after a weak forecast (CNBC). One report puts the Philadelphia Semiconductor Index down more than 12% (unverified, TokenPost). Reported causes: Qualcomm's guide, Nvidia China problems, and fear that Democratic midterm wins mean AI data-center regulation. Two search headlines conflict ("stocks leap on midterms" versus "Nasdaq biggest drop in 19 months"), so verify closes against a terminal. Palantir reportedly fell about 9.7% (Substack recap, unverified); other Mag 7 names fell 2.2–3.9% (Motley Fool). Early Friday futures were mixed (unverified, WithinNigeria). The October jobs report lands at 8:30am ET today, with consensus around +59,000 and unemployment 4.2% (FXStreet). Nvidia reports Nov 17 (Trefis).

Korea is the sharpest casualty: the Kospi is down about 11% in two sessions. It fell 5.28% on Nov 5 to 5,383.80 (BigGo, Trading Economics), which confirms Thursday's unverified Korea Times report. It then fell **6.02% on Nov 6 to 5,059.69**, with an intraday low of 4,911.28 (Seoul Economic Daily, JoongAng Daily). A sell-side sidecar was triggered Nov 5 (JoongAng). SK hynix fell 9.46% on Nov 5 and about 10.4% on Nov 6; Samsung Electronics fell 7.57% and about 6.35% (snippets, unverified). Bloomberg reported Korean chip stocks down 10% pre-market on Nov 5 (Bloomberg). Analysts quoted by BigGo say concrete data-center regulation is unlikely soon, which argues the move is positioning-driven. Compounding it: foreigners had sold SK hynix for 18 straight sessions through about Oct 20, and Solidigm's planned Nasdaq listing is controversial (Herald).

Bank of England hiked 25bp to 4.00% (8–1; Mann wanted 50bp), the first move of 2026. (BoE.) Next meeting Dec 17. This matters for LIO LN, IPX LN, JUP LN and the UK rate view. The subagent noted a snippet describing a 3.75% rate and a 6–3 vote in September, which is consistent with 3.75% before this move; not fully reconciled.

EULIF/CRML: the merger reportedly became effective Nov 5. A Finviz headline gives an implementation date of Nov 5 and a record date of Oct 29 (Finviz, snippet only). Ratio reported at 0.045 CRML per EUR share, floating on a 20-day VWAP with a US$8 floor and US$16 ceiling, at its maximum because CRML traded below the floor (Motley Fool Australia). This resolves the unconfirmed date flagged yesterday, but only from a headline. Confirm with the broker how the OTC ADR is treated; the watchlist label (0.035x) is stale.

Tapestry (TPR) crushed FQ1 and raised guidance, but the tape was brutal. Adjusted EPS $1.82 versus about $1.56 consensus; Coach revenue +16% to $1.66B (China +43%); Kate Spade −10% to $233M. FY27 adjusted EPS guide raised to $8.25–8.35 from $7.80–7.90, revenue about $8.5–8.6B, about $2B of capital returns (Investing.com, Yahoo Finance, Motley Fool transcript). Shares were up 8% or more pre-market; the close is unverified on a day the market fell 4–5%.

2. What matters, by group

Group 1 — Rails / shipping / financials

- **BHF US — MATTERS (deal timing).** Q3 reported Nov 5: net income $302M, adjusted earnings $9.12 per share (search summary; yesterday's brief cited a Q2 adjusted EPS of $4.45, and the $9.12 is unreconciled). The Q3 10-Q says Delaware, New York and Massachusetts insurance approvals remain outstanding, are not expected before the **Dec 6** outside date, and the parties are discussing an extension amendment (Q3 10-Q, earnings release). The subagent read search summaries, not the filing text. FINRA approved in May and CFIUS finished its review. A deal at $70 cash was approved by shareholders Feb 12 (Business Wire). Watch for an 8-K amendment to the outside date.
- **ZIM US — MATTERS (no resolution).** Israel halted review of the original Hapag-Lloyd/FIMI structure; Finance and Defense ministries objected (Axios, Sep 29, Ynet, FreightWaves). A revised bid (golden-share trigger cut to 10% from 24%) was reportedly due Oct 6. Nothing found for Oct 7–Nov 6 on filing or ruling. Closing still targeted for late 2026 per Hapag-Lloyd's CEO (Oct 2). Unverified.
- **CEC GY — QUIET (settlement date unknown).** This run found only a Dec 2025 item (JD.com 59.8% of the offer, 85.2% including Convergenta; TradingView). Yesterday's brief carried EC clearance on Nov 3 with all conditions satisfied; nothing newer found. Check the Ceconomy ad-hoc releases.
- **UNP / NSC — QUIET.** STB schedule (Aug 18 order): final briefs due May 28, 2027, then a 90-day decision window, so no ruling before H2 2027 (Railway Age). Opposition filings due Nov 18 per yesterday's brief. Nothing new in the window.
- **AAUC CN — QUIET.** The Zijin C$44 takeover was terminated and replaced by a C$416.6M placement of 12.8M shares at C$32.55, closed Aug 10, giving Zijin about 9.2%; hold period ends Dec 11, 2026 (Allied Gold). Q3 results date not checked.
- **ALTI US — CATALYST Mon Nov 9.** Q3 after the close, call 5:00pm ET, confirmed in yesterday's brief (BusinessWire). A research subagent matched "ALTI" to Altimmune (ticker ALT) and reported conflicting dates; that mapping is wrong for this watchlist and was ignored.

