EM Portfolio Morning Brief — Thursday, 29 October 2026

Coverage: full watchlist sweep; Wed 28 Oct sessions plus early Thu. **Data caveat:** search coverage of 28–29 Oct was thin and page fetches failed for several outlets, so most figures are snippet-level; no terminal prints for DXY, UST yields, copper, silver, Brent, CSI 300, USD/CNH, INR, ZAR or Gulf closes were found. "QUIET" means *nothing found*, not *verified nothing*. Conflicts are flagged inline.

1. Top of the stack

1. **Brazil: third straight loss; Ibovespa -2.68% Wed to 171,006 (lowest since 20 Aug, ~-16.6% on the week); USD/BRL 5.3402.** Prior closes: Mon -13.88% to 176,608 (USD/BRL 5.4029), Tue -0.51% to 175,710 (Agência Brasil, Canal Rural). Fiscal uncertainty is the cited driver; Bolsonaro calls the result "impossible to recognize" and plans to seek annulment (TIKR) — this partly conflicts with yesterday's brief (annulment request reportedly dropped); status unclear. **Copom decision 4 Nov:** Selic 13.75%. Post-election Focus shows year-end Selic 13.25% (i.e. still cuts) (Forbes Brasil), whereas yesterday's brief cited +25bp Dec/+50bp Jan priced from DI — **conflict; neither is a post-shock Copom-specific source. Pause-vs-hike is the key 4 Nov risk.** No source found on the incoming economic team.
2. **FOMC held at 3.75–4.00% (10–2), with both dissenters wanting a hike; December hike is the market base case.** CME ~82–88% for +25bp on 9 Dec; Warsh gave no forward guidance and said inflation is too high (Admiral Markets, investingLive, Fortune). Resolves yesterday's range question (3.75–4.00%). Dissenter names conflict (Cook/Hammack vs a Fortune headline naming Ullrich) — unverified. Hawkish for EM FX/duration (EMGA, BLTN, IDR/PHP/BRL).
3. **Korea: SK hynix and Samsung Electronics Q3 are the day's binary for SK Inc, SK Discovery, LS, Samsung Life/C&T.** Actuals not found. Consensus: SK hynix OP ~₩77tn on ~₩98tn revenue (FnGuide via Newsis); Samsung prelim OP ₩107.4tn on ~₩195tn (Samsung). **Conflict:** KOSPI 5,469.47 on 26 Oct (Matsui, undated) vs yesterday's brief 5,638 on 27 Oct (+3.09%) — Wed close not found.
4. **Young Poong: lost first-instance ruling (22 Oct) in the ₩800bn derivative suit vs Korea Zinc**; on 23 Oct Young Poong/MBK alleged One Asia fund money was used to repay Cheongho Comnet bonds (Kyunghyang). Reasoning and appeal timing unverified. Yesterday's note "MBK option unexercised" is unchanged.
5. **Indonesia/MSCI remains the live risk (BBRI, BRPT, INDF, MEDC, BUKA, HIDR).** BI held at 5.75% for a fourth month (~21 Oct) but raised the deposit facility rate 25bp to 5% and added DNDF incentives; MUFG sees 6.25% by end-2026; IDR back through 18,000; JCI -39%+ YTD; foreign net selling IDR92tn as of 21 Oct (IDN Financials, FXStreet). Regulators proposed excluding concentrated-ownership stocks from benchmarks. BRPT is one of nine Indonesian names left in MSCI Global Standard; Indo Premier rates removal risk "medium" (Investortrust). MSCI November review announcement ~11 Nov (one source; unverified).

Position mechanics needing a decision: (a) **US T-bill 912797SA6 matured 1 Oct 2026** — remove/roll; (b) **Brazil book** (BBAS3, B3SA3, CYRE3, LREN3, MOVI3, XP, BLTN, CVCB3) into 4 Nov Copom; (c) **Anglo–Teck / FM / Capstone** prints today; (d) **Indonesia/MSCI** sizing; (e) **Reliance** board on 30 Oct (Q2 + NCD raise).
