

Ubiquoss Holdings (078070 KS) — Sum-of-the-Parts & Holdco Net-Cash Appendix

Companion to the main deep-dive · August 2026 · KRW unless noted · FX ≈ ₩1,380/USD

Purpose. Value each division (Ubiquoss Inc. / Nexight / BiLab / Ubiquoss Investment), answer whether 078070 consolidates 264450, and — because it does — strip the consolidation to compute **pure parent-only (별도) net cash** at the holdco. This appendix also **corrects** two numbers from the first note (see §6).

1. Does 078070 consolidate 264450? — YES (in full), and that is the whole trick

Yes. Ubiquoss Holdings' consolidated statements **fully consolidate** Ubiquoss Inc. (264450) — line-by-line, 100% of its revenue/assets — with a large **non-controlling interest (NCI)**. 264450 is a 연결대상 종속회사 (consolidated subsidiary), alongside Nexight, BiLab, Ubiquoss Investment and Ubiquoss USA.

Ownership of 264450	Stake	Note
078070 direct	~31.96%	Largest single shareholder
+ Nexight (100%-owned sub)	+3.0%	
+ Ubiquoss Investment (100%-owned sub)	+3.0%	
Group look-through (economic)	~38%	Attributable to 078070 owners
+ other special-related parties	to ~41.5%	Basis for <i>control</i>

Consolidation rests on **de-facto control** (dominant largest-shareholder position + holding-company structure) under K-IFRS 1110, **not** a majority stake. The consequence drives everything below:

~62% of everything inside 264450 — its ₩155bn+ revenue, its ~₩80bn cash, its ~₩196bn equity — appears on the holdco's consolidated balance sheet but belongs to *minority* shareholders, not to 078070's owners. Reading consolidated cash/earnings as the holdco's overstates them by ~60%.

2. Pure holdco (별도 / parent-only) net cash — the number you asked for

2.1 The correction that matters

The often-quoted "**~₩80bn net cash / current ratio 804% / debt-free**" describes **Ubiquoss Inc. (264450)**, the operating company — explicitly "the best balance sheet among telecom-equipment makers." It is **not** holdco cash. The holdco's economic claim on it is only ~32–38% ≈ **₩25–30bn**.

2.2 What the holdco holds on a parent-only basis

078070 is a **pure holding company**: 별도 revenue is only ~₩4.0bn/quarter (~₩16bn/yr), of which ~₩2.4bn/quarter is dividend income from subsidiaries, the rest mostly **rental income** (it owns the HQ/property). Group **consolidated liabilities are just ₩31.1bn on ₩387.7bn assets (D/E ~8.7%)** — a pure holdco of this shape carries little or no borrowing.

Holdco parent-only (별도)	Estimate	Confidence
Borrowings / financial debt	≈ ₩0 (effectively debt-free)	High — group barely levered; holdco is a pure shell
Own cash + financial investments	≈ ₩30–50bn	Estimate — matches "Financial-asset ~20% of NAV" bucket (≈ ₩40bn)
Pure holdco net cash (별도)	≈ +₩30–50bn (net cash)	Estimate — exact 별도 line needs the DART filing (proxy blocked)

- **Pure parent-only net cash:** ≈ **+₩30–50bn**, effectively **debt-free** — the holdco's own dry powder (the "Financial assets 20%" bucket it plans to redeploy into Growth/Seed).
- **Look-through net cash** (economic share of all group cash): ≈ ₩40bn (own) + ~38% × ₩80bn (264450) + small Nexight ≈ **₩70bn** — still well below the ~₩80–100bn a consolidated read would imply.

Bottom line: 078070 has **no net debt** at any level. But "**pure**" holdco net cash is **₩30–50bn**, not **₩80bn** — the big cash number lives in the 32–38%-owned opco.

3. Valuing each division

3.1 Ubiquoss Inc. (264450) — the listed opco

Market cap (100%)	~₩149bn (₩10,170/sh)	P/E 6.15x · P/B 0.75x
Equity / net cash	~₩196bn / ~₩80bn	FY25: rev ~₩115bn (+12.2%), NI ~₩24bn (+13%)
Hana Securities	Buy, TP ₩22,000	≈ 2.2× price → implied 100% value ~₩323bn

Value of the holdco's stake: at market, $31.96\% \times \text{₩149bn} = \text{₩48bn}$ (~₩57bn look-through); at Hana's target, $31.96\% \times \text{₩323bn} = \text{₩103bn}$ (~₩123bn look-through).

