GGOF Portfolio Brief — Tuesday, November 3, 2026

Covers the past 24 hours (Mon Nov 2 into Tue Nov 3 morning). ***Source caveat:*** *web search is US-only and returns mostly summaries; no primary filings were opened. Almost nothing dated Nov 2–3 surfaced for most names, and no Nov 2 index, yield or commodity closes were found. "QUIET" means nothing found in the window, not that nothing happened. Items marked (unverified) rest on one source, an undated snippet or conflicting sources. The Apple and Palantir details come from search summaries, and some Palantir pages looked like older-quarter stories.*

---

1. Top of the stack

Apple (a MAGS heavyweight) reported FQ4 on Nov 2: modest beat, weak margin guide. Revenue was about $114.5B and profit $30.7B against consensus of about $113.3–113.6B. The December-quarter guide is revenue +7–10% (above the ~6.1% LSEG average) but gross margin of 45–46% versus 47.9%, on memory costs ("unprecedented" pricing per Ternus) and Siri AI costs. Tariff refunds added 5 cents to EPS. CNBC's live blog said the stock dropped on the margin forecast; the after-hours percentage was not found (MacRumors, CNBC live, Nov 2, MacRumors on memory costs). For MAGS this adds to the Oct 30 tech rout; memory-cost pressure is also a read-across for hardware names and a positive for memory makers (SK hynix, Samsung), though that is inference.

Palantir reported Q3 after the close Nov 2: beat and raise, but a bookings flag (unverified). A search summary gives revenue $2.31B (+96% y/y) versus a guide of about $2.16B, adjusted EPS $0.44 versus ~$0.41, US commercial revenue $984M (+148%), a raised FY26 guide, and total contract value closed of $2.918B (+6% y/y versus +49% in Q2). After-hours reaction is conflicting (about −3%, +1.5% or +5%) (TipRanks, Stocktwits). Several of those pages may be older-quarter stories, so check the 8-K before acting.

Ceconomy (CEC GY): EC foreign-subsidies decision on JD.com due by Wed Nov 4, nothing issued yet. Reuters-sourced reports (one anonymous source) say JD is "set to win" approval after strengthening remedies (logistics/tech access at market prices, fair access for smaller rivals); the deadline has reportedly slipped once already (Capital.com/Reuters, Retail Insight Network). A binary-ish date for the merger-arb position. Austria/Spain FDI status unconfirmed.

Pershing Square: Q3 call and live Q&A today. Pershing Square Inc. filed its Q3 GAAP statement on Nov 2: net loss of about $19.9m versus net income of about $155.5m a year earlier, the prior gain largely an HHH unrealized gain (dense table, verify). Call at 9:30am ET, Q&A at 10:30am ET on X (SEC 8-K, exhibit). The filer (CIK 2026053) is probably the PSUS successor entity but that is unverified. PSH's last NAV found ($77.18, Sep 15) is stale.

Position mechanics: EULIF/CRML scheme implements Thu Nov 5, CRML trading Fri Nov 6; the ratio on the watchlist is stale. The fixed 0.035 was replaced by a floating cap-and-collar (0.045 maximum at or below an $8 VWAP floor, 0.025 minimum at or above $16). The VWAP window (Sep 23–Oct 20) sat at or below the floor, so the ratio is 0.045 CRML per EUR share (Taiwan News, Taiwan News, vote). The exact "Nov 5" date carries over from Monday's brief; confirm via ASX announcements and confirm OTC ADR mechanics with the broker. See §4 for expired instruments.

2. What matters, by group

Group 1 — Rails / shipping / financials

- **CEC GY — MATTERS.** See §1.
- **ZIM US — MATTERS (timeline risk), no new news.** The Israeli review of the original structure ended Sep 29; Hapag-Lloyd and FIMI had submitted a revised framework Sep 24 (Maritime Executive). Still unanswered: whether the revision was refiled and the three boards re-approved. The Feb 2027 long-stop (extendable to Jun 2027), the Maersk backup-bid report and the Q3 date are all unverified. Terms: $35 cash, about $4.2bn (FreightWaves).
- **UNP / NSC — QUIET.** In formal STB review after the refiled application was accepted; BNSF and CSX oppose (StreetInsider). Close timing is mid-2027 per one source, early 2027 per Wikipedia (sources differ) (Wikipedia). The Nov 18 opposition-filing deadline is carried from earlier briefs and not re-verified.

- **BHF US — QUIET.** Delaware, New York and Massachusetts insurance approvals outstanding; outside date auto-extends to **Dec 6** (10-Q). Q3 date not announced (~Nov 5–6 is an estimate).
- **AAUC CN — QUIET.** Q3 date not company-confirmed; projected Nov 4 or Nov 5 after the close (Earnings Whispers, The Right Trader).
- **ALTI US — QUIET.** No Q3 date found; last year Nov 12 (BusinessWire). Q2: revenue $58.0m, loss from continuing ops $30.8m (10-Q).

