GGOF Portfolio Brief — Friday, October 23, 2026

Covers news from Oct 22–23, 2026 (Thursday close into Friday), plus the latest material status for names with nothing new. This is the first run since the Aug 9 brief, so several instruments have rolled or expired (flagged in §4). ***Source caveat:*** *the search tool returned mostly summaries, not primary filings. Items marked (unverified) rest on one source, a stale page or conflicting sources; "QUIET" means no news found in the window, not that none exists. Every factual claim carries a link.*

1. Top of the stack

Ceconomy: the EU's foreign-subsidies decision on JD.com is due today. The Commission's in-depth probe (opened May 2026) is reported to run to Oct 23 after the clock was extended for JD's commitments offer (Shopappy, Yahoo/Reuters). An analyst view expects conditional clearance, but that is a prediction and I found no reported outcome. JD holds 59.8% via the offer plus Convergenta's 25.4% (EQS), and JD has said it will delist Ceconomy right after closing (Boerse Express). For a holder at €4.60: clearance means closing and delisting follow quickly; a prohibition or lapsed timetable is the downside tail. Check the EC press corner today.

Risk-off Thursday: AI-capex worries plus $113 Brent. The S&P 500 fell 1.21% to 7,663 and the Nasdaq Composite fell 2.60% to 26,009, its worst day since early June (News Tribune, HDFC Sky). Brent settled at $113.17, up about 4% to a five-month high, on Houthi attacks in Saudi Arabia (Rigzone, The Star). Europe sold off too: STOXX 600 about −1% on Thursday and lower again Friday as Kering slumped (US News, Kitco). The S&P is retesting the Oct 16 close of 7,659 (Meta Trading Club, single source). Your long equity-index hedge book and MAGS take the hit; energy names (TTE, ENI, REP) are the beneficiaries.

Next week is the event cluster. FOMC statement and Warsh press conference Wed Oct 28, 2:00/2:30pm ET, with markets pricing a hold now and a hike in December (FedRateCalc, Trading Economics, pricing ~Oct 20, unverified). The 10-year is near 5.1%, which is a headwind for the Treasury exposure (Ultra bond futures, IEF). The same week brings SK hynix, VW and Repsol (Oct 29), Caterpillar (Oct 29) and big-tech earnings, which carry extra weight after Thursday's AI scare.

European Lithium / Critical Metals: scheme approved by holders, court hearing Monday. EUR holders approved the CRML schemes on Oct 22 at 99.96% of votes cast (Stockhouse). The WA Supreme Court hearing is Oct 26, schemes effective Oct 27, implementation Nov 5, and Nasdaq trading of new CRML shares / ASX delisting Nov 6 (StockTitan, from summaries; confirm on the ASX release). CRML fell about 7% to roughly $6.18 intraday on approval day (247WallSt, not a close). The exchange ratio floats within a cap and collar tied to CRML's 20-day VWAP, and earlier reporting said the maximum ratio applies at current prices (Motley Fool AU). The watchlist's 0.035x stub ratio therefore needs re-checking.

ZIM–Hapag-Lloyd is slipping. Israel's Government Companies Authority ended its review of the original golden-share structure and the process must restart (FreightWaves, Ynet). A revised framework went in late September at an unchanged $35, with full details promised "in coming weeks" (Globes, Container News). Globes now points to mid-2027 rather than end-2026 for closing. The spread is the market's doubt; a holder group above 10% is demanding a new vote if terms change materially.

2. What matters, by group

Group 1 — Rails / shipping / financials

- **Ceconomy (CEC GY) — MATTERS.** See §1. EU FSR decision due today; the Bundeskartellamt cleared in Sept 2025 and German FDI cleared with conditions on Jun 30, 2026 (Slaughter and May). One summary cites a Nov 10 long-stop (unverified).

