GGOF Portfolio Brief — Monday, November 2, 2026

Covers Fri Oct 30 (after the prior brief) through Mon Nov 2 morning. ***Source caveat:*** *web search is US-only, and WebFetch failed on most hosts (DNS errors), so nearly every claim rests on search-result summaries rather than opened primary filings. Nothing dated Oct 31–Nov 2 turned up for any name, so there are no weekend or Monday-morning futures levels. "QUIET" means nothing found in the window, not that nothing happened. Items marked (unverified) rest on one source, an undated snippet or conflicting sources.*

1. Top of the stack

Friday Oct 30 was a much worse tape than Friday-morning futures implied. The S&P 500 closed 7,580.07 (−1.82%, worst day since June), Nasdaq 25,437.00 (−2.86%, near a three-month low), Dow 51,770.31 (−1.09%) and Russell 2000 2,811.84 (−1.66%) (Reuters via MarketScreener, StockMarketWatch, Oct 30, cross-checked to Is Yatirim). Other sources give Nasdaq −2.48% to −3.5%; I use −2.86% because two independent tallies agree. October: Nasdaq about −5.3% (sources differ, up to −7%), S&P about −0.9%, Dow about +1.7% (Investing.com). For MAGS and the Nasdaq-exposed hedges this is the day that mattered; Apple and Palantir report tonight.

Intel fell about 28.6%, its worst day ever — correcting the "−23% after hours" in Friday's brief. Weak Q4 revenue guidance ($15–16B) and a cash-burn warning outweighed a Q3 beat; roughly $146bn of market value was lost and a global chip rout followed (Investing.com/Reuters, The National, Oct 30). Amazon's close is disputed: one source says it finished about −1.4% (unverified), others say −7% (FXStreet); no official close found. Read-through is negative for SMH, SK hynix, Samsung and ALGM, though no Oct 30 Asia or Europe closes were found.

Bonds rallied hard: the 10-year was about 4.91% in Tokyo trade Friday, down ~37bp in October (largest monthly fall since Dec 2023) (Investing.com/Reuters). That is an early-Asia print, not the US close. Dec 9 hike odds are uncertain: a real-estate blog put them at ~85% after the Oct 28 hold (Norada, Oct 29), versus ~75% in Friday's brief; Friday's bond rally suggests they eased, but no current figure was found. Positive for IEF, negative for the case for short-duration hedges.

Ceconomy (CEC GY): EC foreign-subsidies decision on JD.com due by Wed Nov 4. Reuters-based reports say JD is "set to win" approval after tweaking remedies (logistics/tech access at market prices, fair access for smaller rivals); rivals have criticised the concessions; no decision found this morning (Capital.com/Reuters, Retail Insight Network). A binary-ish date for a merger-arb position.

Pershing Square Holdings Q3 portfolio review is today (Nov 2); Ackman live Q&A on X Tue Nov 3, 10:30am ET (PSH). Contents had not posted when searched. Same day: Pershing Square Inc. Q3. Also today after the close: **Apple and Palantir** (see Group 5); Ferrari Q3 is Tuesday.

Position mechanics: the EULIF/CRML scheme implements **Thu Nov 5** with new CRML shares **Fri Nov 6**. The watchlist's 0.035x ratio is stale (see §4).

2. What matters, by group

Group 1 — Rails / shipping / financials

- **CEC GY — MATTERS.** See §1. Austria and Spain FDI status is still unconfirmed (a German ministry approval is referenced). JD already holds 59.8% (EQS).
- **ZIM US — MATTERS (timeline risk).** Timing of the Israeli halt is now sourced: Calcalist via Maritime Executive says the Government Companies Authority ended review of the original structure on **Sep 29**, leaving room for a revised proposal by

Oct 6; Hapag-Lloyd and FIMI had submitted a revised framework on Sep 24 (weekly Far East route, larger fleet); the $35 cash price was not raised (Maritime Executive, framework). Whether the revision was refiled or the three boards re-approved is not found. Calcalist reportedly sets a Feb 2027 deadline, extendable to Jun 2027 (unverified). An undated report says Maersk is preparing a backup bid (FreshPlaza, unverified). Q3 date not found.

