EM Portfolio Morning Brief — Monday, 2 November 2026

Coverage: full watchlist sweep; weekend since Fri 30 Oct close plus items prior briefs missed. **Data caveat:** page fetches were blocked for most outlets (CNBC, FXStreet, Korea Herald, SEDaily, cnevpost and others), so nearly everything is search-snippet level, not checked against filings. Search coverage of 30 Oct–2 Nov was thin: "QUIET" below means *searched, nothing indexed*, not *verified nothing happened*. Conflicts are flagged inline.

1. Top of the stack

1. **Brazil's post-election rout is real and larger than the 30 Oct brief said — that brief's "correction" was wrong.** Ibovespa closed **-0.75% at 167,921.80 on 30 Oct (5th straight fall)**, **-18.12% on the week, worst since March 2020**; USD/BRL **~R$5.444 (+1.1% on the day), ~+9% on the week, biggest weekly rise since 2008 and the weakest real of 2026**; October: Ibovespa -9.88%, dollar +5.2% (InfoMoney, Bora Investir/B3, Agência Brasil). The 26 Oct Canal Rural prints (Ibovespa **-13.88% to 176,608; dollar +8.21% to R$5.4029**) are consistent with this weekly math (176,608 → 169,186 on 29 Oct per CNN Brasil → 167,922), so the 30 Oct brief's "URL-slug misread" call should be **retracted**. Trigger: Lula's re-election and fiscal-framework fears, economic team undefined (Gazeta do Povo, Times Brasil). B3 reportedly shut 2 Nov (Finados; unverified). **Copom decides Wed 4 Nov** (Selic 13.75%; B3 options ~63% hold vs ~28% 25bp cut as of 26 Oct, Rankia; Focus still had a cut — conflicting). Book impact: BBAS3, B3SA3, XP, MOVI3, LREN3, CYRE3, CVCB3, AGRO3, BLTN (BRL local-currency bond mark-to-market).
2. **Oil: Brent ~$113 at end-October, ~$110 on 2 Nov.** Brent ended October at **$113.43** (Jan contract; +13.6% in the month, 4th straight monthly gain), WTI settled **$104.12** on 30 Oct (FinanceFeeds); Brent fell ~3% to ~$110 on 2 Nov as Iran–Qatar talks continued and OPEC+ held December targets for a third month (FinanceFeeds). This **resolves the earlier $95–$114 conflict** (the lower figures were stale). Next OPEC+ meeting reportedly 29 Nov (2027 framework; CNBC snippet). Winners: PRIO3, Medco, Gran Tierra; costs: Suzuki, Aramex, India (Reliance O2C strong).
3. **US risk-off and a metals flush on 30 Oct.** Nasdaq **-2.86%** on 30 Oct on Fed-hike fears; S&P ~7,580 (-1.8%); US 10y ~4.93%; DXY ~101.9 (Rio Times, snippet). Fed held 3.75–4.00% on 28 Oct with Cook and Hammack dissenting for a hike; Polymarket puts a December hike ~70% (single source). **Gold fell ~3.6% to ~$3,880–3,900, silver ~-6.2% to ~$48.9, COMEX copper ~-1.8% to ~$6.46–6.48/lb** (Trading Economics, SMM) — direction conflicts across some aggregators; treat levels as approximate. **US October jobs report Fri 6 Nov** and **US midterms 3 Nov** are the next macro swing factors. Read-across: PAAS, KTN, VZLA (silver), EQX, GORO, AAUC (gold), FCX, FM, CS, ERO, IVN (copper).
4. **China: October official PMI miss, BYD Q3 miss.** NBS manufacturing PMI **49.3 vs 50.0 expected (Sep 50.1)**, new orders 49.4, non-manufacturing 49.7 (Sep 50.2); NBS cites demand pulled forward before National Day (Xinhua, Newsquawk). **BYD Q3** net profit RMB10.02bn (+28%) vs ~RMB12.08bn expected, revenue RMB221.5bn vs ~240.9bn; exports 550,704 (+137%), domestic ~-12%; 9M profit -4.2% (Newsquawk, The Standard). **BYD October sales not found** (Oct 2025 base 441,706; Sept 2026 was 463,561, domestic -13%, CnEVPost).
5. **Korea whipsaw; Reliance beat; deal clocks ticking.** KOSPI **fell ~16% in October (7th-worst month on record)** (SEDaily), then **+2.24% to 5,859.08 on 2 Nov**; SK hynix +3.8%; USD/KRW 1,343.8 (Korea Times); Oct exports **$115.3bn, +93.7% y/y**, chips $56.4bn (JoongAng). **Reliance Q2 FY27** attributable profit ₹25,548cr (+41% y/y), revenue ₹3.33 lakh cr, O2C EBITDA +68% (secondary source, Upstox) vs ~₹21–22k cr consensus: a large beat. **ReNew** scheme document dated 28 Oct (see below). **Teck/Anglo**: only China SAMR outstanding, reportedly seeking copper-concentrate supply commitments.

