EM Portfolio Morning Brief — Thursday, 5 November 2026

Coverage: full watchlist sweep; past 24 hours (4–5 Nov). **Data caveat:** the search index is thin for 4–5 Nov and many hosts (sec.gov, koreatimes-type Korean portals, argaam, kontan, renew.com, cnevpost, foxbusiness) could not be opened. Nearly everything below is search-snippet level, not checked against filings. "QUIET" means *searched, nothing indexed*, not *verified nothing happened*. Conflicts are flagged inline. Asian 5 Nov closes are partial; Europe, Brazil, US and Gulf 5 Nov closes are not in.

1. Top of the stack

1. **Korea: KOSPI reportedly fell 5.28% on 5 Nov to 5,383.80 (-300.00 pts), the lowest since 3 Apr; KOSDAQ -5.11% to 678.41; a sell-side sidecar triggered and foreigners sold more than KRW3tn net** (Nate, LC News; snippet only, the round -300.00 move is worth checking against KRX). USD/KRW closed 1,342.1, barely changed, as dollar weakness offset the outflow (eToday). **Cause not found.** A CNBC summary of 4 Nov says the AI beneficiaries sold off in the US after the midterms and the Nikkei fell more than 4% on AI jitters (TheStreet); a separate MarketScreener page showed the Nikkei only -0.43% over 5 days (stamped 07:25 BST 5 Nov, so pre-close), so the Asia AI-unwind story is not reconciled. Exposure: Samsung C&T, Samsung Life, SK Inc (Samsung Electronics / SK hynix stakes), and the whole Korean sleeve (LG Chem pref, LS, Hyosung, etc.). Two days: 3 Nov -3.59%, 4 Nov +0.62%, 5 Nov -5.28%.
2. **US midterms: Democrats won big; dollar and yields down, oil crashed, gold surged.** Dow +3.03% (+1,569) to 53,356.12, S&P 500 +1.58% to 7,688.62, Nasdaq +1.44% (CNN, CBS). DXY fell to a one-month low of ≈101.2–101.6 (quotes differ), US 10y ≈4.88% from 4.95% (EBC, CNBC). **Brent -8.7% to $94.62, WTI -8.3% to $88.12 on 4 Nov** as the market priced a higher chance of a US–Iran deal after Vance blamed the Iran war for the losses (CNBC, OilPrice); other outlets show Brent $101–106 intraday, so the settle needs terminal confirmation. **Gold +≈3% (COMEX $4,073), silver ≈$52.3 (+5%)** (CNBC, Kitco). **Unresolved:** reports conflict on whether Democrats took only the House or both chambers; verify the Senate. CME FedWatch shows ≈81% for a December hike (Finimize); the Fed held at 3.75–4.00% on 28 Oct with two hawkish dissents. October payrolls tomorrow (consensus +65k, unemployment 4.2%, FinanceFeeds).
3. **Brazil: Copom held the Selic at 13.75%, unanimously, ending five straight 25bp cuts; the tone was hawkish-cautious.** (Metrópoles, Money Times, Suno). Market was split (39 of 75 expected a cut). This resolves yesterday's 13.75/14/14.25% conflict at **13.75%**. Markets still rallied on the US result: **Ibovespa +1.23% to 167,563.47, ending a six-session losing streak; USD/BRL R$5.4518 (-0.64%)** (Metrópoles, CNN Brasil). Statement text and economic-team news not checked at the BCB. Exposure: BLTN, EMGA, BBAS3, MOVI3, LREN3, CYRE3, CVCB3, XP, B3SA3. Next Copom 8–9 Dec.
4. **Pan American Silver cut gold guidance; Albemarle prints strong but guides Q4 down.** PAAS (Q3 on 4 Nov): gold output 167.9koz (vs 183.5koz), gold AISC $2,281/oz (+$584 y/y); **2026 gold guidance cut to 660–680koz** (Jacobina seismicity and a National Mining Agency inspection); silver 6.07Moz, guided to the **low end** of 25–27Moz (Huaron mill-foundation downtime); adjusted EPS $0.69 vs one aggregator consensus $0.93 (stale/unverified); FCF $377m, $300m returned (PAAS release, Goldesel). This contradicts the "Q4-weighted gold" line in earlier briefs. ALB (Q3 on 4 Nov): net sales ≈$1.55–1.6bn (+19%), adjusted EBITDA $646m, Energy Storage realised price $20.02/kg (+94.7% y/y), Specialties EBITDA outlook raised to $350–375m, capex cut to $300–350m, but **Q4 sales and EBITDA guided down sequentially on lower pricing**; adjusted EPS conflicts ($2.58 vs $2.54 consensus per Rallies, $2.15 miss per GuruFocus) (ALB release). Calls today 8:00 / 10:00 ET; share reactions not found.
5. **LG Chem (pref 051915) Q3 out today: OP KRW561.2bn (-17.4% y/y), net loss ≈KRW600bn, petrochemicals -KRW175.6bn.** Revenue KRW15.50tn (+34%, not comparable: LGES's North American production subsidy now sits in revenue); LGES OP KRW756.0bn. Below the KRW613.6bn StockHub forecast; Q4 guide flags Yeosu NCC turnaround downtime (SBS Biz, TF Media, CBCI). Preliminary and unaudited. Ignore the old KRW860bn item.

