Coupang, Inc. (NYSE: CPNG): data provenance

Every connector call, raw data file, calculation and data cut-off behind the research pack

12 October 2026

1. Scope and rules applied

Item	What was used
Data sources	S&P Global Capital IQ through the *S&P - Deterministic Retrieval* connector, and ProntoNLP through the *Pronto* connector. Nothing else.
Web fetches	**None.** The session and agent transcripts contain no WebFetch or WebSearch calls (checked across all six transcripts).
SQL	**None.** No database queries were written or run.
User-supplied material	The Sanken Electric IC memo PDF, used only as a layout template. The *Asian Century Stocks* newsletter text (11-Oct-2026) pasted into the chat, treated as claims to verify, not as data (report section 27).
Other network use	React 18.3.1, ReactDOM 18.3.1 and htm 3.1.1 were downloaded from the npm registry to render the dashboard locally for checking; probes of cdnjs and jsDelivr were refused by the proxy. One GitHub call checked the target repository's visibility. The published dashboard loads those libraries from cdnjs/jsDelivr and its fonts from Google Fonts. None of these carry research data.
Analyst knowledge	A few board biographies are marked [u] (unverified) because the proxy statement is not in the connectors. They are context only.
Symbols	‡ = figure returned without a source link ("source link unavailable"); [d] = derived from cited inputs; [e] = analyst estimate; [u] = unverified.

2. Deliverables covered

File	Description	SHA-256 (first 16)
`Coupang_CPNG_Research_Report.pdf`	Research report (PDF, 28 pages)	`b709377ded5c8425`
`Coupang_CPNG_Research_Report.docx`	Research report (Word)	`2fc1ee6a74d9ba4d`
`Coupang_CPNG_IC_Memo.pdf`	Investment committee memo (15 slides)	`98da7a4e4da469bd`
`Coupang_CPNG_Dashboard.html`	Interactive dashboard, standalone copy (repo file `Coupang_CPNG_Dashboard.html`); the same page is published privately on claude.ai	`bbb4287ad03a1bdb`
`Coupang_CPNG_Data_Provenance.pdf` / `.md`	This document	n.a.
`mcp_call_log.csv`	Machine-readable call log: arguments, result size and SHA-256 of each returned payload	n.a.

Dashboard link (private to the owner until shared): https://claude.ai/artifact/MTptuuQt9Fd6zH14nXyEYL

3. Connector calls

379 calls between 2026-10-12 04:24:16 and 2026-10-12 04:42:40 UTC on 12-Oct-2026: **82 to S&P Capital IQ** and **297 to ProntoNLP**. 2 returned errors. Appendix A lists every call; `mcp_call_log.csv` holds the full arguments and a SHA-256 of each returned payload.

By workstream

Workstream	Scope	Output	S&P	ProntoNLP	Total
Lead	Lead analyst session: identification, core financials, peers, prices, consensus, deals	`report, model`	37	26	63
A	Earnings, segments, data incident, guidance, call sentiment	`notes/A_earnings_segments.md`	0	44	44
B	Stock-move attribution, event history, strategy, M&A, capital return	`notes/B_catalysts_history.md`	7	91	98
C	Governance, management, ownership, insiders	`notes/C_governance_ownership.md`	6	45	51
D	Capital structure, liquidity, forensic accounting	`notes/D_capital_accounting.md`	32	41	73
E	Supply chain, competition, markets, regulation, M&A	`notes/E_supplychain_competition.md`	0	50	50
Total			**82**	**297**	**379**

By tool

Connector	Tool	Calls	What it returned
ProntoNLP	`searchSentences`	181	Cited sentences from filings and transcripts
ProntoNLP	`getSentenceContext`	33	Sentences around a cited sentence
ProntoNLP	`readDocuments`	26	Full transcript or filing text
ProntoNLP	`getStockPrices`	22	Daily, weekly or quarterly price bars
ProntoNLP	`getCompanies`	11	Company resolution (CPNG id 704377650)
ProntoNLP	`getDocuments`	8	Document lists with sentiment scores
ProntoNLP	`getAnalytics`	6	Event and topic analytics per call
ProntoNLP	`getCompanyPeers`	4	Peer and competitor relations
ProntoNLP	`getCompanyConsensus`	3	Quarterly consensus vs actuals
ProntoNLP	`getFilterOptions`	2	Valid filter values

