GGOF Portfolio Brief — Monday, November 9, 2026

Covers the weekend: Fri Nov 6 close through Mon Nov 9. ***Source caveat:*** *live web search returned mostly snippets and almost nothing dated Nov 6–9 for single names; WebFetch was blocked or unavailable for primary sources (SEC, IR, TDnet). "QUIET" means nothing was found in the window, not that nothing happened. Items marked (unverified) rest on one snippet or an aggregator. Not usefully covered: Caterpillar, Eli Lilly, Interactive Brokers, MAGS, HYG/IEF, 30-year yield, copper, uranium, FTSE 100, gold/silver levels, NTT, Industrivärden, Partners Group, IPRV, MSE, SMH, and most small caps.*

1. Top of the stack

US stocks bounced Friday but the week was the worst since April 2025; a hot jobs print revived Fed hike risk. On Nov 6 the S&P 500 closed at 7,376.86 (+0.31%), the Nasdaq Composite at 24,579.42 (+1.09%) and the Dow at 51,285.73 (−0.46%); chips recovered over a third of Thursday's fall. For the week the S&P fell about 2.7% and the Nasdaq about 3.4% (Closing Look, TheStreet, Yahoo Finance). October payrolls were +165,000 versus roughly 59–65k expected; gold fell and yields rose (Kitco). CME FedWatch implied about a 76% chance of a hike on Dec 9 (secondary, MLQ); 2-year about 4.53% and 10-year about 4.87% (unverified). For a holder, the equity-beta book (PLTR, MAGS, SMH, Korean chips) faces both AI-regulation risk and a rates headwind, and the Sep index hedges on the watchlist have lapsed (see §4).

Kospi: still near the lows, now 5,018.85 on foreign selling. Monday closed −0.81% at 5,018.85 after dipping below 5,000 early and reaching 5,172.94 intraday; foreigners sold a net ₩864.7B. The index lost 11.7% last week and its 12-month forward P/E fell to 3.54x, the lowest since 2001 (JoongAng Daily, Seoul Economic Daily, AJP). A Trading Economics page shows 5,132, which conflicts with every close report; ignore it. Fresh AI-sector uncertainty: an internal Nvidia probe tied to allegations that a Chinese spy targeted its chief (reported by JoongAng; not independently checked). Nvidia reports Nov 17 (Earnings Whispers; other sites say Nov 18 or 25, so confirm with Nvidia IR).

ALTI reports Q3 after the close today. The Nov 6 brief carried the date (call 5:00pm ET). This run could not find the release itself or any independent confirmation; last year's Q3 came Nov 12. Q2 revenue was about $58.0M with a $30.8M loss from continuing operations (10-Q). Check Business Wire tonight.

BHF: an outside-date extension is the live item. The Q3 10-Q says the only open conditions are Delaware, New York and Massachusetts insurance approvals, that they will not arrive before the **Dec 6** outside date, and that the parties are negotiating an amendment (10-Q). A Substack citing Capitol Forum alleges a $2.8B reinsurance discrepancy at the New York affiliate (Substack, unverified, no NY DFS order found). Expect an 8-K before Dec 6.

UNP/NSC: opposition wave due Nov 18. Comments, protests and requests for conditions are due Nov 18; responses Feb 16, 2027; final briefs May 28, 2027. CN says it will seek conditions (CN Q3 MD&A).

2. What matters, by group

Group 1 — Rails / shipping / financials

- **BHF US — MATTERS.** See §1.
- **UNP / NSC — MATTERS (scheduled).** See §1. Closing targeted Q3/Q4 2027.
- **ALTI US — CATALYST today.** See §1.
- **ZIM US — MATTERS (no resolution).** Israel's Government Companies Authority halted its golden-share review and requires a full new application; revised terms reportedly cut the approval trigger to 10% from 24% and give the Israeli entity

16 vessels (FreightWaves). No resubmission or ruling found. An old article had ZIM at $27.54 against $35 (current price unknown); the Q4 close target looks doubtful.

