Japan Portfolio Brief — Friday, November 6, 2026

Covers the Nov 5 close through the Nov 6 close (Tokyo and Seoul sessions complete). **Data-quality warning (continuing):** research ran on search snippets only. kabutan, kabuyoho, TDnet, DART, MOF, BoJ, Matsui, tradingeconomics and fnnews could not be fetched (DNS/allow-list blocked), so no primary document was opened. "QUIET/UNVERIFIED" means "nothing found," not "confirmed quiet." Earnings dates are mostly aggregator-sourced. Check TDnet/DART before acting on any single-name call.

---

1. Top of the stack

1. The AI-trade rout becomes a crash: Nikkei -5.96% (third-largest point drop on record), KOSPI -6.02%. The Nikkei closed at **57,434.77 (-3,643.13)**, broke 60,000 right after the open and traded below 57,000 intraday for the first time in about seven months, roughly 20% below its June peak (livedoor, NHK, IBTimes AU, Bloomberg headline). The arithmetic ties to yesterday's 61,077.90 close. At midday 221 of 225 constituents were down, with SoftBank Group -9.3% (Reuters via TradingView). Unlike Nov 5, the selloff was not tech-only: the Topix fell roughly 5.4–5.9% at midday (no exact close found). The trigger was the overnight US move: Nasdaq -5.52% and the SOX more than -12% on Nov 5 on fears of tighter US AI/data-center regulation after the Democratic midterm win (Zaikei). **KOSPI closed at 5,059.65 (-324.11, -6.02%)**, KOSDAQ about 644.3 (-5.0%), foreigners sold about ₩2.8tn, and a circuit breaker triggered intraday before a partial recovery (fnnews, Nate; fnnews not opened, last digits differ by outlet). Two-day KOSPI drawdown is about 11%. Every AI-linked holding (SoftBank, RS Technologies, MegaChips, Sanken, Appier, SK Inc, Samsung C&T, Hyosung/LS) should be assumed sharply lower; no ticker-level closes were found. MATTERS: the largest portfolio-level event of the week.

2. SoftBank Group (9984): China blocks ABB Robotics, then -9% at midday in the rout. ABB said on Nov 5 that China's foreign-investment security review office prohibited the $5.375bn acquisition of ABB Robotics' China business; the FT attributed it to the NDRC, and both sides say they remain in dialogue (Nikkei Asia, investinglive, MLex). Reportedly the second China block of an AI deal this year. Nov 6 close not found. H1 results are around Tue Nov 10 (boerse-global; not re-verified). MATTERS, negative: AI beta, OpenAI valuation and leverage into the print.

3. Sony (6758): guidance raise met a market-wide rout. H1 operating income ¥1.0988tn (+42.9%); FY operating income guide raised to ¥1.87tn from ¥1.72tn, net income guide about ¥1.33tn, and a buyback of up to 16m shares (¥35bn) runs Nov 6–May 10, 2027 (media-ir, Fisco/Yahoo). The stock opened up to ¥4,400 (a year-to-date high), was ¥4,339 (+3.0%) at 9:07, then turned negative (kabutan, gamebiz). Close not found; a claim of a +7% Nov 5 close at ¥4,211 is inconsistent with other prices and is doubtful. MATTERS, positive fundamentals, price dominated by beta.

4. Daikin (6367) and Seiko Epson (6724): raises, mixed reaction. Daikin gapped up ¥22,470 (+4.7%) at 9:07 on a record FY forecast and a dividend of ¥370 (+¥30) (kabutan, Nikkei); close unknown after the afternoon crash. Epson H1 operating profit ¥63.2bn (+102.9%), FY net guide to ¥72bn from ¥69bn (mynavi); one source has the Nov 5 close at ¥2,904 (-5.04%) with PTS ¥3,000 (single-source). Both MATTERS-positive on fundamentals.