Group 2 — Luxury / consumer / Korea / autos / energy / alternatives

- **005930 KS / 000660 KS — MATTERS.** See §1. 051910 KS, 373220 KS, 028260 KS, 034730 KS: no coverage found; assume they fell with the Kospi (no figures).
- **EULIF US / CRML — MATTERS.** See §1.
- **COTY US — MATTERS (reported Nov 4, one day before the window).** FQ1 FY27 adjusted EPS $0.16 versus $0.12; net revenue $1,555.2M (−1%) versus $1,532M; gross margin 63.3% (−120bp); adjusted EBITDA $274.2M (−7%); FCF $85M. FY27 is a "transition year", Q2 EBITDA guided down high-single-digit, Middle East costs persist, and the strategic review is due by end of 2026 (Yahoo Finance, Stockhouse, MarketBeat). Corrects yesterday's "date unconfirmed". Share reaction not found; strategic-review headlines are the swing factor.
- **IPAR US / ITP FP — QUIET.** Q3 net sales $430M, flat; Q3 EPS $2.13 and 9M EPS $4.43 (the EPS figures come from one source); Coach +23%, Montblanc +12%, Ferragamo −22%, Lanvin −19%; about $10M of US giftsets slipped into Q4; management targets the upper end of the ~€870M ITP sales guide (Capital.com, Ideal Investisseur). The Nov 5 call content was not found.
- **CDI FP / MC FP — QUIET (live structural event).** The Arnault family proposed about Sep 24 to merge Agache into Dior (converting it to Agache SCA); a cash offer covers the 2.44% held outside the family at 95% of look-through

NAV, based on the one-month average LVMH price. EGM expected December, offer Q1 2027 subject to AMF waivers; no AMF filing found (Option Finance, Cosmetics Business). LVMH Q3 (Oct 12): revenue €18.5B, organic +1%, Fashion & Leather −5%, China weak (LVMH).

- **RACE IM / EXO NA — QUIET.** Ferrari Q3 (Nov 3): revenue €1,896M (+7%), EBIT €563M (+12%), EPS €2.44; shares fell as much as 4.8% intraday then reversed (Il Sole 24 Ore). Exor: nothing new.

- **PUIG SM — QUIET.** Q3 sales about €1.39B, +5.6% LFL, outlook kept (Oct 21; FashionUnited).
- **9433 JP KDDI — CATALYST today.** H1 results Nov 6, materials about 15:45 JST (KDDI IR); no figures found. Prior-year H1: revenue ¥2,963.2B, profit ¥377.7B (KDDI). **9432 JP NTT:** nothing found.
- **ENI / REP / TTE — QUIET.** Q3 results already out (Eni adjusted net profit €2.8B per Egypt Oil & Gas). Oil is down sharply on Iran-deal hopes (see §4), a headwind.
- **BX US — QUIET.** Dividend $1.12 payable Nov 9 (record Nov 2).
- **MF FP / BVI FP — QUIET.** BV H1 revenue €3,258.4M (+2.1%), outlook raised; ODDO expects Wendel to exit BV in 2026 (analyst view). Wendel dividend €2.55 payable Nov 19 (carried).
- **GENT MK / GENS SP — QUIET.** Genting Berhad Q3 probably late November (last year Nov 27); unconfirmed.
- **ALGM US, 6707 JP, INDUA SS, NPN SJ, PRX NA, PGHN SW, IPRV LN, MSE FP — nothing found.** Sanken: an Aug 13 disclosure suggests H1 FY3/27 sales about ¥39.3B and an operating loss about ¥2.4B (unlabeled table, unverified).

Group 3 — Small/mid-cap & special situations

- **LIO LN — QUIET (and rate-sensitive).** Q3 dividend declaration expected about Nov 19, ex-date about Dec 17, paid Jan 8 (third-party estimates, DividendMax). The BoE hike is a read-through; no share reaction found.
- **SMH LN — MATTERS (negative).** Direct exposure to the chip rout (SOX reportedly −12%+, unverified).
- **DDL US — QUIET, binary.** SAMR accepted the Meituan deal for review, rivals have complained, long-stop Feb 2027 (IONA Analytics).
- **NAK US — QUIET, binary.** Oral argument was Jun 25; the ruling is pending (SEC 6-K).

- **VZLA US — QUIET.** Panuco has an EPCM contract and feasibility study; first silver targeted H2 2027 (Rallies).
- **7912 JP DNP — CATALYST.** A Trading Economics page lists FY Q2 earnings on Nov 6 (TE); no results found.

- **EP059897 Pfd — UNRESOLVED.** Not identified; owner to supply issuer/ISIN. Not guessed.

- **Equities:** closes in §1. VIX about 28.2 (Investing.com snippet, unverified).

