GGOF Portfolio Brief — Tuesday, October 27, 2026

Covers Mon Oct 26 through Tue Oct 27 morning. ***Source caveat:*** *web search returned almost nothing dated Oct 26–27 for individual names, and page fetches failed (DNS errors), so nearly everything rests on search-result summaries rather than primary filings. "QUIET" means nothing found in the window, not that nothing happened. Items marked (unverified) rest on one source, a snippet, an undated page or conflicting sources. Every factual claim carries a link.*

1. Top of the stack

SK hynix Q3: the date is Oct 29, which reverses yesterday's brief. Yesterday's brief treated Oct 27 as best-supported on the strength of an Oct 9 Segye Ilbo report. A Maeil Business article dated Oct 19 says Q3 results are scheduled for the 29th (mt.co.kr), and today's search found nothing reported yet. The later, more specific source wins, but neither is the company; confirm on SK hynix IR. FnGuide consensus operating profit is about KRW 77.0tn (Hana KRW 77.9tn, Daishin KRW 78tn); DS Investment is lower at KRW 70tn, citing the won's weakness against the dollar (mt.co.kr). No shareholder-return news found. Read-through for SK Inc., Samsung Electronics, SMH and ALGM.

Wednesday is the pivot: FOMC, then MSFT and GOOGL. The Fed decision is Wed Oct 28; CME FedWatch shows about 90% for a hold, and the watch item is hawkish tightening language from Chair Warsh (CNBC, Kiplinger). Pricing for a December hike conflicts across sources: yesterday's brief cited ~71–80%; a Trading Economics snapshot from about Oct 20 said 94% (stale, source). Treat the level as unverified. Treasuries were flat Monday: 10-year 4.986%, 30-year 5.299%, 2-year 4.716%, and 4.982% / 5.297% on Tuesday (CNBC Oct 26, CNBC Oct 27). Microsoft (call 5:30pm ET) and Alphabet (4:30pm ET) report hours after the decision; Amazon and Intel follow Thursday (StockTitan calendar). That is the whole MAGS/PLTR/hedge book on one evening.

Equities bounced Monday; Anthropic IPO headline (unverified). Dow +0.28% to 52,361.58, S&P 500 +0.70% to 7,676.77, Nasdaq Composite +0.82% to 26,169.38, snapping a two-day slide. The cited driver is enthusiasm over an Anthropic IPO filing, with Citadel Securities warning the AI trade has little margin for error (CNBC, summary only, Stocktwits). I could not open either page; verify the IPO claim before repeating it. Friday's S&P close was 7,623.68 per yesterday's brief, so the day's gain is consistent.

Oil stays near $115, with a political tail. Brent settled $116.72 Friday; Monday's settle is reported at $115.81 (WTI $101.76), though one source shows $109.55, probably a different contract month (unverified). Brent dipped to about $114.50 intraday as Qatari mediators reached Tehran (Conservative Daily News, Discovery Alert). Houthi attacks on Saudi infrastructure continue (investingLive), and Barclays flags a possible US/Israel strike window after the Nov 3 midterms (FinanceFeeds). Supports ENI, TTE and REP; weighs on rates and equities.

Position mechanics: uranium Oct contract, EUR/CRML scheme, Ceconomy. Barchart lists UXV6 (Oct COMEX uranium) first notice and expiry as 10/26/26 (Barchart), which conflicts with yesterday's Oct 28 date; if Barchart is right it has already expired. Verify with CME and your broker today. The EUR–CRML second court hearing was Oct 26 and I again found no outcome (Lawyer Mag covers only the first hearing). See §4.

