EM Portfolio Morning Brief — Wednesday, 11 November 2026

Coverage: full watchlist sweep. The window runs from the Tue 10 Nov Asia close through Wed 11 Nov (Asia and Europe closes; US 10 Nov close).

Data caveat: this run again had search-snippet access only. Most primary hosts could not be fetched, including sec.gov, bcb.gov.br, infomoney, businesskorea, rttnews, advfn and business-standard.

- "QUIET" means we searched and found nothing. It does not mean we verified that nothing happened.
- The **MSCI November review was not yet published** at writing time. It is due after 23:00 CET today, which is ≈05:00 WIB Thu 12 Nov.
- **BBAS3 reports after today's Brazil close.**
- Conflicts between sources are flagged inline.

1. Top of the stack

1. **Hot US CPI resets the dollar and rates backdrop. This is the main driver for the book today.**
   - October CPI came in at **+0.4% m/m** (consensus +0.3%); core was +0.3% (consensus +0.2%). Core services were "ugly" (Briefs, Wolf Street).
   - A December Fed hike is now ≈fully priced. One split has ≈88.8% for 25bp and ≈11.2% for 50bp. Governor Waller reportedly floated **50bp** (Benzinga, Aju).
   - Treasuries:
     - The 10y briefly topped **5%** and closed ≈4.98–4.99%.
     - The 2y rose 17–18bp to ≈4.73%, its biggest one-day jump since April 2025 (Invezz).
     - The S&P 500 fell 0.38% to 7,520.93 (Eurasia Business News).
   - Spillover:
     - **Gold fell ≈2–3% to ≈$4,021–4,053**, silver fell ≈3–4% to ≈$51.3, and LME copper fell 1.3% (Mining.com, SMM).
     - **USD/BRL rose 1.46% to R$5.586**, the real's weakest close in 15+ months (Itabira Online).
   - Book read-through: negative for BLTN/EMGA marks and for the gold/silver miners (EQX, PAAS, AAUC, GORO, VZLA, KTN). A 4.0% y/y CPI figure is circulating but is UNVERIFIED, because BLS said it would skip some 12-month changes after the 2025 shutdown (FXStreet). US PPI is due Fri 13 Nov.
2. **MSCI Indonesia: the decision lands overnight, and yesterday's "unresolved" Standalone item is now confirmed (correction).**
   - MSCI **did launch a consultation on 15 Oct** to reclassify Indonesia from Emerging Market to **Standalone** (MSCI PR, Jakarta Post).
     - Feedback is open to 30 Apr 2027, with a decision by **30 Jun 2027**.
     - Reclassification goes ahead unless governance improves materially.
     - The index freeze stays.
   - Tonight is the constituent review under that freeze. Additions are blocked; **deletions are still possible**:
     - **BRPT:** ≈40% deletion odds per Mirae.

        - **BRMS and UNTR** are also at risk (mediakompeten).
        - BRPT was a top LQ45 loser this morning (Kontan).
    - IHSG closes:
        - 9 Nov: 5,073.77 (+0.46%).
        - 10 Nov: ≈5,125.73 (implied).
        - **11 Nov: 5,115.04 (-0.21%)**, down ≈41.6% YTD (CNBC Indonesia, Katadata).
    - IDR is ≈18,080–18,150.
    - Changes are effective at the 30 Nov close.
    - Exposure: HIDR, BRPT, BBRI, INDF, MEDC, BUKA.
3. **The North Asia tech rebound extends, and TSMC posts a record month.**
    - **TSMC October revenue was NT$586.89bn**, +14.7% m/m and **+59.7% y/y**. Jan–Oct revenue was NT$4,485.6bn (+43.3%) (TSMC 6-K; from search summaries of the filing). That puts Q4 on track against the $52.3–54.3bn guidance.
    - Taiex:
        - 10 Nov: **+2.52% to 42,711.92**; TSMC +2.24% to NT$2,285 (Focus Taiwan).
        - 11 Nov: ≈43,187 (+1.1%), not final.
    - Korea:
        - **KOSPI +2.60% to 5,375.36** and KOSDAQ +5.62% to 705.10 on 11 Nov.
        - Foreigners bought a net ≈~~₩~~655bn. One source has ~~₩~~449bn, probably an intraday figure (Nate/Newsis).
        - **USD/KRW closed at 1,333.6**, its lowest since 27 Oct (FN News).
    - Nikkei: +1.31% to 61,248.59 (Tokenpost).
    - Hong Kong lagged, with the Hang Seng -0.98% to 24,315.92 (details in Greater China below).
    - The post-CPI hawkishness has not dented Asian chips yet. The Bank of Korea hike on 26 Nov is now the consensus base case.
4. **Africa/CEEMEA financials: two strong prints and an MTN–IHS timeline.**
    - **MTN Q3 (9 Nov):**
        - 9M service revenue +17.2% (constant currency) to R176.2bn.
        - EBITDA +22.9% to R86.0bn, margin 47.9%.
        - Nigeria service revenue +19.7%. MTN South Africa service revenue flat.
        - R2.0bn of the R6bn buyback is done (ITWeb, Morningstar/DJ).
        - Management says the **IHS buy-in is "on track" for completion by year-end** (BusinessDay). Still not found: a Tribunal ruling, ICASA approval, or NCC final approval.
    - **TBC Bank 3Q26 (6 Nov):**
        - Record net profit **GEL404m (+10%)**, ROE 23.2%.
        - GEL1.75 dividend.
        - **New GEL50m buyback-and-cancel** to February. Shares rose ≈7% (HL, RNS PDF).
        - This fills yesterday's gap; the AJ Bell snippet we called "undated" was this release.
5. **Brazil and Mexico: a hawkish Copom hold confirmed, BBAS3 tonight, and a Banxico surprise (correction).**
    - **Copom held at 13.75% unanimously on 4 Nov**, ending the easing cycle (O Liberal).
    - The 10 Nov minutes:

    - The Selic is "substantially contractionary".
    - Inflation risks remain to the upside (fiscal, a weaker BRL, the end of the 6x1 work schedule).
    - Activity may slow further (Terra).
  - Markets on 10 Nov: the Ibovespa fell 0.52% to 171,336.99 (Diário do Sudoeste).
  - **BBAS3 Q3 is due after today's close:**
    - Consensus net income runs from ≈R$3.1bn to R$3.7bn; broker forecasts are as low as R$1.8–2.3bn.
    - Agribusiness NPLs are at a record 6.27%.
    - Genial expects the R$18–22bn 2026 guidance to be cut (SpaceMoney, Genial).
  - **Banxico cut 25bp to 6.25% on 5 Nov** in a 3–2 vote and signalled a prolonged hold (Banxico). This resolves yesterday's hold-or-cut conflict.

- Q3 was disclosed 10 Nov after the close:

  - Operating profit **₩108.4bn (-15.3%)**, against KB's ₩128.7bn estimate.