2. What matters, by region/theme

EM macro thread (dollar/EM FX, China policy, commodities)

- **Dollar / rates:** see Top. The DXY slide to a one-month low is the cleanest tailwind for the EM book; the offsets are a ≈81% priced December hike and tomorrow's payrolls. Next FOMC 8–9 Dec.
- **EM FX:** BRL R$5.4518 (bounce from R$5.487). KRW 1,342.1 (flat). IDR Rp18,156 on 2 Nov (Bisnis); this replaces yesterday's stale ≈17,985 (20 Oct), a ≈1% move weaker since. TRY 49.97 and BIST100 10,961.67 (+1.88%) on 2 Nov (BloombergHT). MXN last 18.2025 on 8 Oct after Banxico minutes opened the door to cuts (N+); this conflicts with yesterday's "on hold at 6.50% since June" framing, so the Banxico stance is unresolved. INR, CNH, ZAR: nothing current.
- **China policy / data:** Hang Seng +1.67% to 23,919.50 and Sensex +0.50% to 77,301.40 on 4 Nov, USD/CNY ≈flat (aggregator snippet, Armstrong). October NBS manufacturing PMI 49.3 (Sept 50.1, consensus 50.0), composite 49.7 (Sept 50.7) (TE, TE; one metal.com headline with the same figure may be an older year's, verify with NBS). RatingDog manufacturing 52.0 (Sept 52.1, consensus 51.6), business sentiment at a nine-month low (investingLive); RatingDog services/composite for October not found (discard the provisional 51.6 / 52.4 carried yesterday). LPR 3.0%, unchanged for 16 months. **New and unverified: US–China tariff truce and the US "50% affiliates" export-control suspension are reported to expire 10 Nov**; no extension news found, a July Mayer Brown note expected an extension, and sources mix 2025/2026 dates (STR, Mayer Brown). Verify the date; this would matter for BYD, KWEB names, Daqo, TSMC.
- **Commodities:** gold ≈$4,073 COMEX (a further snippet at $4,135 on 5 Nov is unverified); silver ≈$52.3; Brent $94.62 settle (conflicts, see Top), WTI $88.12. LME 3M copper fell as much as 1.5% to its lowest since 3 Aug (≈$14,014) then recovered to ≈$14,103 (+0.5%) on lower odds of US copper tariffs under a Democratic Congress and AI-capex worries; no COMEX settle found (Mining.com.au, Business Recorder, Benzinga cautions the tariff may survive). Lithium: levels conflict (ALB realised $20.02/kg vs GFEX 104,740 yuan/t ≈ $15.6k/t on 12 Oct vs ALB's ≈$10/kg scenario); treat all as unverified. OPEC+ held December output at 31.01m bpd on 1 Nov; next meeting 29 Nov (OPEC).