2. What matters, by group

Group 1 — Rails / shipping / financials

- **CEC GY (Ceconomy) — MATTERS, no new info.** Reuters-sourced reports (anonymous) say JD.com is set to win EU Foreign Subsidies Regulation approval with commitments after improving remedies (Mergermarket, Retail Insight Network). Deadline sources conflict (Oct 2, Oct 23, Nov 4 all appear); Nov 4 remains most plausible but is unverified, so check the Commission FSR page. Austrian FDI approval is the other open item; JD said on Jul 29 all other approvals were done (Yahoo). China's Aug 19 instruction to domestic entities not to assist the EU probe is a residual risk.
- **ZIM US — MATTERS, slow burn (date uncertain).** Reports say Israel's Government Companies Authority stopped processing the Hapag-Lloyd/FIMI application because the revised post-closing proposal missed its deadline, so it must be resubmitted; Calcalist via an aggregator says six of eight Israeli authorities oppose (Seatrade, FreightWaves, Placera/Calcalist). The first two articles are undated in results, so I cannot say whether the stop is new or from September. Shareholders have approved; state approval of the special share is outstanding. Q3 date unannounced; last year's was announced Oct 30 for Nov 20 (Placera), so an announcement could come this week (inference).
- **BHF US — QUIET (live).** Only Delaware, New York and Massachusetts insurance approvals remain; HSR expired, CFIUS finished in June, shareholders approved Feb 12 (Q2 10-Q, Q2 8-K). No report that New York has acted. Dec 6 outside date is from a third-party summary (Panabee), unverified. Q3 ~Nov 6 is a projection (AJ Bell).
- **UNP / NSC — QUIET.** Q3 is out: UNP adjusted EPS $3.53 vs $3.47 estimate; NSC adjusted EPS $3.62, record revenue $3.5bn, adjusted operating ratio worse at 65.4% (Yahoo, Finimize). STB accepted the revised application as complete May 28 (docket FD 36873; railmarket, not fetched). No new STB order found; close targeted 2H 2027. Sector volumes strong: AAR week to Oct 17 carloads and intermodal +8.5% (US Transport News).
- **AAUC CN — QUIET.** Zijin's ~$4bn takeover terminated Jul 29; Zijin agreed to buy ~$295m of shares at C$32.55 (~9.2%), closing was due by Aug 10 but I could not verify it did (Creamer Media, Q2 6-K). Watchlist note is stale. Q3 date not found.
- **ALTI US — QUIET.** Last item Aug 10 Q2 (net loss from continuing ops $31m, flows +$700m, opex −12%, Nancy Curtin interim CEO) (MarketBeat). Q3 likely early/mid Nov (inference).

Group 2 — Luxury / consumer / Korea / autos / energy / alternatives

Real news / live

- **000660 KS (SK hynix) — MATTERS, Oct 29.** See §1.
- **005930 KS (Samsung Electronics) — MATTERS, late Oct.** Preliminary Q3 (Oct 8): operating profit ~KRW 107.4tn on sales ~KRW 195tn; shares fell ~2% that day (Samsung IR, moneycheck). The KRW 90–110tn shareholder-return plan from August has final details due at a late-October board meeting (Malay Mail); watch around the full Q3 release (date conflicting: Oct 29 vs 30 per yesterday's brief).
- **EULIF US / CRML — MATTERS, outcome unverified.** Meeting orders were made Sept 15 and securityholders voted Oct 22 (99.96% approval per yesterday's brief, Kalkine). Ratio floats 0.025–0.045 CRML per EUR share with a US$8 floor and US$16 cap (Stocktwits). I found no report of the Oct 26 second hearing result, effectiveness, or a CRML price. Previously reported timeline (effective Oct 27, record Oct 29, implementation Nov 5, delist Nov 6; StockTitan) is unconfirmed here. An independent expert judged the share scheme unfair on a control basis (Lawyer Mag). The Aug 21 $12.50 CRML call has **expired**.
- **GENT MK (Genting Berhad) — MATTERS (negative).** First-ever renounceable rights issue of ~RM1.25bn (~US$306m) mainly to repay debt; Lim family undertakes ~45%; issue price expected at a 25–30% discount to TERP; Fitch cut to BBB- in September; EGM date and final price not found (asgam, The Star). Shares hit limit-down to RM1.45 on Oct 12 (per yesterday's brief).

- **8TRA GY (Traton) — MATTERS Oct 28.** 9M interim statement due Oct 28. Unit sales already out: Q3 +10% to 78,900, 9M +3% to 230,400, International Motors Q3 +48% (VW Group).
- **ENI IM — already reported (Oct 23).** Q3 adjusted profit EUR 2.8bn, extraordinary dividend EUR 0.46, buyback raised to EUR 3.8bn (Eni release, Sweet Crude Reports). With Brent at ~$115, read-through is positive for **TTE** and **REP**, both reporting Oct 29 per yesterday's brief; one search could not confirm either date (unverified).
- **QCQ6 / copper — QUIET.** No Oct 26 COMEX settle found. Stale reference points only (COMEX ~$6.63/lb Oct 7; record COMEX stocks 711,609t; Farmonaut, weak source). August contract is past delivery.