- **CEC GY — QUIET.** Only the Dec 2025 result found (JD.com 59.8% of the offer, 85.2% with Convergenta; Tiger). No settlement or final-stake news.
- **AAUC CN — QUIET.** Per the Nov 6 brief the Zijin C$44 takeover was terminated and replaced by a C$416.6M placement (closed Aug 10, Zijin about 9.2%, hold period ends Dec 11). One subagent search surfaced only the original January deal; that is stale.

Group 2 — Luxury / consumer / Korea / autos / energy / alternatives

- **005930 KS / 000660 KS — MATTERS.** See §1; Korean chips rose in a Monday SBS headline while the index fell (SBS). Solidigm's US IPO was reportedly weighed in Aug–Sep; one secondary source says the pre-IPO raise was discontinued Oct 23 (single source, unverified). 051910 KS, 373220 KS, 028260 KS, 034730 KS: no Nov 6–9 coverage. New CRML shares were expected to start trading on Nasdaq Nov 6; no confirmation or CRML price found. How the OTC EULIF ADR converts is unverified; ask the broker.
- **COTY US — MATTERS (event risk).** Nov 4 FQ1: sales −1%, like-for-like −2%, profit ahead of guidance. The strategic review (mass colour cosmetics about $1.2B of sales, and Brazil about $400M) is due by end of 2026; options are partnership, divestiture or spin-off (8-K). Share reaction not found.
- **CDI FP / MC FP — QUIET (structural).** The Arnault family's Sep 24 proposal to merge Agache into Dior: EGM around end-2026, offer in Q1 2027, subject to AMF waivers; Dior rose over 17% that day (FashionUnited, Cosmetics Business). No AMF decision found.

- **NPN SJ / PRX NA — QUIET.** H1 results listed Nov 30 by a third party (unconfirmed).
- **IPAR / ITP FP, PUIG SM, RACE IM, EXO NA, BVI FP, MF FP, GENT MK, GENS SP, INDUA SS, PGHN SW, IPRV LN, MSE FP — nothing new in the window.** Carried: Wendel dividend €2.55 payable Nov 19; Genting Berhad Q3 probably late November (unconfirmed). Genting Singapore H1 net profit was −34% (The Edge Singapore).

Group 3 — Small/mid-cap & special situations

- **DNP 7912 JP — date correction.** The Nov 6 brief carried Nov 6 (from one aggregator). Kabuyoho shows the interim release as **Nov 13, unreleased as of Nov 9** (Kabuyoho). Treat the Nov 6 date as wrong.
- **LIO LN — probably MATTERS (positive), date unverified.** 3Q26 dividend GEL 3.25 (+22.6% y/y) and a further GEL 62M buyback; shares reported up 5.8% to 12,810p, date unclear (AJ Bell, DirectorsTalk). Check the RNS for the actual date.
- **BUKA IJ — QUIET.** Q3 net loss Rp885.9B; Emtek-linked KMK raised its stake to 45.68% (Kontan, Kabarbursa).
- **DDL US — QUIET, binary.** SAMR accepted the Meituan deal for review, rivals are complaining, long-stop Feb 2027, US$75M reverse termination fee (IONA).

- **NAK US — QUIET, binary.** Pebble summary-judgment ruling (Judge Gleason) pending; could land any day (Mining News North).
- **GPH CN / GPH-WA — QUIET.** Warrants listed as GPH.WT.A (about 20.0M, C$2.25, 36 months from Mar 2026) (Trading-Treff), which supports the Feb/Mar 2029 expiry; confirm series. Q3 financials about Nov 13 (unconfirmed).
- **DIDIY — date unresolved.** Nov 12 (Earnings Whispers, doubtful) versus late November (last year Nov 26).
- **3445 JP, 7911 JP, 6425 JP — Q3/H1 about Nov 12–14**, inferred from prior-year patterns. **VZLA:** first silver targeted H2 2027. **CDZI, IPX LN, JUP LN, SMH LN, SIL, SLV:** nothing dated in the window; silver COMEX Dec was about $52–53 on Nov 5 (secondary).
- **EP059897 Pfd — UNRESOLVED.** Owner to supply issuer/ISIN.