Korea

- **KOSPI / BoK:** see Top. BoK next meets 26 Nov; yesterday's "hike expected" is not confirmed (the only supporting item is an August broker note, KB). Foreigners had already sold more than KRW20tn over about a month to early Oct, concentrated in SK hynix and Samsung Electronics (KB Maeil). KOSPI history is unreconciled across sources (Jul 2026 levels of 6,807 vs 7,400–7,900); treat the drawdown size as unconfirmed.
- **LG Chem pref (051915) — MATTERS:** see Top. **LG Electronics pref (066575) — NOISE:** Q3 prelim OP KRW781.8bn (+13.5%), revenue KRW23.83tn, below consensus; priced since 7 Oct (SBS Biz, RTT). **LG Corp (003550):** QUIET; books equity-method income from LG Electronics; Q3 likely by 14 Nov.
- **Hyosung (004800) — NOISE (newly picked up):** Q3 on 30 Oct: revenue KRW699.3bn (+14.2%), OP KRW175.3bn (+43.9% y/y, -24.3% q/q); Hyosung Heavy OP KRW243.5bn reportedly below consensus, record KRW18.9tn backlog; TNC OP KRW110.2bn (+96%); Chemical net loss KRW19.5bn (CEO Score, Korea Center).
- **Amorepacific (002790) — QUIET (newly picked up):** group Q3 on 29 Oct: revenue KRW1.2073tn (+8.9%), OP KRW130.1bn (+24.7%); operating company 090430 OP KRW115.2bn (+25.4%) but net profit -14.3% on non-operating costs (Korea Times, SBS Biz). Holdings' own filing unverified.
- **Samsung C&T (028260):** Q3 reported 28 Oct; construction OP KRW277.0bn (+149.5%), trading ≈KRW99bn, order target raised to KRW30.1tn; consolidated figure conflicts, so unverified (Sat Economy). Exposed to the Samsung Electronics stake in the 5 Nov selloff. **Samsung Life (032830):** Q3 estimated Thu 12 Nov 16:00 KST (calendar estimate, etfshopping); H1 net profit KRW1.97tn (+35.8%); same mark-to-market risk. **SK Inc (034730):** QUIET; SK Innovation record Q3 OP KRW3.70tn with SK On loss KRW80.5bn (CEO Score); SK hynix buyback to 19 Nov. **LS Corp (006260):** QUIET, Q3 ≈18 Nov (aggregator, low confidence).
- **F&F (383220), Iljin Holdings (015860), SK Discovery (006120), Young Poong (000670):** QUIET (no Q3 dates found; filing deadline 14 Nov, check DART). F&F Q2 context weakly sourced (OP KRW86.5bn, ≈12% below consensus on China).

Greater China / HK / Taiwan / Japan

- **BYD (1211 HK) — October sales found:** NEV sales ≈490,168 (+11% y/y, sixth straight month of growth; Sept +17%): BEV 305,743 (+37%), PHEV down; **overseas 170,194 (more than double y/y, ≈35% of total)**; domestic 319,974 (-≈11% y/y, +13%

m/m). Jan–Oct 3,621,744 vs 3,701,852 a year earlier, still slightly down; this is inconsistent with yesterday's YTD figures (3.08–3.13m through Sept), so treat YTD as unreliable. Passenger 483,125 + commercial 7,043 = 490,168 (Just Auto, CarNewsChina, Notebookcheck). HKEX filing not checked. MATTERS (modestly): export strength offsets a weak domestic market. November sales ≈1 Dec.

- **Ping An (2318):** QUIET. 9M -27.3% stands. Reconciliation of yesterday's open item: H1 net profit RMB92.585bn (Deep News) vs 9M RMB96.645bn implies Q3 of only ≈RMB4bn (my arithmetic, single secondary source); P&C premiums +3.5% in 9M (Reinsurance News). Ignore the 19 Nov ADR earnings-calendar listing.
- **TSMC (2330 TT):** QUIET; October sales ≈10 Nov. Exposed to the AI-spending wobble. **Suzuki (7269 JP):** H1 not yet indexed; 5–6 Nov likely (last year 6 Nov); check TDnet. **Universal Entertainment (6425 JP):** QUIET.
- **JD.com (9618 HK):** Q3 ≈12–13 Nov inferred (last year 13 Nov, Tiger). **HUYA:** Q3 17 Nov (watchlist). **Daqo (DQ) — NOISE:** Q3 reported 27 Oct; revenue ≈$194.2m (vs $62.7m in Q2); net loss $52.9m vs a $73m headline (conflict) (Finviz, Mercom). **QUIET:** 361 Degrees, Bank of East Asia, China BlueChemical, China Dongxiang, DiDi, Dingdong, Hello Group (Q3 dates for DiDi/Dingdong/Hello not found), KWEB (Hang Seng +1.67% on 4 Nov per snippet above).