- **ZIM — MATTERS.** See §1. Shareholders approved the deal Apr 30 with 97.36% (Container News); the merger conditions deadline is reported as Feb 2027, extendable to Jun 2027 (unverified). Q3 results are likely mid/late Nov (date not found).
- **Brighthouse (BHF) — QUIET, but live.** $70 cash from Aquarian; holders approved Feb 12, and HSR, FINRA and CFIUS are done. Remaining are insurance regulators in Delaware, New York and Massachusetts (Q2 10-Q). The outside date auto-extends from Sept 6 to Dec 6 if the deal hasn't closed (extension presumably triggered; unverified). No state approval news found. Any NY DFS approval is the event; Q3 results date not found (last year ~Nov 6).
- **Union Pacific / Norfolk Southern — MATTERS mildly, timeline clear.** Both reported Q3 on Oct 22–23. UNP says it is preparing for a close in 2H 2027 (Motley Fool transcript). The STB lifted abeyance and set a schedule on Aug 18 (WOWT, STB). Next milestone is DOJ/DOT preliminary comments on Dec 3; responses Feb 16, 2027; final briefs May 28, 2027 (one source only; another says a decision as early as Q2 2027, conflicting). Nothing due in the next two weeks.
- **Allied Gold (AAUC CN) — QUIET.** The Zijin Gold takeover (C$44) was terminated Jul 29 and replaced by a ~US$295M Zijin private placement for ~9.2% at C$32.55 (company, Bloomberg). **The watchlist still describes AAUC under the old situation; it is no longer a pending-deal name.** Kurmuk first gold unverified; Q3 date not found (likely early/mid Nov).
- **AlTi Global (ALTI) — QUIET with M&A optionality.** Citywire reported Aug 5 that Franklin Templeton is in talks to buy AlTi (Citywire); no deal announced and nothing newer found. Q3 likely early/mid Nov.

Group 2 — Luxury / consumer / Korea / autos / energy / alternatives

- **LVMH / Christian Dior — MATTERS (negative tone, already out).** Q3 organic growth +1% (Q2 +3%), Fashion & Leather −5% on China, Sephora +8% (LVMH, FashionUnited, Le Soleil/Dior). Thursday's session saw Hermès down 7.3% and Friday Kering slumping (see §1 links), a sector-wide leg down. Dior touched its lowest since 2020 in September (Ideal Investisseur). No catalyst in two weeks.
- **Critical Metals (CRML) and European Lithium (EULIF) — MATTERS.** See §1. The Aug 21 $12.50 call **expired worthless** (CRML was ~$7.07 on Aug 21).
- **Exor (EXO NA) — QUIET.** H1 NAV per share −3.9% vs MSCI World +11.8% (Exor). Ferrari's Nov 3 results are the read-through.
- **Ferrari (RACE IM) — QUIET.** Q3 results are **Nov 3**, not Oct 30 (Finviz).
- **Genting Berhad (GENT MK) / Genting Singapore (GENS SP) — QUIET.** Fitch (Sept 7) said the New York casino commitments are enough for a ratings downgrade (AGBrief); the Genting Malaysia buy-out failed at 73% vs 75% required in Dec 2025 (no later update found). GENS 1Q26 earnings fell 55% (GGRAsia, unverified). Q3 results early/mid Nov.

- **LG Energy Solution (373220 KS) — MATTERS (low quality beat).** Prelim Q3 operating profit KRW 756bn vs ~326bn consensus, but ex-45X credit it was KRW 339bn and ~KRW 400bn was a one-off compensation payment (StockHub). **LG Chem (051910 KS)** — QUIET; Q2 sales $9.9bn, op profit $419m (UPI); Q3 date not found (likely late Oct).
- **Pershing Square Holdings (PSH LN) / PSUS — QUIET.** Both publish quarterly portfolio reviews Nov 2 (StreetInsider). PSH discount ~32–34% at last data (August) (AJ Bell). Citi and BofA cut Pershing Square Inc (the manager) in October; reasons not found.