Group 4 — Futures / macro hedges

- **Expired or unidentified:** see §4.
- **Equities:** closes in §1. **Rates:** see §1; HYG/IEF, 30-year not found.
- **Oil:** latest verified settles are Nov 2 (Brent $104.77, WTI $96.46, about −7.5% on Iran diplomacy; Emol) and WTI $96.09 on Nov 3 (The Star). **The Nov 6 brief's "WTI $89.10" figure conflicts with these; unreconciled.** No Nov 6 or 9 settles found.
- **Gold:** fell on Friday's payrolls; no level found. **Copper, uranium, FTSE 100:** nothing.
- **Week in context:** Nov 2–3 Apple/Palantir prints, Kospi −3.6%; Nov 5 US −4.4%/−5.5%; Nov 6 jobs surprise, bounce, Kospi −6.0%; Nov 9 Kospi −0.8% with foreign selling. Swing factor: AI-regulation and capex risk against a Fed that markets now see hiking Dec 9.

Group 5 — US large-cap core

- **PLTR — MATTERS.** Q3 revenue +96% to $2.313B with raised guidance, yet a −9.73% day on Nov 5 and eight straight losses, then +3.84% to $160.95 Friday (single low-quality source, unverified); about 24% below the October peak.
- **TPR — MATTERS (positive).** Sales $1,894M (+11% cc), Coach +16%, FY EPS guide raised to $8.25–8.35; shares up more than 8% (Finviz).
- **COST — QUIET.** October sales $24.50B (+12.6%), total comps +11.1% (+7.3% ex gas/FX) (Costco).
- **MAGS, CAT, LLY, IBKR, WMT — no news found.** Assume AI-beta moves for MAGS and CAT (inference). WMT FQ3 date unconfirmed (mid/late November).

---

3. Probably noise

- **Trading Economics Kospi 5,132 (+1.43%).** Contradicts all close reports; stale.
- **Nasdaq Nov 5 "−6.4%" (Nasdaq 100) versus "−5.5%" (Composite).** Different indexes, not a conflict.
- **"S&P −4.4%" snapshots.** That is Thursday's move, not Friday's.
- **ALTI search results for Altimmune and the AAUC "Zijin pending" results.** Stale or mismatched.
- **Intraday Kospi swings (below 5,000 to 5,172.94).** Only the close matters.

Decisions to consider: (1) Hedges: Sep index, Treasury and FTSE futures are expired, so confirm whether Dec contracts are intended; the market is pricing a Dec hike, which helps short-bond hedges and hurts long-duration equity; (2) Korea/AI beta (005930, 000660, SMH, PLTR) ahead of Nvidia Nov 17; (3) BHF: reassess spread and time value around an outside-date extension; (4) EULIF: confirm conversion with the broker; (5) ALTI tonight.

5. Follow-up questions to investigate

1. **Fed/rates:** Where did the 30-year, Ultra Bond, HYG and IEF close Friday, and what does a 76% hike probability do to the Dec duration hedges?
2. **Nvidia:** What is the internal probe in the JoongAng report, and is the earnings date Nov 17?
3. **Korea:** Is foreign selling (₩864.7B Monday) a trend? Are there margin or retail liquidation effects, and has a floor emerged near 5,000?
4. **Oil:** What were Brent and WTI settles Nov 6 and 9? The Nov 6 brief's $89.10 conflicts with the Nov 2–3 settles of about $96.
5. **ALTI:** Did Q3 print, and what are AUM and the loss?
6. **BHF:** Has an outside-date amendment been filed, and is New York's reinsurance issue real?
7. **EULIF/CRML:** Did CRML begin trading Nov 6, and at what price? How is the ADR treated?
8. **ZIM:** Was the revised Hapag-Lloyd/FIMI application filed?
9. **Coty:** What was the share reaction and what bids exist for the mass colour and Brazil businesses?
10. **LIO LN:** What was the actual date of the Q3 release, and the share reaction?
11. **Watchlist hygiene:** What are YBYU6 and EP059897? Is AAUC still the right label?