Position mechanics needing a decision: (a) **US T-bill 912797SA6 matured 1 Oct 2026** (issued 2 Oct 2025; two fund reports agree; TreasuryDirect not reached) — remove from the book/`watchlist-em.md`; (b) **Brazil exposure into Copom 4 Nov** and BBAS3 results 11 Nov; (c) **RNW** scheme vote — check EDGAR for the court-meeting date and decide on vote/rollover election; (d) **MTN/IHS** completion could land any day; (e) **Indonesia/MSCI** announcement 11 Nov; (f) **US jobs 6 Nov / midterms 3 Nov** for metals and EM FX beta.

Brazil / LatAm

- **Ibovespa/BRL — MATTERS** (Top 1). Q3 calendar into the rout (all from secondary calendars; confirm on RI pages): **LREN3 5 Nov** (Safra); **BBAS3 11 Nov** after close (Money Times); **CYRE3 12 Nov** (Forbes Brasil); **B3SA3 12 Nov** per Rico (Money Times says 13 Nov); **XP 17 Nov** (outside window); **PRIO3** week of 3–6 Nov, day unverified (Money Times). Itaú and BB Seguridade report 3 Nov, Petrobras 10 Nov; Copom minutes 10 Nov.
- **BBAS3 — MATTERS.** BTG expects Q3 net income ~R$1.9bn vs R$3.9bn prior quarter (~-50%) on agribusiness defaults (Economic News Brasil); that source also claims a -29.33% share fall on 26 Oct — **unverified, looks extreme**. Most fiscal- and agri-credit-exposed name in the book.
- **MOVI3 — MATTERS (carry-over).** Fell ~18–19% on 28 Oct despite Q3 profit R$152.1M (+117%) on rates/used-car weakness (SpaceMoney); the BRL/DI move since compounds the funding-cost issue. Nothing new indexed.
- **LREN3, CYRE3, CVCB3 (6 Nov per prior brief), AGRO3, B3SA3, XP, PRIO3** — rate/BRL driven; no company-specific news found. **BLTN** — NAV not found; BRL -9% on the week implies a large local-currency drawdown for a BRL-denominated LTN fund (inference, unverified).
- **Bunge, AMX, GTE, PRX** — not re-searched (no new news indexed); prior-brief status stands (BG Q3 reported with FY adj. EPS guide held $9.25–9.75; AMX Q3 out 20–21 Oct; PRX NOISE). **Gran Tierra Q3 date unverified.** Weak BRL helps BG/PRIO3 USD revenue conversion; note BG's Brazil crush margins.

Korea / Japan

- **Macro:** KOSPI -16% in October, 5,859.08 on 2 Nov (+2.24%; the 30 Oct close is unverified — wraps say the index fell >3% on Friday, implying ~5,731, my arithmetic). BoK held at 3.00% on 22 Oct after July/August hikes; press expects another hike in November, date not found (Kyunghyang); governor name conflicts in sources.
- **SK Inc — MATTERS (not new).** Align Partners' 1.5% stake and 75%-NAV-discount thesis (20 Oct); SK hynix +3.8% on 2 Nov helps via SK Square; value-up plan "later this year", treasury-share cancellation 4 Jan (Korea Times).

Korean Q3 filings are due by 14 Nov, so several will land in-window; dates unconfirmed — check DART.

Greater China / Taiwan / Vietnam

- **BYD, Ping An — MATTERS** (Top 4 / carry-over). Ping An 9M net profit **-27.3% to RMB96.65bn** on investment income, operating profit +8.3% (The Standard); an H1 +36% figure conflicts — check filing. Ping An Bank Q3 profit RMB13.49bn (+0.2%).
- **Daqo — NOISE** (already reported 27 Oct): revenue $194.2M vs $62.7M in Q2 but -21% y/y, weak demand, high inventory (Mercom); net loss figure conflicts ($52.9M vs $73M).
- **JD.com** — Q3 date not announced; last year 13 Nov, so ~12–14 Nov likely (unverified; Singles' Day read-through). **HUYA** — Q3 **17 Nov** (outside window). **MOMO** — likely Dec. **DiDi, Dingdong** — dates unverified (prior estimates ~27 Nov / ~12 Nov). **KWEB LN** — tracks HSTECH (volatile: -2.84% then rebound). **TSMC** — Oct monthly sales typically ~10 Nov (unverified); Taiex close not found.