Brazil / LatAm

- **Macro:** see Top. Itaú Q3 and the 2–3 Nov Focus not found (snippets conflict; unusable). No economic-team appointment found; one preview calls this the first Copom since "Lula's victory".
- **BLTN / EMGA — MATTERS:** a high-for-longer Selic plus a softer USD and lower UST yields; the BRL/DI move helped on 4 Nov (BRL +0.6%). NAVs not found. Economic-team/fiscal risk unresolved.
- **BBAS3:** Q3 confirmed 11 Nov (call 12 Nov per Rankia; release time not stated) (Investalk BB, B3). The "≈29% drawdown" is still not confirmed by a primary source; Q1 2026 profit -53.5% to R$3.4bn is context only (InfoMoney).
- **Gran Tierra (GTE) — MATTERS (new context):** Q3 after the close today, call Fri 6 Nov (MFN). Structural: on 5 Aug GTE agreed to sell its Colombia and Ecuador business to Maurel & Prom for ≈US$1.33bn including debt, approved by holders 9 Oct, ≈US$315m net cash ($250m at close, $65m after 364 days), closing targeted ≈31 Dec pending Colombia/Ecuador approvals; post-close focus Canada and Azerbaijan with a conditional buyback (GTE exhibit, Energy Digital). Lower oil is a headwind to the remaining assets.
- **PRIO3:** QUIET; Brent -8.7% is a headwind, offset by a stronger BRL only if it holds. **LREN3** (Q3 date unconfirmed, Q2 net income R$404.6m flat, financial services -54.9%, Mercado & Consumo), **MOVI3** and **CYRE3** (12 Nov unverified): rate-sensitive, the hold is a mild negative vs cut hopes. **CVCB3** (6 Nov unverified), **B3SA3, XP, AGRO3, AMX:** QUIET. **Hepsiburada (HEPS):** Q3 date not announced (last year announced 31 Oct for 5 Nov). **Bunge (BG):** NOISE; ex-dividend 17 Nov.

Middle East / Africa

- **MTN (MTN SJ) / IHS — completion still unverified.** New and single-source: the merger agreement reportedly has an **outside date of 17 Nov 2026** with automatic 45-day extensions if cash conditions are unmet; closing also needs IHS to complete its Latin American tower/fiber divestitures and a minimum cash balance of $355m (Fintool). Nothing on JSE SENS, 6-K or NYSE delisting found. The Guardian "MTN completes" headline remains contradicted by its own body (Guardian). IHS holders approved 4 Aug (Nairametrics).
- **TBC Bank (TBCG LN) — Q3/9M tomorrow, 6 Nov** (confirmed by 7 Oct RNS). Baseline Q3 2025 net profit GEL368m (ticker.app). Ignore the UzDaily "loss" (Uzbek subsidiary, soums, internally inconsistent).
- **Gulf and South Africa:** no TASI/ADX/DFM closes for 4–5 Nov. An Argaam snippet shows TASI 10,107, lowest in 43 months, but date is ambiguous (likely mid-Oct) (Argaam). **QUIET:** Alpha Dhabi, Aramex (≈12–13 Nov inferred), Emaar, First Abu Dhabi Bank, Saudi National Bank, Yamama Cement, Absa.

Southeast Asia / India

- **Indonesia / MSCI 11 Nov:** no news indexed for 3–5 Nov; IHSG 5,282.31 on 28 Oct is the latest verified close (Bisnis). Kontan (14 Oct, headline only) said the review was expected to hold the status quo and **BRPT was threatened with removal if it**

closed below Rp1,280 during the 19–30 Oct window; whether that triggered is unconfirmed (Kontan). A mid-October IHSG -11.57% intraday to 5,185.10 with the rupiah above 18,000 is single-source and undated. Exposure: BBRI, BRPT, INDF, MEDC, BUKA, HIDR.

- **Philippines / Malaysia / India:** Ayala Land, GT Capital, Genting, Reliance, Bank of India: QUIET. Sensex 77,301.40 (+0.50%) on 4 Nov per snippet above.
- **Vietnam funds: VOF** latest NAV still the 2 Oct estimate, $815m / $6.89 per share / £5.22 (LSE); October NAV ≈10 Nov. **VEIL:** QUIET; only a stale AJ Bell snapshot (NAV ≈889p, price ≈773p, ≈13.4% discount vs 12-month average ≈14.8%, AJ Bell); no current discount.
- **ReNew (RNW) — dates still not retrievable.** Court Meeting, General Meeting and rollover-election deadline are in the 28 Oct scheme document, which could not be opened. Per the company filing, the scheme document goes out within 10 business days after the court order convening the Court Meeting, and the rollover election is made before the court hearing; otherwise holders receive cash (StockTitan, StockTitan). Terms: $7.02 cash, 75% approval threshold. Pull the SC 13E3/A on EDGAR (CIK 1283718).