3.2 Nexight (100%-owned) — the hidden semi-cap growth leg

Ownership	100%	Revenue FY24 ₩15.4bn → FY25 ₩34.3bn (+122.7%)
Driver	DDR5 server-memory testers for SK Hynix	Est. NI ₩3.5–5bn (10–15% margin; not disclosed)

Valuation (private): ~2–3× sales or ~15–20× est. earnings ≈ ₩60–100bn, less a single-customer/private discount → **Bear ~~₩45bn~~ · Base ~~₩70bn~~ · Bull ~~₩90–100bn~~**. This is the swing factor in the whole SOTP.

3.3 BiLab (AirTom) — seed medical device

Majority/consolidated (joined 2020); exact % undisclosed. **Seed** stage (respiratory/airway monitoring). Value ~~₩5–15bn~~ (holdco share) — mostly optionality, not cash-generative.

3.4 Ubiquoss Investment (100%) — VC/PEF book

Manages venture/PE funds; GP commitments + carry; source of lumpy realized gains. Value ~~₩10–30bn~~ (fund NAV + carry; estimate).

3.5 Other

Ubiquoss USA/Japan (100%, nominal); **HQ real estate / leasing** ≈ ₩10–30bn (generates the holdco's rental income).

4. Sum-of-the-parts / NAV bridge

Component (₩bn)	Bear	Base	Bull	Basis
264450 stake (31.96% direct)	40	48	103	Market → Hana target
Nexight (100%)	45	70	95	2–3× sales / est. earnings
Ubiquoss Investment (100%)	10	20	30	Fund NAV + carry
BiLab (share)	3	8	15	Seed optionality
Holdco 별도 net cash + fin. assets	30	40	50	Parent-only, debt-free
HQ real estate / leasing	10	20	30	Rental base
Ubiquoss USA + misc	1	2	3	Nominal
Gross NAV	≈139	≈208	≈326	
Per share (÷ ~17.0m)	₩8,200	₩12,250	₩19,200	
vs. mkt cap ₩185bn (₩10,900/sh)	-25%	+12%	+76%	discount/(premium)

Read: at conservative marks the stock is roughly at NAV (even a slight premium in the bear column); at base marks a modest ~10–15% discount; only on growth marks for Nexight + a 264450 re-rating does the classic 30–75% holdco discount appear. The NAV gap is **real but conditional** — it hinges almost entirely on Nexight's private value and whether 264450 re-rates toward the Hana target.

5. Is there a free lunch? (the "what you pay for the stubs" test)

- Market cap ~~₩185bn~~ – holdco 별도 net cash ~~₩40bn~~ – 264450 stake at market ~~₩48bn~~ = ~~₩97bn~~ implied for Nexight + Ubiquoss Investment + BiLab + real estate.
- Base-case value of those stubs ≈ 70 + 20 + 8 + 20 = ~~₩118bn~~ > ₩97bn → **implied discount ≈ ₩21bn (~11–14% of cap)**.
- A discount, but a **moderate** one — **not** "everything for free." Nexight must be worth >₩70bn for the discount to be compelling.

6. Corrections to the first note

- Holdco net cash is NOT ~40% of market cap.** That double-counted the opco's ₩80bn. **Pure parent-only net cash ≈ ₩30–50bn (~16–27% of cap)**; the ₩80bn belongs to the 32–38%-owned 264450.
- Share price/count.** 078070 has ~17.0–17.6m shares at ~~₩10,900~~ (cap ~~₩181–194bn~~) — the earlier "₩17,500" was erroneous.
- New positive:** both entities are **buying back and cancelling stock** — 078070 cancelled ₩3.44bn (545,929 sh, 3.10%, May-2026) plus a prior ~₩3.4bn tranche; 264450 cancelled ₩2.01bn (Oct-2025). A genuine, repeated shareholder-return signal that softens (not eliminates) the "cash-hoarding control vehicle" bear point.

7. Confidence & sources

Disclosed (high confidence): consolidation of 264450 & subsidiary list; ownership (~32% direct, ~38% look-through, ~41% control); FY2025 consolidated results; FY2024 consolidated balance sheet (assets ₩387.7bn / liabilities ₩31.1bn / equity ₩356.6bn); 264450 market data & ~~₩80bn~~ cash; Nexight FY24 → FY25 revenue; buyback/cancellations; Hana Buy/₩22,000. **Estimated (flagged):** the parent-only 별도 cash line (proxy blocked DART/KIND/FnGuide), Nexight / Ubiquoss Investment / BiLab / real-estate private values, controlling-vs-NCI split, exact share count. Verify the 별도 balance sheet against the DART 사업보고서 before relying on the holdco net-cash figure. **Not investment advice.**