Quiet names (status lines; no name-specific news found today)

- **373220 KS (LGES)** — NOISE; prelim Q3 operating profit ~KRW 756bn includes KRW 416.9bn of 45X credits; final results Nov 3 (Digital Today). Samsung SDI and SK On report Oct 29 per an aggregator (StockHub).
- **051910 KS (LG Chem)** — NOISE; Meritz Neutral, target cut to KRW 310,000 on weak cathode earnings and LGES stake valuation (date unverified, StockHub).
- **034730 KS (SK Inc), 028260 KS (Samsung C&T)** — QUIET; SK hynix is SK Inc's read-through.
- **VOW GY / P911 GY** — QUIET; Q3 deliveries −14.3% (China −38.5%) per yesterday's brief; VW results date (Oct 29) unverified.
- **ALGM US / 6707 JP** — QUIET; ALGM FQ2 Thu Oct 29 pre-open, guide sales $265–275m, EPS $0.23–0.26 (per yesterday's brief; today's search found nothing new). Sanken H1 early/mid Nov (inference).
- **BVI FP** — QUIET; Q3 reported Oct 21 (organic +6.2%) per yesterday's brief.
- **BX US** — QUIET; Q3 DE $1,715.7m (−9%), dividend record date Nov 2 per yesterday's brief.
- **MC FP / CDI FP / EXO NA / RACE IM / GENS SP / COTY / IPAR US / ITP FP / PUIG SM / PSH LN / PSUS US / NPN SJ / PRX NA / INDUA SS / IPRV LN / MSE FP / MF FP / PGHN SW / 9433 JP / 9432 JP** — QUIET; not individually searched with success, nothing found. Known dates carried from yesterday (unverified today): Ferrari Q3 Nov 3; Inter Parfums Q3 Nov 4; PSH/PSUS portfolio reviews Nov 2; Coty ~Nov 5; KDDI H1 Nov 6.

Group 3 — Small/mid-cap & special situations

- **Gold / silver (SLV, SIL, VZLA, GPH) — MATTERS.** Gold closed Monday ~$4,017 (+0.5%), silver ~$53.8–54.0 (Ausecure, Kitco); BullionVault headlined "Gold Reclaims $4000 … Before Latest Sell-Off" (BullionVault), and gold looks fragile ahead of the Fed (FXStreet). Rio Times headline: gold fund +0.33%, silver fund −0.12% on Oct 26 (headline only; Rio Times). The research agent flagged that these levels sit oddly against a February report of gold at $5,040 and silver at $79.89; yesterday's brief put silver down ~55% from its January record, so the picture is consistent, but check a live quote.
- **GPH CN / GPH-WA CN — MATTERS (status).** One report says the Army Corps moved the project to a full EIS in July 2026; the company says the 2029 startup is not delayed, another report says a year was added (Barchart). This contradicts yesterday's brief (Sept 29 FAST-41 target, possible approval). No Record of Decision found. **Warrants series still unidentified.**
- **NAK US** — QUIET; Pebble EPA-veto ruling still pending after the Jun 25 argument (Börse Express). Binary, undated.
- **LIO LN** — QUIET; 3Q26 results Wed Nov 4 (Directors Talk); H1 profit +17.3%.
- **SMH LN / 3445 JP** — no verified Oct 26 SOX close. One undated page shows SOX at 11,818.9, −4.25% on a session (Investing.com); cannot tie it to Oct 26. Nasdaq's +0.82% Monday suggests no collapse. RS Technologies

QUIET.

- **BUKA IJ** — NOISE; H1 net loss Rp820.7bn, revenue ~Rp4.0tn (+29%) (Databoks); controller stake 45.68% (Kabar Bursa).
- **DDL US** — QUIET; next report est. Nov 19 (unconfirmed, Earnings Whispers). **DIDIY** — QUIET; Q3 timing unknown.
- **JUP LN** — QUIET; GBP30m buyback was due to run to Oct 8, likely finished (Parqet). **IPX LN** — QUIET; last AUM GBP23.3bn at Jun 30 (Quartr), no Sept-quarter update found.
- **CDZI US, VZLA US, 6425 JP, 7912 JP, 7911 JP** — QUIET; nothing found (Cadiz search returned only Spanish "Cádiz" results). Toppan/DNP price levels remain unverified from yesterday.
- **EP059897 Pfd — UNRESOLVED.** Searched again; only unrelated patent/trial hits. Not guessed. Owner to supply ISIN/issuer.

Group 4 — Futures / macro hedges

Dated futures on the watchlist are expired or past delivery (see §4); levels below are cash proxies.