Middle East / Africa

- **MTN / IHS — pending, possible catalyst.** $8.50/share cash for the ~75% it doesn't own; IHS holders approved 4 Aug (Nairametrics); Nigeria FCCPC conditional approval ~29 Aug with a sell-down of up to 30% of the Nigerian component (Techeconomy); IHS Latam tower sale completed 7 Aug. A Guardian Nigeria headline says "completes" but its body describes the deal as pending (Guardian). **Completion unverified** — nothing newer than late August found.

India / Southeast Asia

- **Reliance — MATTERS (large beat).** See Top 5. Retail net profit ₹2,611cr (-24%); Jio PAT ₹8,387cr (~+14%). Figures not primary-sourced; one post shows ₹29,250cr (probably incl. minorities); I could not date the board meeting. Oil strength supports O2C.
- **ReNew (RNW) — MATTERS, live merger-arb.** Best-and-final **$7.02 cash** from CPP Investments/Sinha consortium (6-K); **scheme document dated 28 Oct** (SC 13E3/A); court meeting needs a majority in number and ≥75% in value of scheme shares voted plus a separate general meeting; rollover election available before the court hearing; effectiveness expected Q1 2027. **Court Meeting date not retrieved** — probably mid/late Nov; read the scheme document.
- **Indonesia — MATTERS via MSCI and rupiah.** IHSG 5,282.31 on 28 Oct (+0.31%), after -1.22% on 26 Oct; IDR ~18,127/$ on 26 Oct (Bisnis). IDX excludes high-shareholding-concentration stocks from IHSG from 2 Nov. MSCI review announcement **11 Nov** (per prior brief). BBRI, BRPT, INDF, MEDC, BUKA, HIDR — no new company news found; Q3 prints for BBRI/INDF/BUKA likely out or imminent (unverified). MEDC and BRPT benefit modestly from oil. **HIDR** carries IDR/index risk.
- **Bank of India, Ayala Land (9M ~10 Nov inferred), GT Capital** — QUIET. **EMGA** — QUIET; BRL (-9% wk) and IDR drag on a local-currency EM bond index. Sensex/Nifty/INR closes for 30 Oct–2 Nov not found.

Metals & mining / US-listed

3. Probably noise

- **BBAS3 "-29% on 26 Oct"** (one blog) — implausibly large; verify before acting.
- **Gold/silver aggregator sign conflicts on 30 Oct** (Bloomberg page shows plus signs) — display error likely; levels are what matter.
- **Guardian Nigeria "MTN completes"** headline — body says pending.
- **Daqo net-loss figure ($52.9M vs $73M)** — reporting discrepancy; the y/y revenue decline is the real story.
- **Caixin/RatingDog PMI, HK 2 Nov close** — not found; don't infer.

4. Time-sensitive / positions watch

5. Follow-up questions to investigate

1. **BBAS3/B3SA3/XP:** what are actual 30 Oct closes and how large is agribusiness NPL exposure into the 11 Nov print? Is the -29% 26 Oct move real?
2. **BLTN / EMGA:** what is the NAV drawdown on the BRL week, and is the BLTN line hedged?
3. **Copom 4 Nov:** hold or cut, and where is the DI curve post-election?
4. **RNW:** court-meeting and general-meeting dates, long-stop date, and rollover-election mechanics from the 28 Oct scheme document.
5. **MTN:** regulatory approvals still outstanding (South Africa?) and expected close date.
6. **Teck:** does MBK-style asset-sale pressure or a concentrate commitment emerge from SAMR, and how does it affect the Anglo exchange ratio?
7. **BYD:** October sales (due ~1 Nov) — domestic trend vs 463,561 in September.
8. **Ping An:** reconcile the -27.3% 9M net profit against H1 +36%; NBV and dividend.
9. **Reliance:** primary-source Q2 numbers; is a Jio listing timetable disclosed?
10. **VEIL/VOF:** current discount and buyback activity; any tender announced?
11. **Korea:** BoK November meeting date; Q3 dates for SK Discovery, LG Corp, LS, Hyosung; SK Inc value-up plan timing.