- **UNP / NSC — QUIET.** No new STB news. The Nov 18 deadline for opposition comments, protests and conditions requests (from Friday's brief, Thompson Hine) was not re-verified; it falls outside two weeks. BNSF, CSX and the Teamsters oppose (StreetInsider).
- **BHF US — QUIET.** Delaware, New York and Massachusetts insurance approvals outstanding per the Q2 10-Q; outside date auto-extends to **Dec 6** (10-Q). Q3 date not found (Friday's ~Nov 5–6 is an estimate).
- **AAUC CN — QUIET.** No Q3 date announced; last year Nov 5 (TipRanks).
- **ALTI US — QUIET.** No Q3 date found; last year Nov 12. Q2: revenue $58.0m, loss from continuing ops $30.8m (10-Q).

Group 2 — Luxury / consumer / Korea / autos / energy / alternatives

Live / dated

- **EULIF US / CRML — MATTERS, time-critical.** Implementation Nov 5; new CRML shares trade on Nasdaq Nov 6; share-scheme ratio is the booklet maximum (0.045 CRML per EUR share) because the VWAP was at or below the floor (Finviz, Oct 27). A July amendment issues CRML shares directly rather than through CDIs, so OTC ADR holders depend on their broker/depositary; no ADR-specific notice found — confirm with the broker.
- **PSH LN / PSUS US — MATTERS (today).** See §1.
- **RACE IM — MATTERS (Tue Nov 3).** Q3 call 15:00 CET. Equita expects results in line, lower volumes, supportive price/mix, smaller FX drag; Q3 2025 base: revenue €1,766m, net profit €382m; guidance raised Jul 30 (Finviz, FinanzaOnline).
- **CDI FP / MC FP — MATTERS (old news, now sourced).** Arnault reorganisation: Christian Dior merges with Agache; control would sit in one Euronext-listed holding with 49.76% of LVMH capital and 65.55% of votes; Dior becomes an SCA, requiring an all-cash tender for the ~2.44% the family does not hold. EGM expected by December, offer Q1 2027; price and ratio not found (Luxury Tribune, Option Finance, Oct 7). Which entities merge differs by account (unverified). LVMH Q3: revenue €18.5bn, organic +1%, Fashion & Leather −5% (LVMH).
- **GENT MK / GENS SP — MATTERS (nothing new).** Genting Berhad RM1.25bn rights issue at a 25–30% discount to TERP, Lim-family backed, needs EGM, completion targeted Q1 2027; no EGM date (The Star). Genting Singapore S$1.63bn terms rest on one source (The Edge); unverified.
- **PUIG SM — NOISE.** Stock −2.66% after the Oct 28 Capital Markets Day; rumour that Puig is among possible buyers of Parfums de Marly (~€2bn; unverified) (FashionUnited).
- **MF FP (Wendel) — QUIET, dates.** NAV/share €167.0 at Q3 (Capital.com); Stahl sale to Henkel closed Oct 1 (€1.14bn proceeds); interim dividend €2.55 payable Nov 19; Investor Day Dec 2; Deputy CEO Darmon leaves Nov 30 (MFN).
- **IPAR US / ITP FP — QUIET (catalyst).** Full Q3 results Wed Nov 4 after the US close (per Friday's brief; not re-verified).
- **COTY US — QUIET, date unresolved.** Last year's call was Nov 6; Friday's Nov 4/5/10 candidates remain unconfirmed (Seeking Alpha). FQ1 guide: like-for-like revenue down low-to-mid single digits, gross margin down 50–100bp, no full-year guide while the strategic review continues.
- **051910 KS / 373220 KS — QUIET.** No final Q3 releases found; LGES preliminary (Oct 8): revenue KRW 9.64tn, operating profit KRW 756bn, ~KRW 339bn ex-subsidy (Asiae). Check DART.
- **000660 KS / 005930 KS — MATTERS (stale data).** Latest found is Oct 28: SK hynix +10.89% to KRW 1.49m, Samsung +9.01% to KRW 242,000, Kospi 6,012 (Herald). Oct 30 and Nov 2 sessions not found; expect pressure from the Intel-led chip rout (inference).
- **6707 JP / ALGM US — QUIET.** No new Allegro news; Sanken H1 around Nov 10–12 (inference from last year's Nov 11).
- **VOW GY / P911 GY / 8TRA GY / BVI FP — QUIET.** VW 9M published Oct 29; ~€6bn Porsche goodwill impairment announced Sep 18; no reaction coverage. Traton nothing past Oct 28. Bureau Veritas Q3 revenue €1,569.7m (+10.1%, organic +6.2%), outlook kept (STT).