Connector	Tool	Calls	What it returned
ProntoNLP	`getSpeakers`	1	Executives and analysts on calls
S&P Capital IQ	`get_financial_line_item_from_identifiers`	64	Line items (revenue, EBITDA, EBIT, net income, net debt, shares, CFO, capex) by period, with doc-viewer links
S&P Capital IQ	`get_financial_statement_from_identifiers`	11	Full income statement, balance sheet and cash flow by period (statement-level links only)
S&P Capital IQ	`get_info_from_identifiers`	5	Company identity: CIQ id, ticker, industry, employees
S&P Capital IQ	`get_latest`	1	Latest available fiscal periods
S&P Capital IQ	`get_history_metadata_from_identifiers`	1	Listing and identifier history

Calls that returned errors

- #175 `searchSentences` (E): MCP server “Pronto” tool “searchSentences” timed out after 60s
- #177 `searchSentences` (E): MCP server “Pronto” tool “searchSentences” timed out after 60s

Large results saved to file by the harness: 14 `readDocuments` results (full transcripts and filings) exceeded the inline limit. They were read in parts by the agents and are retained in the session’s tool-results folder; their payload hashes are in the call log.

4. Data freshness

Dataset	Coverage and cut-off	Source
Coupang annual financials	FY2021-FY2025 (FY2025 10-K filed 26-Feb-2026)	S&P Capital IQ (FY2025 statements)
Coupang quarterly financials	3Q24-2Q26 (10-Q for the quarter to 30-Jun-2026)	S&P Capital IQ (Q2 2026 statements)
S&P ‘latest period’ check	Latest annual 2025; current date 2026-10-12 (call #3)	S&P Capital IQ
Peer financials	LTM to Jun-2026 (Walmart Jul-2026); FY2021-FY2025 history for the core peers	S&P Capital IQ
Share prices	Weekly closes 8-Mar-2021 to the week of 5-Oct-2026; reference close US$15.82 on 9-Oct-2026 ‡	ProntoNLP price series
Earnings calls	Q4 2023 to Q2 2026; latest 4-Aug-2026. Next call listed for 3-Nov-2026	ProntoNLP (S&P transcripts)
SEC filings	To the Q2 2026 10-Q (4-Aug-2026) and 8-Ks through Aug-2026; no proxy, S-1, 13D/G or Form 4 indexed	ProntoNLP
Consensus	Quarterly to 2Q26. 3Q26/4Q26 entries carry an effective date of 6-Mar-2025 (stale) and were not used; EPS returned scaled x1e6 ‡	ProntoNLP getCompanyConsensus
Sentiment scores	Per-call document sentiment and event counts, Q4 2023 to Q2 2026	ProntoNLP getDocuments / getAnalytics

The report carries 672 source links in total.

6. Raw data and working files

These files hold the data as returned by the connectors and the intermediate results. They are kept with the session and supplied privately. They are **not** committed to the public GitHub repository, because they reproduce licensed S&P Capital IQ and ProntoNLP content. The SHA-256 values let you check any copy against this record.

File	Contents	Calls	Size	SHA-256 (first 16)

Code used for calculations (committed to the repository under `research/CPNG/code/`):

- `model.py`: EPS model FY2026E-FY2028E, three scenarios (SHA-256 `35d72bd1ce86932c`)
- `valuation.py`: Scenario valuation and probability weighting (SHA-256 `f98086271ec21b05`)
- `raw/peers.py`: EV and multiples (SHA-256 `40cbd2214c597b85`)
- `raw/peers2.py`: FCF yield, peer medians (SHA-256 `9d61ff9a4b031c5a`)
- `raw/hist_rel.py`: Own-history multiples (SHA-256 `c434afda09cfbb8b`)
- `charts_a.py`: Regression, annual, quarterly and history charts (SHA-256 `aa85ef18e81ffb79`)
- `charts_b.py`: Sentiment and price charts (SHA-256 `04b8a55567dc5eaa`)
- `charts_c.py`: Segment, margin and scenario charts (SHA-256 `f23d6fdf280d964c`)
- `charts_d.py`: EBITDA bridge (SHA-256 `84a32f5796e675f3`)
- `prov/extract.py`: Call-log extraction from the session transcripts (SHA-256 `d35fc0b7263458aa`)

7. Calculations

7.1 Valuation multiples (report section 13)

- **EV** = share price × S&P weighted-average diluted shares (latest quarter) + S&P net debt including leases, in each company's reporting currency.
- **Coupang:** US$15.82 × 1,799m = US$28,460m market cap; less US$477m net cash including leases = **EV US$27,983m** [d]. LTM revenue US$35,462m gives **EV/Sales 0.79x**.