- **NQ / ES** — MATTERS. Monday: S&P 7,676.77, Nasdaq Composite 26,169.38 (see §1). No Nasdaq-100 or Dec futures quotes found.
- **FTSE 100 (Z)** — no Oct 26 close found; last data point 10,485 on Oct 5 (Trading Economics). Unverified.
- **WNU6 / IEF** — MATTERS. 10-year 4.986%, 30-year 5.299% (see §1). No IEF/WNZ6 prices found.
- **UXQ6 / uranium** — see §4: UXV6 expiry conflict. Spot ~$89.6–89.9/lb from a weak secondary source (Farmonaut); no Nov contract data found.
- **HYG** — no spread data found; QUIET / unverified.
- **YBYU6** — still unidentified. ASX 3-year bond futures normally use the YT root, so YBYU6 is probably something else or expired. Owner to clarify.

Week in context. Oct 16 Nasdaq ~−2% on AI-financing worries; Meta beat Oct 21; Oct 22–23 AI selloff with Brent at $113–117 and the 10-year at 5%; Monday Oct 26 a rebound to S&P 7,676.77. The recurring pattern is oil plus a 5% 10-year as headwind and AI capex as trigger; this week stacks the Fed, four megacap prints and the Nov 3 midterms.

Group 5 — US large-cap core

- **CAT US — MATTERS Thu Oct 29** (pre-open; implied move ~±7.8%, StockTitan calendar).
- **LLY US — MATTERS Thu Oct 29** (pre-open, call 10am ET). Consensus EPS has been cut from $9.92 to ~$5.70 (another source says $5.38 vs $7.02 a year ago) because analysts now include acquired-project charges (earnings-watcher); sources conflict, so judge on the underlying figures, not the headline EPS.
- **MAGS US — MATTERS.** Holds MSFT/GOOGL (Wed after close), AMZN (Thu after close), AAPL (Mon Nov 2 per the more specific source) (Blofin). Consensus EPS: MSFT $4.71, GOOGL $2.94, AMZN $2.01; Microsoft guided to ~$190bn 2026 capex.
- **PLTR US — MATTERS, date unconfirmed.** Benzinga lists Nov 2; 24/7 Wall St says Palantir has not confirmed (24/7 Wall St).
- **COST / WMT / TPR / IBKR** — QUIET; no dated news or confirmed earnings dates found (Tapestry ~Nov 5 unconfirmed; Costco next in December; Walmart ~Nov 19 second-hand).

---

3. Probably noise

- **Monday's equity bounce** — a one-day move after a two-day slide; the Anthropic-IPO explanation is single-source and unverified.
- **Conflicting Brent settles ($115.81 vs $109.55)** — a different contract month; the trend is unchanged.
- **Stale December-hike odds (94%)** — an Oct 20 snapshot; don't anchor on it.
- **Samsung prelim Q3 and LGES prelim Q3** — already out and priced; wait for the full numbers.
- **Eni's Q3** — Oct 23 news, already in the price.
- **Aggregator earnings dates** (Apple Oct 29 vs Nov 2) — the more specific source says Nov 2.
- **Bukalapak controller creep to 45.68%** — not a bid.

5. Follow-up questions to investigate

1. **SK hynix:** Confirm Oct 29 on IR. What is the size of the additional shareholder return beyond the KRW 40tn programme, and does the won weakness explain DS Investment's lower KRW 70tn?
2. **EUR/CRML:** Did the WA court approve on Oct 26, and is EUR suspended tonight? What CRML 20-day VWAP sets the ratio?

3. **UXV6:** What is the true expiry (Oct 26 vs 28), and is there a position to roll into November?
4. **Rates:** What is the actual December-hike probability after Wednesday, and how do WNZ6 and IEF behave if Warsh turns hawkish?
5. **Megacap prints:** After Meta's capex raise, do Microsoft (~$190bn) and Alphabet capex guides push MAGS and PLTR? Is the Anthropic IPO story real, and what does it do to the AI complex?
6. **Oil:** Does Brent at $115 with a post-midterm strike risk keep ENI/TTE/REP bid, and is REP's +96% YTD already pricing it?
7. **Ceconomy:** Is Nov 4 the real EC deadline, and has Austria cleared?
8. **ZIM:** When did the GCA stop processing, and has a resubmission been filed?
9. **Graphite One:** Did the Army Corps move to a full EIS, and what does that do to the permit timeline and any funding? Which warrant series is held?
10. **Genting Berhad:** Final rights price, ratio, EGM date; does S&P act on the fallen-angel flag?
11. **Lilly:** What does the Oct 29 print look like excluding acquired-project charges?
12. **Unresolved identifiers:** EP059897 Pfd, YBYU6, GPH-WA series.