5. Korea: LG Chem Q3 data conflict, and KOSPI -6% hits every Korean holding. Yesterday's brief cited LG Chem Q3 operating profit ₩561.2bn on revenue ₩15.496tn; today one source reports revenue ₩14.18tn and operating profit ₩901.2bn, with operating profit ex-LGES down 59.1% (Munhwa). The two sets do not reconcile (possibly different consolidation or a preliminary vs final figure); treat both as unverified and check DART. The LGES PRS sale (6,535,939 shares, about ₩2.5tn) and ₩300bn buyback with cancellation (preferred included) are

re-confirmed by SBS Biz and Bizwatch; the Nov 27–Dec 24 window and Dec 1 buyback start were not independently re-confirmed today. MATTERS.

2. What matters, by theme

Macro, rates, FX

- **BoJ:** policy rate 1.25% per the carried-forward Bloomberg Oct 30 item (held after the September hike); today's search could not re-confirm the level, so treat it as carried-forward. No Ueda or board remarks dated Nov 5–6 found, and no sourced December hike probability (hits were from 2025). A crash of this size raises the bar for a December hike (inference).
- **JGBs:** latest sourced levels are from about Nov 2: 10y 2.77%, 20y 3.63%, 30y 3.875% (TLT News, single-source). Auctions flagged: a 30y on Nov 10 and a 5y on Nov 12. No Nov 5–6 yields, and no 2y/5y found. Risk-off flows suggest lower yields (inference). A centralbank.watch page showing 10y 1.62% conflicts with everything else and is ignored. Sept 2 context: 10y hit 3.02% and the 30y a record 4.18% (Wolf Street), so yields are about 25bp off the highs.
- **Yen:** no Nov 5–6 USD/JPY level found. Last sourced: about 157–158 with Katayama's intervention warnings shrugged off (FXStreet Nov 4). Risk-off typically supports the yen (inference; not observed).
- **Bank of Korea:** base rate 3.00%; next meeting **Nov 25** per the FXStreet calendar; the prevailing view is a hike in November (Kyunghyang Oct 22; Polymarket snapshots conflict, 67% hike vs 49% no change). A 6% equity drop complicates a hike. USD/KRW 1,342.1 at the Nov 5 close (unsourced summary). No Korea market-structure news found beyond the circuit breaker.
- **US:** October payrolls (due today) result not found.

Megacaps / tech (Japan)

- **SoftBank, Sony, Daikin, Seiko Epson:** see Section 1.
- **Keyence (6861):** ADR-implied ¥69,822 (-3.55%) (minkabu); no company news. NOISE (beta). **Canon (7751):** conflicting prices (¥4,645 -4.80% vs ¥4,879 +5.08%, undated), no company news. QUIET.
- **Omron (6645):** H1 Nov 10; Nov 5 price ¥4,947 (-4.44%) (Yahoo JP). QUIET.
- **MegaChips (6875):** H1 listed for Nov 6 on Yahoo JP vs "early November" on kabuyoho; no result found. Highest-beta chip name; check TDnet.
- **Sanken (6707):** H1 Nov 11; Q1 loss of ¥2.1bn, H1 guided to a loss (kabuyoho). **Optex (6914):** Nov 13. **RS Technologies (3445):** Q3 Nov 13 (company IR calendar), now dated. **Appier (4180):** Q3 Nov 13 (prior run). **Oro (3983):** Q3 Nov 16 (prior run). QUIET/UNVERIFIED.
- **Valqua (7995):** Yahoo JP lists Nov 4 results with a raised forecast (Yahoo JP); unconfirmed. **SHIFT (3697):** no November event. **NAVER (035420):** Q3 Nov 11–13 depending on source.

Banks / financials / real estate

- **No stock-specific news found for any bank.** No evidence any of MUFG, Resona, SMTG, Kyoto FG, Fidea, Kita-Nippon, 8524 or Shimizu reported Nov 5–6. Dates (aggregator only): **MUFG** Nov 13 (kabuyoho); **SMTG** Nov 12 (Yahoo JP); **Kita-Nippon** Nov 12; **8524** Nov 13; **Japan Post** Nov 13 (low confidence, kabuyoho). **Resona:** prior run said Nov 10 (aggregator); today's check notes last year's H1 was Nov 19 (Resona) — date now uncertain, Nov 10–19. SMFG/Mizuho (not on the list) expected about Nov 12–14.
- Bank equities likely fell with the Topix, but financials' sensitivity to a risk-off day with lower JGB yields is unobserved (inference).

