EM Portfolio Morning Brief — Tuesday, 10 November 2026

Coverage: full watchlist sweep; window Mon 9 Nov through Tue 10 Nov Asia close (since the 9 Nov run). **Data caveat:** this run had search-snippet access only. Most primary hosts (sec.gov, Korea Times, Rio Times, Reuters and others) could not be fetched. "QUIET" means *searched, nothing found*, not *verified nothing happened*. Many market closes for 10 Nov were not yet indexed (US CPI, TSMC October sales, Equinox Q3 financials were **not found**). Conflicts between sources are flagged inline; UNVERIFIED items should not be traded on without a terminal check.

1. Top of the stack

1. **Risk-on reversal on Iran de-escalation; Korea +4.4% after a brutal week.** On Mon 9 Nov Trump said he would hold off on new strikes after Qatar's PM carried an Iranian interim Hormuz proposal; Brent fell nearly 5% to ≈$93.7 and WTI to ≈$86.9, and the S&P 500 rose 2.3%, its best session since April (Invezz, Rio Times). The signals remain mixed: Iran's security chief denies talks and ties Hormuz to sanctions relief and frozen funds; Rubio called the demands "outrageous" (Investinglive); a reported $8bn frozen-funds deal was disputed by Qatar. **KOSPI closed 5,239.13 (+4.39%) on 10 Nov** (high 5,300.92), KOSDAQ 667.61 (+4.48%), and foreigners turned net buyers (≈KRW358.6bn), ending an eight-session selling streak (SED, Korea Times). This follows a 9 Nov close of 5,018.85 (-0.81%) and a ≈11.7% fall in the prior week (SED). **Nikkei +2.87% to 60,459.58**, SoftBank +13% (Nikkei). Fragile: one geopolitical headline reverses it.
2. **MSCI Indonesia decision tomorrow (Wed 11 Nov, effective 1 Dec).** MSCI said in June it would "consider a range of options" for Indonesia if progress was insufficient by November (NST). Brokers expect status quo (freeze kept), with deletion risk at **BRPT (≈40% per one Mirae analyst)** and BRMS (Kontan). **Unresolved conflict:** an rctiplus snippet reports that on 16 Oct MSCI opened a consultation on moving Indonesia to Standalone, with the IHSG closing -11.6% at 5,185 (link); it could not be opened or confirmed, and the same search summary says EM status is intact. IHSG: 3 Nov -3.78% to 4,904.28, 4 Nov 4,919.76, back above 5,000 on 5 Nov (Bisnis, Katadata). 9–10 Nov closes not found. Exposure: BBRI, BRPT, INDF, MEDC, BUKA, HIDR.
3. **China data: record export boom, hot PPI.** October exports **+35.2% y/y to $412.3bn** (chips +137%, autos +37.6%); surplus $105.3bn vs ≈$125.8bn expected; Jan–Oct surplus $1.04tn (AP via ClickOnDetroit). CPI +0.7% y/y (vs 0.8% expected, 0.9% prior; core +0.8%) (investingLive); **PPI +5.7% y/y (vs 5.3% expected), highest since June 2022**, energy- and mining-led, input prices +7.9% (CGTN). Read-through: chip-supply-chain strength supports TSMC; margin squeeze for processors such as China BlueChemical (no company news). Hang Seng 9 Nov 24,448.95 (-0.13%), HS Tech -0.92%, Meituan -6.5% (The Standard); a 10 Nov rally to ≈24,557 (+0.44%) is UNVERIFIED.
4. **Suzuki (7269 JP) H1 FY3/27, reported 10 Nov — mild negative.** Revenue +19.4% to ¥3,419.2bn, operating profit +5.5% to ¥291.6bn (Q2 OP -0.6% to ¥133.6bn); FY operating profit forecast unchanged at ¥540bn, but **pre-tax forecast cut to ¥690bn from ¥720bn** on financial-asset valuation losses; net forecast unchanged ¥420bn; shares reported down (size not found) (MarkLines, RTT). H1 net profit conflicts: ¥253.7bn (+31.6%, TipRanks) vs ¥209.4bn (-4.3%, RTT); the pre-tax cut favours the lower figure. UNRESOLVED.
5. **Brazil: Ibovespa rebound, BBAS3 prints tomorrow.** Ibovespa ≈+2.2% to ≈172,236 on 9 Nov (Rio Times; ad-hoc-news has 171,906.50, +2.02%; a Trading Economics 169,422 snippet looks stale) (Rio Times, ad-hoc-news); USD/BRL 5.5117. **Copom reportedly held at 13.75% on 4 Nov after five 25bp cuts** (aggregator pages only; one still shows 14%; verify at bcb.gov.br) — this conflicts with the previous brief's silence on Copom. **BBAS3 and MOVI3 Q3 on 11 Nov** (BB Investalk); agribusiness delinquency is BBAS3's pressure point.

