EM Portfolio Morning Brief — Monday, 26 October 2026

Coverage: full watchlist sweep; weekend plus Monday Asia session (Fri 23 Oct close → Mon 26 Oct). **Data caveat:** live search was weak again — no page could be opened, so every figure comes from search summaries. "QUIET" means *nothing found*, not *verified nothing*. Items where sources conflict or that are unconfirmed are flagged. Monday closes for Brazil, DXY, UST and EM FX were not found.

1. Top of the stack

1. **Brazil: Lula won the Sunday runoff (~51.8% vs 48.2%) and Brazil assets are being hit — Bolsonaro reportedly refuses to concede.** Lula beat Flávio Bolsonaro by roughly 4.3m votes; Bolsonaro says he will seek annulment (NPR, CNBC). Friday's final polls had Bolsonaro marginally ahead, so Asia called it "unexpected": Tokyo-listed Brazil ETF -13–15%, US ETF down as much as ~19.6%, USD/BRL futures up ~10% to R$5.51–5.56 in Chicago (Bloomberg Línea, XTB). Reference: Friday close Ibovespa 205,082, USD/BRL 4.993 (InfoMoney). **Monday cash closes not found** — overnight moves are indicative. Direct hit: BBAS3, B3SA3, XP, CYRE3, LREN3, CVCB3, MOVI3, AGRO3, PRIO3, BLTN, Bunge. Lula takes office 5 Jan 2027.
2. **Oil at six-month highs; Gulf risk elevated.** Brent settled **$116.72 on Fri 23 Oct (+3.1%, highest since 29 Apr)**, WTI $103.27 (FinanceFeeds); Brent eased ~2% Monday on "lack of escalation" over the weekend (XTB). **Saudi Tadawul fell 2.65% to 9,438.50 on Sun 25 Oct** (348 decliners vs 30 advancers) (Arab News); Dubai -1.4% and Abu Dhabi -1.2% on Friday, the Gulf index's 8th straight weekly loss (Business Recorder, date loosely sourced). Drivers: Houthi attacks on Saudi energy/airport sites, stalled US–Iran talks. **Correction to Friday's brief:** the Aramco Dhahran incident is confirmed but was a missile strike on an office tower on 13 Oct (limited fire), not a staff evacuation (ARY); no confirmed Hormuz incident found. Hits SNB, FAB, Emaar, Alpha Dhabi, Aramex; supports PRIO3, GTE, MEDC.
3. **Gran Tierra (GTE): this is now an asset-sale story.** On 4 Aug GTE agreed to sell its Colombia and Ecuador business to Maurel & Prom at $1.33bn EV; M&P assumes the 2029 and 2031 notes, GTE redeems its 7.75% 2027 notes pre-close, ~$315m net proceeds / ~$250m cash at close, targeted ~31 Dec 2026 subject to shareholder, creditor and regulatory approvals (BOE Report, SEC). Friday's brief didn't capture this. Whether the October amortization was paid is still unconfirmed; Q3 date not announced (30 Oct is last year's pattern).
4. **Korea: KOSPI -1.46% to 5,469.47 on Monday (Kosdaq -3.26%), foreigners sold ₩6.96tn**, ahead of SK hynix (Wed 28 Oct) and Samsung Electronics (Thu 29 Oct) Q3 results (Korea Times, Asiae). Friday close was 5,550.30 (+0.30%); KRW 1,324.6 → 1,323.1. Samsung C&T (+1.04%) and Samsung Life (+0.41%) rose against the tape. SK hynix is reportedly ~50% off its June peak (Sedaily) — NAV pressure for SK Inc.
5. **FOMC Wed 28 Oct, Fed in a hiking cycle.** Target range reported at **3.75–4.00%** (since 16 Sep; moderately verified) with ~90% hold / ~9% hike priced for October and a December hike ~87% priced as of 20 Oct (Admiral Markets, CNBC minutes). Gold lost 4.1% last week and closed below $4,000 on a spot basis for the first time since July (Rio Times). Resolves Friday's conflicting policy-rate flag.

Position mechanics needing a decision: (a) US T-bill 912797SA6x — almost certainly **matured 1 Oct 2026**; confirm and remove/roll; (b) **RNW** take-private bid is now **$7.02** best-and-final (not $6.75); (c) **GTE** — asset-sale approvals and note treatment; (d) **MTN–IHS** still pending, not completed; (e) **Brazil exposure** into 4 Nov Copom.

2. What matters, by region/theme

- **Indonesia/MSCI — correction to Friday's brief:** MSCI's consultation (opened 15 Oct) to reclassify Indonesia to standalone runs to 30 Apr 2027 with a decision on or before 30 Jun 2027; **there is no decision at the November review**, and an index-change freeze applies meanwhile (MSCI). Bank Indonesia held 5.75% for a 4th meeting and is intervening (FXStreet).
- **Brazil rates:** Selic 13.75% after a 25bp cut on 16 Sep (5th straight) (Economic News Brasil); next Copom 3–4 Nov (decision 4 Nov), then 8–9 Dec. Goldman's extreme scenario (real -10%, +200bp) is a scenario, not an outcome.
- **Philippines:** BSP 22 Oct outcome **not found** (prior rate 5.00%; StanChart expected a hike to 5.25%, FXStreet). Check bsp.gov.ph. OPEC+ next meets 1 Nov.

- **Young Poong (000670) — MATTERS.** Seoul court dismissed Young Poong's derivative suit over Korea Zinc's 2024 buyback on 22 Oct; Young Poong/MBK to appeal (Sedaily). Must sell down up to 30% of IHS Nigeria. The Guardian "completes" headline is unreliable. Resolves Friday's open item. SA local elections 4 Nov.

Metals & mining / US-listed

- **Teck (TECK) — MATTERS.** Q3 before open **Thu 29 Oct**, webcast 11am ET (Finviz). No news 23–26 Oct.
- **Freeport (FCX) — MATTERS; date flag.** Friday's brief had Q3 on 27 Oct; this run's calendars list 23 Oct / 18 Nov (look like stale copies) and no results release was found. **Date unverified — check investors.fcx.com.** Q3 operating update (2 Oct): ~830M lb copper, ~230koz gold, ~60koz gold slipped to Q4; Grasberg mill ~67% of pre-incident rate (SEC).

3. Probably noise

- **AMX Q3** — out 20 Oct, modest miss; stale for this week.
- **Samsung C&T/Life Monday gains** — relative strength on a -1.5% tape, ahead of Samsung Electronics; not a signal yet.
- **Amorepacific broker Q3 estimates** — they refer to 090430, not the 002790 holding; ~10% broker spread.
- **Absa–Thunes partnership**, **Emaar Syria investment talk**, **China Q3 data** (already digested).
- **One Brent print of $109.5 on Monday** — inconsistent with $116.72 Friday; likely a stale quote.

- **Bolsonaro annulment talk** — headline risk for now; no legal path reported.