- **ENI IM / REP SM / TTE FP — QUIET.** Q3 already reported (Eni Oct 23; Repsol, TotalEnergies Oct 29). Eni second dividend tranche payable Nov 25. No oil-equity price reaction found.
- **9433 JP / 9432 JP — QUIET.** H1 dates unconfirmed; roughly Nov 4–6 (inference from last year: KDDI Nov 6, NTT Nov 4).
- **QCQ6 (copper) — EXPIRED.** See §4. No COMEX copper print found in the window.

Status lines: EXO NA, NPN SJ / PRX NA, 028260 KS (Q3 already out Oct 28), INDUA SS, 034730 KS — nothing dated found. IPRV LN, BX US (dividend record date Nov 2, paid Nov 9), PGHN SW — nothing found; IPRV likely fell with risk assets (inference). MSE FP — no Euro Stoxx 50 close for Oct 30 found (latest Oct 26: +0.69%).

Group 3 — Small/mid-cap & special situations

- **SLV / SIL / VZLA — MATTERS (negative).** Gold ~$4,021 (−1.1%), silver ~$52.40 (−3.0%) per an OTC daily table (ISA Bullion); a Reuters summary says silver −6% and gold −3.5% on the session (Investing.com). The two conflict; settles unverified. Silver is ~8% below its Oct 20 level and just above Sucden's $50 year-end call. VZLA: AGM Oct 8 passed all motions; C$4.34 on Oct 23 near the bottom of its 50-day range (Investing News); high silver beta (inference).
- **SMH LN — MATTERS (inference).** Intel's guide and the chip rout are a negative read-through; Thursday's snippet had the SOX 13% off its October high and 21% below its June record (InvestingLive). No Oct 30 SOX close found.
- **LIO LN — QUIET (catalyst).** Q3 / 9M results **Wed Nov 4** (DirectorsTalk). H1 profit GEL 1,203.8m (+17.3%).
- **NAK US — QUIET, binary.** Pebble argued Jun 25 in Alaska federal district court; no ruling found; could come any day (Simply Wall St).
- **DDL US — QUIET, pending.** No SAMR decision; a Mergermarket item (undated) says SAMR accepted the filing amid rival complaints; long-stop Feb 2027; $75M fee if antitrust approval is not obtained (Placera).
- **GPH CN / GPH-WA CN — QUIET, open gap.** FAST-41 permitting decision targeted by end-September; no outcome found (not evidence either way) (Barchart). Warrant series still unverified.
- **BUKA IJ — NOISE.** Q3 already out Oct 26–27: net loss ~Rp886bn (Friday's Rp881bn superseded), adjusted EBITDA +Rp1bn (Kontan).
- **DIDIY US — QUIET.** Q3 date not found; last year Nov 26 (Quartr), so Friday's "~Nov 12" looks early.
- **7912 JP / 7911 JP — QUIET.** Dates unconfirmed; TipRanks lists Toppan Nov 18 (possibly out of sync) (TipRanks). Friday's Nov 13 is unverified.
- **3445 JP, 6425 JP, CDZI, IPX LN, JUP LN** — nothing found; no dated catalysts found (IPX Dec 2 carried over, unverified).
- **EP059897 Pfd — UNRESOLVED.** Not guessed; owner to supply ISIN/issuer.

Group 4 — Futures / macro hedges

All dated futures on the watchlist are expired (§4); levels below are cash or next-contract proxies.

- **NQ / ES — MATTERS.** Cash closes in §1. No weekend or Monday futures levels found.
- **WNU6 / IEF — MATTERS.** 10-year ~4.91% (Tokyo, Friday), −37bp for October. No US close, 2-year, or IEF quote found.
- **HYG — no data found.** Check FRED BAMLH0A0HYM2.
- **Z U6 (FTSE 100)** — no Oct 30 close found.
- **Brent — MATTERS, conflicting.** FinanceFeeds (snippet only) has the Jan contract settling $113.43 Oct 30 after Dec expired at $117.64, October +13.6%; UKMTO reported a tanker hit by limpet-type devices in Hormuz (first such strike since the war began in February); the IRGC claimed mines, US CENTCOM rejected that and said the main route is open (FinanceFeeds). Friday's brief had ~$116 intraday; part of the gap is the contract roll. Unverified. WTI not found.
- **UXQ6 / uranium** — only September month-end: spot $89.63, term $96.50 (Sprott); no October print.
- **YBYU6** — unidentified; "U6" implies September 2026, expired.