2. What matters, by region/theme

EM macro thread (dollar/EM FX, China policy, commodities)

- **Dollar / rates:** not refreshed today — **US October CPI (due 10 Nov 8:30 ET) result not found**; the prior brief had ≈80% odds of a December Fed hike after the +165k payrolls. The Monday risk-on tone and falling oil are EM-supportive, but a hot

CPI would reverse that. KRW 1,347.1 on 9 Nov (Korea Times), BRL 5.5117, Banxico FIX 18.7147 (6 Nov, eldolar; sources conflict on whether Banxico held or cut on 5 Nov). IDR, INR, ZAR, CNH: not found. DXY and 10y: not found.

- **China policy:** the Busan truce extension to **10 Jan 2027** was confirmed in the prior brief (Bessent, 23 Sep); today's search found nothing new on APEC Shenzhen (18–19 Nov). Trump also mentioned a Xi/Putin meeting "next week" (Gulf News; date unverified). Next NBS release 8 Dec.
- **Commodities:** Brent ≈$93.7, WTI ≈$86.9 on 9 Nov (Invezz); 10 Nov: oil sliding further on deal hopes (IOL). **Gold, silver and copper closes: not found.** An undated Bloomberg wrap cites a "metals-led rout" (gold -5.2% to $4,638) that cannot be dated and conflicts with the prior brief's ≈$4,100 gold: ignore. Sector context: TSX miners down sharply since late August (gold ≈-16%, silver ≈-30%; PAAS -26% YTD, Capstone -20% YTD) (Fool.ca, 2 Nov). Section 232 copper: 50% on semi-finished products; refined-copper duty proposal (15% from 2027, 30% from 2028) still pending as of the latest found item (CRS).

Korea

- **LG Corp (003550):** Q3 listed for 12 Nov (Quartr, link; no official notice found). **LG Electronics pref (066575):** prelim Q3 revenue ₩23.83tn, OP ₩781.8bn (+13.5%), net ₩708.4bn, plus an extra ₩100bn shareholder return flagged for next year (SBS); QUIET in window. **LG Chem pref (051915):** Q3 (5 Nov) OP KRW561.2bn (-17.4%) per the prior brief; nothing new. **Amorepacific Holdings (002790):** Q3 consolidated group revenue ₩1.2073tn (+8.9%), OP ₩130.1bn (+24.7%) (AP Group); Korea Times figures (₩1.13tn / ₩115.2bn) are the operating company, not Holdings.
- **Samsung C&T, Samsung Life (est. 12–14 Nov), SK Inc, SK Discovery, Young Poong, Iljin Holdings, F&F, Hyosung Corp, LS Corp (est. ≈18 Nov):** QUIET (searched thinly; Samsung Life, SK Discovery, Young Poong and Iljin received no dedicated search this run). Korean Q3 filing deadline 14 Nov. Do not use Hyosung Heavy Industries, LS Electric or LG Energy Solution data for these names.
- **Japan names:** Suzuki, see Top. **Universal Entertainment (6425 JP):** Q3 date unconfirmed (last year 13 Nov 2025); Q1 showed a record net loss on an Okada Manila impairment (Quartr).

An Edge Malaysia item dated 28 Oct (link) was not read.
- **QUIET:** Ping An (2318), Bank of East Asia (23), 361 Degrees, China Dongxiang, China BlueChemical (PPI read-through only), KWEB LN (tracks HS Tech -0.92% on 9 Nov).