- **SK hynix (000660 KS) — QUIET today, MATTERS Oct 29.** Q3 results are not out yet; scheduled Oct 29 (single source) against consensus operating profit ~KRW 77tn (Money Today). **SK Inc (034730 KS)** — QUIET, indirect read-through.
- **Samsung C&T (028260 KS) — NOISE.** Won the Yeouido Sibeom reconstruction (~KRW 2.27tn); Samsung Biologics' PolyPeptide close pushed to Dec 31 (StockHub).
- **Industrivärden (INDUA SS) — QUIET.** NAV SEK 517/share at Sept 30 (Placera).
- **Sanken (6707 JP) / Allegro (ALGM) — QUIET.** No October news found; results likely late Oct–early Nov (unconfirmed). Sanken holds ~32.5% of Allegro (Davis Polk). Thursday's tech selloff is the headwind.
- **Volkswagen (VOW) — weak setup, MATTERS Oct 29.** Q3 deliveries −14.3%, China −38.5% (RTTNews); Q3/9M results Oct 29 (VW). **Porsche AG** — QUIET; US Q3 sales fell (Autoevolution). **Traton** — QUIET; VW reportedly plans to cut its stake toward 75%+1 share (TT News, Aug).
- **Bureau Veritas / Wendel — QUIET.** H1 organic +5.0% (Wendel H1 report); Q3 revenue typically late Oct (unconfirmed).
- **IPRV LN / MSE FP — NOISE.** No ETF news. Euro Stoxx 50 level not found; it likely fell roughly 1% or more Thursday (inferred from STOXX 600).
- **Blackstone (BX) — MATTERS, beat/miss unverified.** Q3 reported Oct 22: GAAP net income $1.3bn, inflows $63bn, $1.12 dividend, record date Nov 2 (SEC). I could not find DE/share vs consensus (~$1.31–1.36) or the stock reaction.

Group 3 — Small/mid-cap & special situations

- **Northern Dynasty (NAK) — QUIET, binary pending.** Oral arguments on the EPA Pebble veto were Jun 25; no ruling reported, and the judge said she'd rule "in the near term" (MarketBeat). My follow-up search found nothing newer. A ruling can land any day.
- **Graphite One (GPH CN) — QUIET but needs checking.** FAST-41 permitting for Graphite Creek was targeted for end-Sept and one headline suggests a Sept 29 approval, unconfirmed (Boerse Express). Warrants: Bering Straits warrants (C$1.21) were extended to Sept 17, 2026, with no confirmation of exercise, expiry or a further extension (Barchart); Feb 2026 warrants at C$2.25 with a 36-month term implies ~Feb 2029 expiry (Boerse Express, inferred). I could not identify the "Aug 8, 2026" series; it has passed (§4). A reverse split of up to 10:1 was approved in June.
- **Jupiter (JUP LN) — QUIET; no bid found.** Record AUM £75.9bn at Sept 30, Q3 net inflows £0.7bn (AJ Bell, Investment Week); release date not confirmed.

- **Vizsla Silver (VZLA) — QUIET.** AGM results Oct 9 (Ariva).

- **Silver (SIL, SLV) — no current price found.** Silver was ~$60.90 on Oct 1 (MoneyMagPie) versus a $119.51 record in January (ETV Bharat). Kitco reported precious metals tumbling Thursday despite falling yields (link in §1). Verify live.
- **Bukalapak, RS Technologies, Dai Nippon Printing, TOPPAN, Universal Entertainment, SMH LN — QUIET.** DNP closed ¥2,798 on Oct 16, −12.5% over 3 months (CNYES). SOXX fell 4.1% on Oct 16 (Digrin), so SMH LN likely fell again Thursday (inferred). Japanese Q2 results land in early/mid Nov; Bukalapak's buyback and quarter status are from 2025 sources only (Kontan).
- **EP059897 Pfd — UNRESOLVED.** Exact-match search returned nothing. Owner to supply issuer or ISIN.