- **Keisei (9009):** listed for results Nov 6 on Kabutore (labeling muddled); FY guide recurring profit ¥50.5bn (-13.8%). **Mitsui Fudosan (8801):** H1 "early Nov," unconfirmed. **SBI (8473):** reported Nov 2 (see Nov 4 brief). Fidea, Kyoto FG, Shimizu, TOC, Yakult, Shochiku, Tokyotokeiba, Universal Entertainment: UNVERIFIED/QUIET.

Industrials / autos / small-mid caps

- **Suzuki (7269):** H1 possibly today; not found. Q1 pre-tax guide had been raised to ¥720bn from ¥660bn (Monex). Check TDnet; likely MATTERS if released.
- **Nakayama Steel (5408)** (H1 Nov 5 per kabuyoho, Nov 10 per TradingView) and **Ebara Jitsugyo (6328)** (Q3 Nov 5): no results found; UNVERIFIED, check TDnet. Nakayama FY ordinary profit guide ¥2.0bn (-58%); last year's H1 was ¥2.93bn (Monex).
- **Sumitomo Metal Mining (5713):** H1 Nov 10; Q1 ordinary profit ¥118.0bn; FY guide raised in August (¥324bn vs ¥209bn on another view; conflicting) (Monex). **Mitsubishi Materials (5711):** H1 Nov 11; FY ordinary guide shown at ¥180bn (+84.5%) (kabuyoho). **Honda (7267), Subaru (7270):** Nov 10 per prior run (Subaru Nov 9 per MarketBeat — unconfirmed). **Kubota (6326):** Q3 date unknown (about Nov 10–13). The "H1 Aug 4" item found for Kubota is oddly labeled; ignore.
- Hi-Lex, KH Neochem, Obara, Tigers Polymer (Nov 11), Shibaura Machine, Fudo Tetra, JAPEX, Katakura, JR Central: no new information. QUIET/UNVERIFIED.

Korea names

- **Taekwang Industrial (003240): MATTERS, unresolved.** No EGM notice, court filing or tender found. Background: Trustone's July open letter and EGM threat (EKN), Sep 3 EGM card (Ajunews), and a Sep 14 Taekwang criminal complaint (defamation/obstruction) against three people including Trustone's CEOs (Nate, Newstomato). DART unreachable; check for EGM-call permission filings.
- **LG Chem pref / LG Corp:** see Section 1. **LS Corp (006260):** Q3 estimated Nov 3–12 (factstock, estimate).
- **Samsung C&T, SK Inc, Hyosung, Misto (Acushnet Q3 mildly negative), others:** no new news; all assumed lower with KOSPI -6% (no closes found). Q3 filing deadline Nov 14; ILJIN and F&F likely Nov 13–16. SK hynix buyback ends Nov 19 (prior run). Amorepacific, LG Electronics pref, SK Discovery, Daewon Sanup, Eusu, Motonic, Seoul City Gas, Samyang Tongsang, Ubiquoss: UNVERIFIED/QUIET.

3. Probably noise

- **Sony "+7% Nov 5 close at ¥4,211":** inconsistent with other prices; single-source.
- **Canon ¥4,879 +5.08% vs ¥4,645 -4.80%:** undated conflicting snippets.
- **Omron ¥6,097 quote:** conflicts with ¥4,947; ignore.
- **centralbank.watch JGB 10y 1.62%:** stale/wrong.
- **Bernama KOSPI 5,089.14 / KOSDAQ 1,080.77:** undated and inconsistent with other closes; ignore.
- **Seven Bank (8410) +47% FY recurring profit revision (kabutan):** not on the list; single-source.
- **Mitsubishi Corp ¥1tn buyback (Nov 4):** trading house, not MUFG (Zaikei).
- **Keyence ADR move:** market beta.

4. Time-sensitive / positions watch

JGB No. 466 (0.50%, JP1024661QB1) — matured Sun Nov 1; settlement still unverified. Prior runs pointed to a Nagoya SE statistics PDF listing 利付国債2年 第466回 redeeming 2026-11-01, suggesting a **2-year note**; the ISIN-

to-bond mapping remains inferred. No MOF or custodian source found today. **Decisions:** (1) confirm with the custodian that proceeds settled (expected Mon Nov 2); (2) the reinvestment decision is now past due; (3) update `watchlist-japan.md` once redemption is confirmed. The macro backdrop for reinvestment: 10y about 2.77%, a 30y auction Nov 10 and 5y auction Nov 12 (single-source), BoJ at 1.25% (carried forward), and risk-off pushing yields lower.