Metals & mining / US-listed

- **PAAS / ALB:** see Top. **Ivanhoe (IVN):** Q3 financials not indexed; Q3 Kamoa-Kakula copper 76,401t, tracking to the low end of 290–310kt guidance (Deep Dive). **Teck:** SAMR moved the file to the normal procedure and reportedly wants a copper-concentrate supply commitment; Anglo guides to completion by March 2027 (Reporte Minero, MLex); a Democratic Congress lowers US copper-tariff odds, which is mixed for COMEX-premium names.
- **Capstone (CS):** Q3 call 31 Oct: adjusted EBITDA $358.3m (+44%), copper 45,218t, Mantoverde 20,806t at C1 $1.77/lb; Pinto Valley maintenance pushes 2026 toward the low end of guidance (secondary, MarketBeat). **Equinox (EQX):** Q3 production 237,019oz known; full financials Mon 9 Nov after close; net cash $163m post Orla (31 Jul) (Finviz). **Allied Gold (AAUC):** QUIET; Zijin ≈9.2% with hold ending 11 Dec; a Q3 date near 4 Nov (calendar estimate) is unconfirmed and no release was found; an undated "Allied Gold sale"/Stifel headline contradicts the placement-only picture and is unverified.
- **Vizsla (VZLA):** QUIET; standing Panuco security risk (January abduction and deaths, some work paused) with current site status unverified; silver +5% helps sentiment. **QUIET:** Ero Copper, First Quantum (Cobre Panama restart prep), Freeport (Grasberg ≈50% of capacity), Goldgroup (next earnings ≈18 Nov, TipRanks estimate), Kootenay Silver.

3. Probably noise

- **Guardian "MTN completes IHS"** — contradicted by its own body and MTN guidance.
- **UzDaily TBC "loss"** — Uzbek subsidiary in soums.
- **Daqo Q3** — reported 27 Oct; headline numbers conflict, nothing new.
- **LG Electronics pref Q3 miss; Samsung C&T consolidated Q3** — priced / already out.
- **roic.ai "gold 4,131.66, 06-11-2026" item; Radio Algeria Brent $93.10/$90.03; Argaam TASI 10,107 (date ambiguous); FinanceFeeds gold $4,135** — mis-dated or unverifiable.
- **Ping An 19 Nov ADR earnings-calendar listing** — results already out.
- **Bunge** — no news; ex-dividend only.

4. Time-sensitive / positions watch

- **US T-bill (US912797SA68):** CUSIP 912797SA6 matured **1 Oct 2026** (corroborated earlier by Econoday, TradingView, Gabelli and SEI holdings; no new evidence today, TreasuryDirect not reachable). **Decision: remove from the book or roll the proceeds; `watchlist-em.md` row retained with the matured flag.**

- **RNW:** retrieve the Court Meeting / General Meeting / rollover-election deadline from the 28 Oct scheme document (EDGAR 6-K or SC 13E3/A); decide rollover vs cash before the deadline.

5. Follow-up questions to investigate

2. **US midterms:** did Democrats win the Senate as well as the House, and what does that imply for tariffs (copper, China) and the Iran-war path that drove oil -8.7%?
3. **Brent settle:** $94.62 or ≈$101–106? Confirm at the exchange, and the effect on PRIO3, Medco and GTE.
4. **US–China 10 Nov:** does the truce/affiliates-rule suspension expire, and what is the extension status?
5. **Copom:** BCB statement text, forward guidance for 8–9 Dec, DI-curve move, and the economic-team/fiscal outlook for BLTN/EMGA duration.
6. **PAAS:** share reaction and consensus comparison; Jacobina inspection timeline; what does the gold cut do to the Q4 ramp?
7. **ALB:** which adjusted EPS is right ($2.58 beat vs $2.15 miss), and the share reaction to the Q4 sequential decline; which lithium price is the right reference?
8. **MTN/IHS:** is the 17 Nov outside date real, and are the Latin American divestitures and $355m minimum cash on track?
9. **RNW:** scheme-document dates and rollover-election terms.
10. **MSCI Indonesia:** did BRPT breach Rp1,280 in the 19–30 Oct window, and what outcomes are plausible for the freeze?