Group 4 — Futures / macro hedges

- **S&P / Nasdaq-100:** see §1. The S&P is ~2% below its Oct 6 record of 7,818.93. Nasdaq-100 move not found (likely close to the Composite's −2.6%, unverified). **The watchlist's Sep contracts have expired; the front is Dec 2026 (ESZ6/NQZ6).**
- **FTSE 100:** no October level found (latest ~10,799 on Jul 27 per Upstox, stale). Sep contract expired; front is Dec.
- **Rates:** 10-year ~5.13% (Oct 20) (Trading Economics); the policy rate level is conflicting across sources (verify on federalreserve.gov). Sept payrolls +29k is single-source, unverified. No WNZ6 or IEF quotes found.
- **HYG:** no October spread data found; likely softer on the risk-off (inferred). CoreWeave bond yields above 15% in mid-October coverage (Meta Trading Club, single source).
- **Uranium:** spot ~$89.6–89.9/lb (TradingView, aggregator). The Aug contract has expired; the Oct contract (UXV6) expires Oct 28.

Group 5 — US large-cap core

- **Caterpillar (CAT):** QUIET until Q3 on **Oct 29**, 5:30am CDT (Caterpillar).

- **Eli Lilly:** NOISE; nothing in the window. Retatrutide Phase III wins in July, BLA planned Q1 2027 (Clinical Trials Arena); Q3 date not found.
- **Tapestry (TPR):** QUIET; fiscal Q1 ~Nov 5 (one source; another says Nov 12) (Earnings Whispers).

3. Probably noise

- **Samsung C&T's KRW 2.27tn reconstruction win**: ~5.6% of annual revenue, routine for the contractor.
- **Citi/BofA downgrades of Pershing Square Inc (Oct 9/13)**: they concern the manager, not PSH or PSUS, and the reasons weren't found.
- **IBKR "miss" headlines**: sources disagree on a 2.9% adjusted EPS miss versus in line; the 71% dividend raise and 35% account growth are the story.
- **Costco's strong September comps**: fuel added ~3.8 points, and it is a defensive anyway.
- **"Ceconomy Aktie: Game Over!" headlines** (Boerse Express): content unread; treat as clickbait until the EC decision is confirmed.

- **Any Vizsla security-incident story**: it came from a partly AI-generated article (unverified).

5. Follow-up questions to investigate

1. **Ceconomy:** What did the Commission decide today, and on what conditions? How long to closing, and what is the long-stop?
2. **EUR/CRML:** What is the ratio at the current 20-day VWAP, given the cap and collar? Is the 0.035x on the watchlist still right? Does the WA court grant approval on Monday?
3. **ZIM:** When does Hapag file its full proposal, and would terms change enough to trigger a second shareholder vote? What is the current spread to $35?
4. **Thursday's AI selloff:** Which earnings report triggered it? How are MAGS and PLTR positioned into next week's megacap prints?
5. **Rates:** What are the Dec futures levels for WNZ6 and the 30-year yield? Does a December hike priced in hurt the Treasury exposure more than the equity hedges offset?
6. **Brighthouse:** Has NY DFS ruled or set a timeline? Is the Dec 6 outside date being extended again?
7. **Luxury:** Does Hermès −7.3% and Kering's slump signal a second leg down after LVMH's weak Q3? What does that mean for Dior's discount and Exor's NAV?
8. **Samsung / SK hynix / LGES:** With Samsung at KRW 107tn, is the Oct 29 hynix print already priced in? LGES's beat was mostly 45X and one-offs; what is the run-rate?
9. **Graphite One:** Was the FAST-41 permit granted on Sept 29, and did the Bering Straits warrants expire or get exercised on Sept 17?
10. **Silver and copper:** Where did silver and Dec copper settle Thursday, and what does that do to SIL/SLV, VZLA and GPH?
11. **Unresolved identifiers:** EP059897 Pfd and YBYU6.
12. **Blackstone:** What was DE/share versus consensus, and how did the stock react? This matters for IPRV and Partners Group.
