EM Portfolio Morning Brief — Tuesday, 27 October 2026

Coverage: full watchlist sweep; Mon 26 Oct sessions plus Tue Asia. **Data caveat:** live search was weak and no page could be opened (fetch DNS failures) — every figure comes from search summaries, several conflict between outlets, and Tuesday closes are mostly missing. "QUIET" means *nothing found*, not *verified nothing*. Conflicts and unverified items are flagged.

1. Top of the stack

1. **Brazil crash after Lula's win — much larger than yesterday's overnight indications.** Lula won the runoff 51.79% to 48.21% (TSE figures via Poder360/Conjur). Monday: **Ibovespa -13.88% to 176,608**, the biggest one-day fall since 2020 per InfoMoney (Reuters says "since 1998" — conflict), with a 30-minute circuit-breaker halt; **USD/BRL ~R$5.40 (+8.2%)**, intraday high ~R$5.60 before BCB/Treasury intervention (InfoMoney, Exame, Canal MT). Your names: **MOVI3 -58.5%, CYRE3 -44.8%, B3SA3 -36.3%, LREN3 -34.1% (single undated source), BBAS3 ~-29% (-31% in one headline)** (Bloomberg Linea). No figures found for PRIO3, CVCB3, XP, AGRO3. EWZ was ~-27–28% pre-market (close unconfirmed) (TradingKey). Rates: DIs rose sharply and a Selic **hike** at the 3–4 Nov Copom is now reportedly priced (Selic 13.75%; DI levels not found); the Treasury cancelled its 27 and 29 Oct auctions. Flávio Bolsonaro has not conceded and says he will seek annulment (Poder360). Watch for any early Nunes Marques/STF action on Jair Bolsonaro's criminal-review petition (Poder360).
2. **Philippines: BSP hiked 50bp on 22 Oct** (largest since Feb 2023, 4th straight hike) on oil/fare/El Niño inflation risk (Tribune). New policy rate conflicts across sources (5.25% vs 5.50%) — check bsp.gov.ph. Resolves yesterday's open item; negative for ALI and GTCAP (1H26 already weak: ALI net income -19%, GTCAP -11%).
3. **Korea: KOSPI -1.46% Monday to 5,469.47 (lowest close in ~7 months), Kosdaq -3.26%, KRW 1,323.1** (Korea Times). Foreign net selling ~₩696bn (Korea Times' 6.955tn looks like a decimal error — yesterday's brief repeated it; correct to ~₩0.7tn). Tuesday: headlines report a KOSPI rebound of 3%+ led by Samsung/SK hynix, attributed to news of Anthropic's planned Nasdaq listing — **driver and size unverified** (SBS, Invezz). Swing events: **SK hynix Q3 Wed 28 Oct** (Hana OP est. ₩77.9tn, Kiwoom ₩78.5tn, DS Investment ₩70tn; date 27 vs 28 Oct to confirm) and **Samsung Electronics full Q3 Thu 29 Oct** (prelim 8 Oct: sales ~₩195tn, OP ~₩107.4tn) (Samsung). The two lost ~₩818tn of market value in October (Sedaily).
4. **Oil and Fed.** Monday settles reported: Brent ~$115.20 (-1.3%), WTI ~$101.36 (-1.85%) (single-source, unverified; Friday Brent $116.72). **FOMC began 27 Oct, decision Wed 28 Oct**; hold is the base case, hawkish tone is the risk; early-Oct minutes saw another hike as likely by year-end. UST 10y ~4.98% (a separate item cited a 5.30% auction — conflict). Gold rebounded to ~$4,013 (+0.5%) from $3,975 Friday (Kitco). Gulf risk backdrop persists but I found no Monday Gulf closes or October incidents beyond yesterday's brief.
5. **Gran Tierra (GTE) — sale progressing.** Shareholders approved the Maurel & Prom Colombia/Ecuador sale on 9 Oct (~99.8% of votes cast; majority-of-outstanding tabulation pending); regulatory approvals outstanding, close targeted before year-end (Yahoo, GlobeNewswire). Pro-forma NAV $12.49/share quoted by the company. Q3 date still not found.

Position mechanics needing a decision: (a) **US T-bill 912797SA6** matured 1 Oct 2026 (TradingView, Gabelli holdings; not checked on TreasuryDirect) — remove/roll; (b) **Brazil book** (BBAS3, B3SA3, CYRE3, LREN3, MOVI3, CVCB3, XP, BLTN, Bunge, EMGA weight) into 4 Nov Copom — drawdowns of 30–58% in a day; (c) **BLTN NA now identified** (below) — it is a BRL rates product hit by both the DI selloff and the real; (d) **RNW** $7.02 take-private on track; (e) **MTN–IHS** awaits SA Tribunal; (f) FOMC 28 Oct.

2. What matters, by region/theme