- **EV/EBITDA, EV/EBIT, P/E, net debt/EBITDA**: LTM S&P EBITDA, operating income and net income; shown as n.m. when the denominator is negative.
- **FCF yield** = (LTM CFO − LTM capex) / market cap, S&P line items (calls #378-379).
- **FX:** Chinese ADRs translated at CNY 7.10/US$ and HKD 7.80/US$ [e] (no FX series in the connectors). US$ market caps for KRW, JPY, EUR and PLN reporters use the FX implied by ProntoNLP's US$ vs local market-cap fields [d]: KRW 1,356, JPY 157.6, EUR 0.878, PLN 3.84 per US$.
- **Peer medians** (15 listed peers, Coupang excluded): EV/Sales 1.29x, EV/EBITDA 9.4x, EV/EBIT 24.2x, P/E 25.6x, EBITDA margin 9.7%, EBIT margin 5.6%, sales growth 10.9%, FCF yield 8.6%.

7.2 Regression (report section 13.3)

Ordinary least squares of LTM EV/Sales on LTM EBIT margin (%) across 14 listed peers, Coupang and Jumia excluded: **EV/Sales = 0.623 + 0.1116 × EBIT margin**, R^2 = 0.307. Implied values: 0.43x at Coupang's LTM -1.7%, 0.78x at its FY2025 1.4%, and 0.92x at our FY2028E base-case margin.

7.3 Own history (report section 13.2)

Year-end EV/Sales = (year-end close × S&P diluted shares + S&P net debt) / S&P annual revenue, for Coupang and six core peers (Amazon, MercadoLibre, Sea, NAVER, E-MART, Lotte Shopping). Year-end closes are ProntoNLP quarterly bars ‡.

7.4 EPS model, FY2026E-FY2028E (report section 11)

Revenue is built by segment: Product Commerce (PC) and Developing Offerings (DO). Adjusted EBITDA = PC revenue × PC margin + DO adjusted EBITDA. GAAP EBIT = adjusted EBITDA − D&A − SBC + one-offs. Net income = EBIT + net interest and other − tax; EPS = net income / diluted shares.

- **FY2026E** = H1'26 actuals plus a Q3/Q4 build. Q3E revenue US$9,640m: PC +6.5% cc less 5pts FX, DO +20%, margin 4.5% − 330bp (guide: −300 to −400bp). Q4E revenue US$9,685m at a 3.1% margin. One-offs: US$410m PIPC fines and ~US$150m Incheon fire [e]. Output: revenue US$36,686m, adjusted EBITDA US$608m, GAAP EBIT US$-1,117m, net income US$-1,195m, EPS US$-0.67 (adjusted US$-0.37).

Assumption [e]	Bear FY27 / FY28	Base FY27 / FY28	Bull FY27 / FY28
PC revenue growth (flat FX, so US$ = constant currency)	+5.5% / +5.5%	+11% / +10%	+14% / +13%
DO revenue growth	+12% / +10%	+18% / +18%	+22% / +20%
PC adj. EBITDA margin	5.8% / 6.2%	7.3% / 8.6%	8.0% / 10.0%
DO adj. EBITDA (US$m)	-900 / -850	-800 / -600	-750 / -450
D&A / SBC (US$m)	680, 580 / 760, 620	680, 580 / 780, 620	680, 580 / 790, 630
One-offs (US$m)	-150 / -100	+100 / 0	+100 / 0
Effective tax rate	80% / 70% (tax floor US$150m)	55% / 40%	50% / 33%
Diluted shares (m)	1,800 / 1,810	1,790 / 1,795	1,785 / 1,790
Revenue (US$m)	39,092 / 41,543	41,139 / 45,817	42,300 / 48,309
Adj. EBITDA (US$m)	979 / 1,269	1,689 / 2,625	2,051 / 3,506
GAAP EPS (US$)	-0.31 / -0.20	0.14 / 0.42	0.26 / 0.79

7.5 Scenario valuation (report section 22; `valuation.py`)

Per share = (multiple × NTM sales − net debt incl. leases) / FY2028E diluted shares. NTM sales at Oct-2027 = 0.25 × FY2027E + 0.75 × FY2028E revenue.