- **Gold/silver:** gold about $4,090–4,100, up roughly 1% (unverified against Kitco). Silver: no figure.
- **Oil:** WTI $89.10 Thursday morning (Schwab), down about 15% on the week on hopes of an end to the Iran war. Brent settle not found.
- **Copper, uranium, FTSE 100:** nothing for Nov 5.
- **Week in context:** Nov 2–3 Apple/Palantir prints and Kospi −3.6%; Nov 3–4 Democratic midterm sweep, Dow strong while chips weakened; Nov 5 US −4.4%/−5.5% and BoE hike; Nov 6 Kospi −6% and the jobs report. Swing factor: AI-capex and AI-regulation risk against a Fed still discussing hikes.

Group 5 — US large-cap core

- **MAGS / PLTR — MATTERS.** See §1.
- **TPR — MATTERS (positive).** See §1. No scheduled catalyst; ex-dividend date not found ($0.4625 quarterly).
- **IBKR — NOISE.** October metrics (Nov 2): DARTs 4.306M (−4% y/y), client equity $928.6B (+19% y/y), accounts 5.678M (+34%) (FX News Group). Likely traded down with the market (unverified).
- **COST — QUIET.** October sales release not found; September base was net sales $30.02B (+13.0%), comps +7.6% ex gas/FX (Costco).
- **CAT, LLY, WMT — QUIET (nothing found).** WMT FQ3 expected mid-November, date unverified.

---

3. Probably noise

- **Conflicting Nasdaq figures (−5.5% vs −6.4%).** The −5.52% figure is the one cited by multiple outlets; use it.
- **Stale search results** (e.g. Allied Gold "pending Zijin takeover", Altimmune results for ALTI). Ignore.
- **Early-Friday futures snippets.** Unverified, and the jobs print will override them.
- **Intraday Kospi extremes** (−8.5% opening plunge, 20-minute halt). The closes are the figures that count.

4. Time-sensitive / positions watch

Expired or unidentified instruments — `watchlist.md` needs updating (not edited by this run):

Instrument	Status	Action
CRML US 08/21/26 C12.5	Expired Aug 21, 2026	Remove from watchlist
QCQ6 (COMEX copper, Aug 2026)	Past delivery month	Roll to a current contract if exposure continues

UXQ6 (UxC uranium, Aug 2026)	Expired	Successor not confirmed

Instrument	Status	Action
YBYU6	Unresolved; "U6" implies Sep 2026, likely expired	Owner to clarify product
EP059897 Pfd	Unresolved identifier	Owner to supply ISIN/issuer
EULIF	Merger reportedly effective Nov 5; ratio floating (0.045)	Update label; confirm ADR treatment
AAUC CN	Zijin deal terminated	Update label
GPH-WA	Series/date note stale	Confirm series and date

Dated catalyst calendar (next ~2 weeks):

Date	Item	Note

Dec 6	BHF outside date	Extension amendment under discussion

Undated but live: ZIM refiling and Israeli decision; BHF state approvals; CEC GY settlement; NAK court ruling; DDL SAMR decision; Dior/Agache AMF filing and December EGM; Coty strategic review (by end 2026); Solidigm listing; Korean sidecar/halt repeats.

Decisions to consider: (1) Equity-beta exposure (MAGS, SMH, PLTR, 005930, 000660) after a −4% to −6% US day and a two-day −11% Kospi; confirm hedge status, and note the Sep index futures have lapsed, so any intended hedge needs the Dec contracts; (2) EULIF holders: confirm conversion mechanics with the broker; (3) BHF: an outside-date extension to follow Dec 6 looks likely, so reassess spread and time value; (4) re-establish lapsed copper, Treasury, FTSE and uranium hedges if intended; (5) UK rate-sensitive names (LIO, IPX, JUP) after the BoE hike.

5. Follow-up questions to investigate

1. **Korea:** Is the Nov 6 close of 5,059.69 confirmed on KRX, and what drove the second day? Is foreign selling or retail margin liquidation behind it?

2. **US close:** Verify Nov 5 closes (S&P 7,353.73, Nasdaq 24,315.00). How much of the move was Qualcomm/Nvidia versus the midterm regulation narrative?
3. **Jobs report:** What did October payrolls show, and how did Fed hike odds for Dec 9 respond?
4. **TPR:** What was the Nov 5 close, and did it hold its gains?
5. **EULIF/CRML:** Is implementation confirmed on the ASX, and how is the OTC ADR converted?
6. **BHF:** Has an outside-date amendment been filed? Which of the three states is the long pole? Why does Q3 adjusted EPS ($9.12) differ so much from Q2 ($4.45)?
7. **ZIM:** Was the revised Hapag-Lloyd/FIMI bid filed, and what is the Israeli timeline?
8. **CEC GY:** What is the settlement date, and what is JD's final stake?
9. **Coty:** What was the share reaction, and what is the status of the strategic review?
10. **BoE hike:** How did LIO LN, IPX LN and JUP LN react?
11. **Metals and oil:** What were silver, copper and Brent on Nov 5? Is Brent confirmed lower on Iran-deal hopes?
12. **Watchlist hygiene:** What are YBYU6 and EP059897? Which Dec contracts replace the expired futures?