Group 2 — Luxury / consumer / Korea / autos / energy / alternatives

- **RACE IM — MATTERS (catalyst today).** Q3 results today, call 15:00 CET / 9:00am ET; results not yet indexed (Finviz). Q3 2025 base: revenue €1,766m (+7.4%), 3,401 shipments (iTiger). Guidance was raised Jul 30 (per Monday's brief).
- **PSH LN / PSUS US — MATTERS.** See §1.
- **CDI FP / MC FP — QUIET (live structural event).** Financière Agache merges into Agache, then into Christian Dior, which becomes an SCA renamed Agache, holding 49.76% of LVMH capital and 65.55% of votes. Steps due December 2026, then a cash tender offer in Q1 2027 subject to AMF clearance; the tender price is not found (Placera, Option Finance). CDI jumped 17.4% to €428.80 on announcement (FashionUnited).
- **GENT MK / GENS SP — QUIET.** RM1.25bn rights issue, Lim family undertakings cover 45.1%, completion targeted Q1 2027; no EGM date found (The Star). GENS S$1.63bn terms are single-source (The Edge).
- **IPAR US / ITP FP — QUIET, catalyst.** Q3 results Wed Nov 4 after the close, call Thu Nov 5 (time unconfirmed) (Finviz). Q3 sales of about $430m were already reported (Quiver).
- **COTY US — QUIET.** Call date unannounced; last year Nov 6 (MarketBeat). Guide: FQ1 like-for-like revenue down low-to-mid single digits, no full-year guide (Goldesel).
- **000660 KS / 005930 KS — QUIET (volatile).** No Oct 30 or Nov 2 closes found. Latest in hand is Oct 28 (hynix +10.9%, Samsung +9.0%, per Monday's brief); on Jul 13 the Kospi fell 8.95% and hynix 15.4% (Korea JoongAng Daily). Do not treat any level as current. Apple's memory-cost comments are supportive for pricing (inference).
- **9433 JP / 9432 JP — QUIET.** KDDI H1 last year was Nov 6 (KDDI); 2026 dates unconfirmed for both (expect ~Nov 4–6).
- **MF FP — QUIET.** Interim dividend €2.55 payable Nov 19; Investor Day Dec 2; Deputy CEO David Darmon leaves Nov 30 (MFN).

- **ENI IM / REP SM / TTE FP — QUIET.** Q3 already out (Oct 23 / 29 / 29). Eni's second dividend tranche payable Nov 25. Last Brent print found: $113.43 on Oct 30 (snippet, unverified) (FinanceFeeds); Hormuz risk unresolved.

Group 3 — Small/mid-cap & special situations

- **LIO LN — MATTERS (catalyst tomorrow).** 3Q26 / 9M26 release Wed Nov 4; figures not yet out (DirectorsTalk).
- **GPH CN / GPH-WA — QUIET.** FAST-41 / Army Corps permit decision was targeted for Sep 29; no outcome found (Trading-Treff). German outlets flag Nov 10 (some say Nov 27) as the end of China's graphite/anode export-control suspension; sources conflict (Stock-World). Q3 results expected in November, undated. Warrant series: GPH.WT.A, C$2.25, about Feb 2029 (my arithmetic from the Feb 18, 2026 close, 36 months) (Boerse-Express). Old GPH.WT is C$1.10 expiring Aug 22, 2027 per canadianwarrants.com, which does not match the watchlist's "Aug 8, 2026" note; a Bering Straits block (C$1.21, extended to Sep 17, 2026) has passed (Seeking Alpha PR). Confirm against the TSXV notice.

- **NAK US — QUIET, binary.** No ruling found after the Jun 25 oral argument in Alaska federal district court (Simply Wall St). Could land any day.
- **DDL US — QUIET, pending.** Meituan deal ($717M for the China business) is in normal SAMR review with rival complaints; no approval found (Mergermarket).
- **SLV US / SIL US / VZLA US — MATTERS (negative, carried).** No usable Nov 2–3 metals print; gold and silver levels remain conflicting (ISA Bullion vs Investing.com). VZLA: nothing new; Panuco security incidents earlier in 2026 (unverified count) (Webull/Benzinga).
- **SMH LN — QUIET.** Chip-rout read-through from Oct 30 stands (inference).
- **DIDIY US — QUIET.** Q3 date unconfirmed: Nov 12 (Earnings Whispers) or Nov 27 (StockAnalysis); last year Nov 26, so Nov 27 looks likelier (inference).
- **7912 JP / 7911 JP — QUIET.** DNP H1 possibly Nov 13 (unverified, StockAnalysis; last year Nov 14). Toppan ~Nov 18 unverified.
- **6425 JP — QUIET.** Okada Manila H1 2026 revenue −13% to ¥30.1bn, EBITDA −62% (background, Chinese-language source, unverified) (Sigma).
- **CDZI US — QUIET.** No Q3 date; last year in November (AP via WTOP).
- **IPX LN / JUP LN — QUIET.** Nothing new. IPX full-year results typically late Nov/early Dec (Dec 2 unverified).
- **BUKA IJ — NOISE.** Q3 already out Oct 26–27 (Kontan). **3445 JP — QUIET.**
- **EP059897 Pfd — UNRESOLVED.** Not identified; the owner must supply the ISIN or issuer. Not searched or guessed.