	NTM sales (US$m)	Multiple	EV (US$m)	Net debt (US$m)	Shares (m)	Per share	vs US$15.82	EV / FY28E adj. EBITDA	Weight
Bear	40,930	0.45x	18,419	+1,200	1,810	US$9.51	-39.9%	14.5x	25%
Base	44,648	0.85x	37,951	+300	1,795	US$20.98	+32.6%	14.5x	50%
Bull	46,806	1.20x	56,168	-500	1,790	US$31.66	+100.1%	16.0x	25%
Probability-weighted						**US$20.78**	**+31.4%**		

Displayed values round to US$9.5 / US$21.0 / US$31.7 and US$20.8. The 12-month target of US$21 is the base case.

7.6 Adjusted EBITDA bridge, FY2026E to FY2028E base case (`charts_d.py`)

Start US$608m. PC margin recovery = (FY28E PC margin 8.6% − FY26E PC margin 5.2%) × FY26E PC revenue = **+US$1,058m**. PC volume growth = (FY28E − FY26E PC revenue) × 8.6% = **+US$584m**. DO loss reduction = −US$600m − (−US$975m) = **+US$375m**. End US$2,625m. FY26E PC margin = (FY26E adjusted EBITDA + US$975m DO loss, the guide mid-point) / FY26E PC revenue.

7.7 Takeover value (report section 14.2)

Control value = 1.0-1.3x LTM sales (US$35.5bn) plus US$0.48bn net cash, divided by 1,799m diluted shares = **US$20.0-25.9 a share** [d]. A 30-40% premium to US$15.82 gives US$20.6-22.1. Precedent multiples are target EV / LTM sales at announcement from S&P target financials (calls #362-368) and acquirer filings via ProntoNLP [d].

7.8 Other derived figures

- **LTM figures** = sum of the last four reported quarters (S&P), e.g. LTM adjusted EBITDA US$872m = 413 + 267 + 29 + 163.

- **Net cash** = cash US$6,110m − funded debt US$2,603m (US$1,985m short-term + US$618m long-term) = US$3.5bn ex-leases; less US$3,030m operating leases = US$0.48bn, matching S&P net debt of −US$477m.
- **Cash conversion cycle** = DSO + DIO − DPO on year-end S&P balances (receivables / revenue, inventory / COGS and payables / COGS, × 365): −42, −64, −54, −57 days for FY2022-FY2025. FY2025: 3.8 + 33.8 − 94.2 days.
- **Cumulative Korean fines** = US$121m (KFTC, 2024) + US$410m (PIPC, 2026) = US$531m.
- **Negative-event share** = negative / (positive + negative) ProntoNLP event counts per call.
- **Moves of more than 10%** = week-on-week or day-on-day changes in the ProntoNLP price series ‡, attributed to dated company documents where one exists; otherwise marked [u].

8. Known gaps and quality notes

- **Source link unavailable (‡):** ProntoNLP price bars and consensus values carry no document link; S&P statement-level calls return statement links rather than line links for some periods.
- **Not in the connectors:** the 2026 proxy (executive pay, top-10 holders, director biographies and committees), 13F/13D/13G and Form 4 filings, short interest and short-seller reports, FX rates, and some Korean deal values. These are flagged in the report rather than estimated.
- **Unverified newsletter claims:** Korean e-commerce share (~28%), the KRW 7,890 WOW fee and the 10km coverage target could not be confirmed in S&P or ProntoNLP; see report section 27.
- **Consensus:** EPS values returned scaled ×1e6, and the 3Q26/4Q26 entries are stale (Mar-2025); no FY2027-28 consensus was available. Forward estimates are ours alone.
- **QA corrections made on 12-Oct-2026 before release:** LTM adjusted EBITDA set to US$872m and EV/adjusted EBITDA multiples recomputed; drawdown from the high corrected to 61%; the bull-case value standardised to the FY2028E share basis used for the other scenarios (US$31.7, +100%; probability-weighted US$20.8, +31%).

Appendix A. Full connector call log

Times are UTC on 12-Oct-2026. Workstreams: Lead = lead analyst session; A-E = research agents (section 3). The SHA-256 is of the returned payload as logged.