Portfolio-level: after a two-day, roughly 6% / 6% drawdown in the Nikkei and KOSPI, review concentration in AI-linked names (SoftBank, SK Inc, Samsung C&T, RS Technologies, MegaChips, Sanken, Hyosung/LS) and any margin or collateral mechanics before Monday's open. Fundamentals have not changed in most cases, only the multiple.

*Calendar (= aggregator/inferred/unconfirmed):**

- Nov 6 (done, reactions in the rout): Sony, Daikin, Epson reactions; MegaChips*, Keisei*, Suzuki*; US payrolls
- Nov 9–10: Subaru* (Nov 9?); **SoftBank Group** (Nov 10); Honda; Omron; Sumitomo Metal Mining; JGB 30y auction (Nov 10*); Resona* (Nov 10–19)
- Nov 11: NAVER* (11–13); Sanken; Mitsubishi Materials; Tigers Polymer (16:00)
- Nov 12: SMTG*; Kita-Nippon 8551* (15:00); JGB 5y auction*
- Nov 13: MUFG*; Japan Post*; 8524* (14:00); Appier; Optex; RS Technologies; SMFG/Mizuho (Nov 12–14*)
- By Nov 14: Korea Q3 filings (ILJIN, F&F, LS and others)
- Nov 16: Oro Q3
- Nov 19: SK hynix buyback window ends
- Nov 25: Bank of Korea meeting*
- Nov 27–Dec 24: LGES PRS disposal window*; Dec 1: LG Chem buyback start*

Undated-but-live: SoftBank/OpenAI leverage and ABB reapplication; US AI-regulation headlines after the midterms; Taekwang–Trustone EGM; December BoJ hike; BoK November hike; yen and intervention rhetoric.

Identity/watchlist flags:

1. **8551 vs 8524 — still open for the owner.** 8524 = 北洋銀行 (The North Pacific Bank, Hokkaido); 8551 = 北日本銀行 (The Kita-Nippon Bank, Iwate). Coverage follows 8551. Please confirm which is held. Nothing found on either today.
2. **JGB JP1024661QB1:** matured Nov 1; likely a 2-year note; settlement unverified; keep on the list until the custodian confirms.
3. **Date corrections/uncertainty:** Resona H1 may be as late as Nov 19; RS Technologies Q3 is Nov 13 (company IR); Subaru possibly Nov 9. No other identity changes confirmed.

5. Follow-up questions to investigate

- **JP1024661QB1:** custodian confirmation of settlement; whether it was a 2-year note; reinvestment plan.
- **SoftBank (9984):** exact Nov 6 close and size of the two-day decline; ABB reapplication path; OpenAI valuation and LTV before Nov 10.
- **Sony / Daikin / Epson / MegaChips / Suzuki:** Nov 6 closing reactions; MegaChips and Suzuki results (TDnet).
- **Nakayama Steel, Ebara Jitsugyo, Valqua:** actual results (TDnet).

- **Korea:** ticker-level Nov 5–6 closes for every Korean holding after the circuit-breaker day; whether the BoK can hike on Nov 25 amid an 11% two-day KOSPI drop.
- **LG Chem / LG Corp:** reconcile Q3 (₩561.2bn vs ₩901.2bn operating profit) on DART; confirm PRS terms.
- **Taekwang (003240):** EGM convocation or court filing (DART).
- **Samsung C&T:** consolidated Q3 (₩1.14tn vs about ₩1tn, unresolved from yesterday).
- **Macro:** current JGB curve (2y/5y/10y/30y), USD/JPY level and BoJ December odds after the crash.
- **Access:** about 40 names have no primary-source check. Allowing kabutan.jp, kabuyoho.jp, finance.matsui.co.jp, release.tdnet.info, dart.fss.or.kr, fnnews.com, boj.or.jp and mof.go.jp would close most gaps.