Group 4 — Futures / macro hedges

No Nov 2 closes were found for the S&P 500, Nasdaq, Dow, FTSE, HYG, IEF, copper, silver, gold or oil. Treat every level below as stale context.

- **Expired contracts (see §4):** NQU6, ESU6, Z U6, WNU6, UXQ6. YBYU6 is unresolved.
- **Rates — conflicting.** Trading Economics put the 10-year at about 5.12–5.13% in mid-October and Dec hike odds near 75% (Trading Economics); Friday's brief cited ~4.91% in Tokyo trade Oct 30, down ~37bp on the month. These are only consistent if yields fell sharply late in October. Check Treasury.gov/FRED and CME FedWatch before relying on either. Dec FOMC is Dec 9.
- **Uranium:** spot $89.63 and term $96.50 at Sep 30 (Cameco); October month-end print not yet posted. No successor to UXQ6 confirmed.
- **Week in context:** Oct 22–23 AI selloff with oil at $113–117; Oct 26–28 three up days into a hawkish Fed hold; Oct 29 Alphabet's record drop on capex; Oct 30 Intel −28.6% and a broad tech rout, S&P −1.82%, Nasdaq −2.86% (per Monday's brief); bonds rallied; Hormuz tension continues. Swing factor: whether AI capex earns a return. This week: midterms (today), Apple/Palantir reaction, payrolls Friday, then the 10-year and Dec Fed pricing as the cross-asset tell.

Group 5 — US large-cap core

- **PLTR — MATTERS.** See §1.
- **MAGS — MATTERS.** See Apple in §1. Other constituents' moves and the NAV were not found.
- **TPR — MATTERS (catalyst).** FQ1 FY27 Thu Nov 5 before the open, call 8:00am ET. Company guide EPS about $1.55 (consensus $1.48), high-single-digit revenue growth (Finviz).
- **IBKR — QUIET (check).** September: DARTs 4.111M (+6% y/y), client equity about $964.7B (+27%), accounts about 5.58M (+35%) (Finviz). An aggregator snippet implies October DARTs of 4.306M, which would be a first y/y decline, but the page looks like an old story (unverified) (TipRanks). The official October release is due about Nov 2–3.
- **LLY — QUIET.** Q3 reported Oct 29: revenue $24.4B (+39%), non-GAAP EPS $7.48, guidance raised, FY EPS $35–36 (SEC 8-K).
- **COST — QUIET.** September: net sales $30.02B, US comps +12.5%, total comps +7.6% (Costco). October sales likely Wed Nov 4 or Thu Nov 5 (last year Nov 5); date unannounced.
- **WMT — QUIET.** FQ3 likely Thu Nov 19 (sources conflict); outside the window. **CAT — QUIET.**

---

3. Probably noise

- **After-hours Palantir swings (−3% to +5% across sources).** Conflicting, low-quality prints; wait for the Tuesday session and the 8-K.
- **"Employment report prediction-market odds" pieces.** A Manifold market put payrolls above 10k at ~75%; that is not a forecast (Manifold).
- **Puig / Parfums de Marly rumour.** Already priced on Oct 28–29; no new facts.
- **Calendar-site earnings dates (LLY "Nov 2", WMT, DIDIY, Toppan).** Several are wrong or aggregator estimates; trust company IR notices only.
- **Maersk "backup bid" for ZIM.** Undated, single-source (FreshPlaza).

5. Follow-up questions to investigate

1. **PLTR:** Does the 8-K confirm the +96% revenue figure and the +6% TCV growth? Is the bookings slowdown real or a lumpy comp?
2. **Apple / MAGS:** How much of the 45–46% gross-margin guide is memory cost, and which other MAGS names (and which memory suppliers) are exposed? Does it help SK hynix/Samsung pricing?
3. **CEC GY:** What happens to the timetable if the EC decision slips past Nov 4, and what are the remaining closing conditions (Austria/Spain FDI)?
4. **ZIM US:** Was the revised Hapag-Lloyd/FIMI structure refiled? Is there a Feb 2027 long-stop? Is there any substance to a Maersk bid?
5. **EULIF/CRML:** Do OTC ADR holders receive CRML shares automatically on Nov 5–6, and at what ratio and settlement mechanics?
6. **PSUS / Pershing Square Inc.:** Is the CIK 2026053 filer the PSUS successor? What does the Q3 shareholder letter say about NAV and the discount?
7. **Rates:** What are the real 10-year yield and Dec hike probability today, given conflicting sources? What does that imply for IEF and the short-duration hedges?
8. **IBKR:** Did October DARTs really fall y/y (4.306M versus 4.47M), and what happened to client equity?
9. **Dior/Agache:** What is the cash tender price, and does the structure create an arbitrage versus CDI's current price?
10. **GPH:** Which date applies to the end of China's export-control suspension, and what happened to the Sep 29 permit target?
11. **Watchlist hygiene:** What are YBYU6 and EP059897? Which Dec-dated contracts should replace the expired futures?