Done: IHS holders approved (4 Aug); FCCPC conditional approval ≈24 Aug (sell-down of up to 30% of IHS Nigeria locally) (Nairametrics); NCC approval-in-principle (mid-July); SA Competition Commission recommended approval with conditions (30 Sep). **Tribunal status conflicting:** a TimesLive headline says "nod" but BusinessDay corrected that the Tribunal has not yet determined; ICASA sign-off also needed. MTN guides to 2H26; no hearing date, firm closing date or verified outside date found. The Guardian "MTN completes IHS" headline is noise.
- **TBC Bank (TBCG LN):** 3Q26 results were scheduled 6 Nov; **figures not retrieved**. Baselines: 1Q26 GEL365m, 2Q26 GEL386m (+12% y/y, ROE 23.6%, GEL1.75 dividend), 3Q25 GEL368m (Kalkine). An AJ Bell "record profit, new buyback" snippet is undated and may be 2025.

- **ReNew (RNW) — no new dated news.** $7.02 cash per share (CPPIB/Sinha) via UK scheme; SC 13E-3/A filings show SEC process under way; court-meeting date not set (6-K). An undated Bondblox piece claiming Masdar withdrew and the buyout "collapsed" is almost certainly an earlier-stage event; treat as noise.

Metals & mining / US-listed

- **Equinox (EQX):** Q3 financials were due after the close on 9 Nov but **net income / AISC / EBITDA were not found**; Q3 production 237,019oz, sales 248,484oz, net cash $163m, liquidity $1.2bn; Orla combination closed 31 Jul (Finviz). Many

search hits are Q3 2025 — ignore. Pull the release from SEDAR+.

- **Teck / Anglo:** SAMR is the last outstanding approval, reportedly demanding copper supply commitments (Reporteminero, not opened); Anglo guides to completion by March 2027. No decision. **First Quantum:** Cobre Panamá restart preparations reported in August; $20bn arbitration suspended; Panama decision status for November unconfirmed (Reporteminero); hedges ended 30 Jun, so FM is fully exposed to copper.
- **Allied Gold (AAUC):** NB one research agent surfaced January 2026 Zijin C$44 deal coverage as live. That is stale: the watchlist records the **Zijin takeover terminated 29 Jul 2026** (Zijin holds ≈9.2%); Q3 reported 4 Nov. AAUC remains a listed name.

- **Equinox Q3 2025 figures ($85.6m net income, AISC $1,833)** — prior year.
- **China CPI +0.7%** — marginally soft, immaterial; PPI is the item that matters.
- **Korea Times Amorepacific ₩115.2bn OP** — operating company, not Holdings.
- **AJ Bell TBC "record profit"** — undated, possibly 2025.

5. Follow-up questions to investigate

1. **US CPI (10 Nov):** headline/core vs consensus and the CME December hike probability — the single biggest swing factor for BLTN/EMGA and the Korean/Indonesian sleeve.
2. **MSCI Indonesia:** did MSCI launch a Standalone consultation on 16 Oct (rctiplus) or not? What are BRPT/BRMS Standard-index odds? What did IHSG do on 9–10 Nov?
3. **Korea:** is the 10 Nov +4.4% durable? Exact SK hynix/Samsung Electronics moves and 10 Nov USD/KRW; confirm the BoK 26 Nov date and the hike odds.
4. **Suzuki:** reconcile H1 net profit (¥253.7bn vs ¥209.4bn), the share-price reaction, and the valuation-loss driver behind the pre-tax guidance cut.
5. **Equinox:** Q3 net income, AISC and adjusted EBITDA (released 9 Nov after close).
6. **TSMC:** October sales vs NT$367.47bn base and the share-price reaction.
7. **Copom:** confirm the 4 Nov hold at 13.75% (and the minutes); read-through to BBAS3 (11 Nov), CYRE3, MOVI3.
8. **TBC Bank:** actual 3Q26 net profit/ROE and the Uzbek subsidiary; whether a new buyback was announced.
9. **MTN/IHS:** Tribunal determination date, NCC final approval, any outside date. **RNW:** convening order timing.
10. **Genting:** current Genting Bhd stake in Genting Malaysia and any new offer at the end of the cooling-off period (read the 28 Oct Edge item).