Week in context. Oct 22–23 AI selloff with oil at $113–117; Oct 26–28 three up days into a hawkish Fed hold; Oct 29 Alphabet's record drop on capex; Oct 30 Intel −28.6% and a broad tech rout, Nasdaq worst month since March 2025. Bonds are rallying, gold

is back at $4,000, silver is near its year-end target. The swing factor is still whether AI capex earns a return. Ahead: Apple and Palantir tonight, midterms Tue Nov 3, jobs report probably Fri Nov 6 (date unverified), FOMC Dec 9 (minutes Nov 18).

Group 5 — US large-cap core

- **MAGS US — MATTERS.** Per-stock Oct 30 closes for MSFT, META, AMZN, GOOGL, AAPL, NVDA, TSLA not found; with Nasdaq −2.86% the group had a heavy day (inference). Reports (conflicting dates) say Meta fell >8% on a ~$16B one-time tax charge and Microsoft slipped on higher spending (iTiger, Oct 29, unverified). **Apple** reports today after the close: guide $111.7–113.7B revenue, consensus ~$113.3–113.6B and EPS ~$1.98–1.99, iPhone ~$56.4B (S&P Global, MacRumors). Friday's "first call under CEO John Ternus" was not confirmed by these sources.
- **PLTR US — MATTERS (tonight).** Q3 after the close per search summaries (company confirmation not verified). Guide: revenue $2.160–2.164B, adjusted operating income $1.292–1.296B (SEC 8-K); consensus ~$2.17–2.18B revenue, ~$0.41–0.42 adjusted EPS. Stock ~8% below its post-earnings high of $212.94 (247WallSt); expense ramp is the flagged risk (Finviz).
- **TPR US — MATTERS (confirmed catalyst).** FQ1 FY27 Thu **Nov 5** before the open, call 8:00am ET; guide EPS ~$1.55 on revenue ~$1.824B vs $1.38 a year ago (Finviz). Upgrades Friday's "unverified".
- **IBKR US — QUIET (catalyst).** October metrics likely Nov 2–3 (unconfirmed). Base: Oct 2025 DARTs 4.472M, client equity $781.5B (Marketchameleon); y/y DART growth has slowed from 50%+ in 2025 to ~23–27% (August figures conflict).
- **COST US — QUIET (catalyst).** October sales likely Wed Nov 4 or Thu Nov 5 after the close (unconfirmed; prior years Nov 5, 2025 and Nov 6, 2024). Base: Oct 2025 net sales $21.75B, comps +6.6%.
- **CAT / LLY — QUIET.** No new news; Friday's −9% and +6.6% stand. No dated catalysts.
- **WMT US — QUIET.** Next earnings expected ~Nov 19 (unconfirmed); one snippet says October was its best month since 2014 (+13.9%; single source, year unstated).

---

3. Probably noise

- **Samsung C&T, Bukalapak, Interparfums Q3 sales** — all previously reported; already priced.
- **Conflicting Friday figures (Nasdaq −2.5% to −3.5%, Brent $113 vs $116, gold −1% vs −3.5%)** — source and contract-roll differences; use the levels flagged above.
- **Puig / Parfums de Marly rumour** — unsourced, ~€2bn, single outlet.
- **Maersk "backup bid" for ZIM** — undated industry-source item; ignore until dated.
- **Weekend Hormuz mine claims** — contested by CENTCOM; watch for confirmation rather than react to the IRGC statement.

5. Follow-up questions to investigate

1. **ZIM:** was the revised Hapag-Lloyd/FIMI proposal refiled after Oct 6, and have the three boards re-approved? Does the $35 price hold if the Israeli carrier's fleet grows?
2. **CEC GY:** what exactly are the EC remedies, and are the Austria and Spain FDI reviews cleared?
3. **EULIF:** how will the OTC ADR be treated on Nov 5–6 — CRML shares, cash, or something else? Confirm with the broker today.
4. **Chip complex (SMH, 000660 KS, 005930 KS, ALGM, 6707 JP, 3445 JP):** how did Asia and Europe close Oct 30, and what did Intel's guide say about PC and server demand?
5. **Rates:** what are the current Dec 9 hike odds after Friday's bond rally, and what did the US 10-year close at?
6. **Amazon and the MAGS group:** official Oct 30 closes for AMZN, MSFT, META, GOOGL; MAGS NAV.
7. **Futures book:** which contract months does the book now hold? The Aug and Sep contracts are gone and the roll has to be tracked.
8. **Brent:** what was the Jan-contract settle, and did CENTCOM's denial hold over the weekend?
9. **Dior/LVMH:** what is the tender price for the ~2.44% free float, and when is the EGM?
10. **GPH CN:** was FAST-41 permitting granted, delayed or denied?
