GGOF Portfolio Brief — Friday, November 13, 2026

Covers Thu Nov 12 (US, Europe) through the Fri Nov 13 Asia close and European morning. ***Source caveat:*** *page fetches were blocked for several publishers this run, including sec.gov, kabutan.jp, investegate.co.uk, CNBC and NVIDIA's investor site. Many items rest on search-result snippets from named outlets. Single-snippet or aggregator items are marked (unverified). "QUIET" means nothing was found in the window, not that nothing happened.* ***October PPI (8:30am ET today) had not printed when this was written.***

1. Top of the stack

Nvidia: Huang is out, Kress is interim CEO, and the stock recovered most of its losses within the day. Yesterday's brief said the board was weighing his removal. The board has since accepted Jensen Huang's resignation as President, CEO and director, effective Nov 11 and announced Nov 12. CFO **Colette Kress is interim CEO** and stays CFO. **Harvey C. Jones becomes the company's first board chair**, and an outside firm will run the CEO search (NVIDIA, board statement, TechCrunch). NVDA fell as much as 14% at the open but **closed at $166.19, down 4.34%**. AMD and Broadcom rose about 6% (AskTraders, Motley Fool). This morning it is up about 2–3% premarket (Benzinga). Melius cut the stock to Hold ($185 target). Evercore cut it to In Line ($186) (unverified). Director Persis Drell has also resigned (MarketScreener). Three House committees have called Huang to a closed-door interview on **Dec 1** (CNN). The leadership question is now settled for the time being. The next test is **Tuesday's FQ3 print (Nov 17)**, Kress's first as interim CEO (Invezz).

Korea fell on foreign selling despite the US recovery. The Kospi rallied to 5,504 intraday today, then reversed after midday on foreign selling and **closed at 5,290.53 (−0.98%)**. **SK hynix fell 3.03% to ₩1,216,000** after being up more than 5% intraday; foreigners sold ₩471bn of the stock (kado). **Samsung Electronics fell 0.96% to ₩206,000** from a ₩216,000 high (fnnews, ajunews). SK hynix has now fallen two days running, by about 4.8% in total. For holders of 000660, 005930, SK Inc and Samsung C&T, foreign investors are selling into rallies before Nvidia's print.

Rates: the 10-year is back above 5%, the 30-year auction was soft, and markets now price some chance of a 50bp hike. The $25B 30-year cleared at **5.441%, a 0.4bp tail**. Bid-to-cover was 2.36 (2.54 last time) and indirect bidders took 68.1% (72.3% last time). It was the second soft long-end auction in a row (InvestingLive, Bloomingbit). The **10-year closed at 5.10% (+12bp)** and the 30-year at about 5.43%. Higher oil and hike bets drove the move (CNBC, Goodman Macro). This morning the 10-year is about 5.13–5.14%, a three-week high (TradingView). FedWatch prices a December hike as near-certain, about **87% for 25bp and 13–14.5% for 50bp**; a week ago the 50bp odds were zero (TipRanks). **October PPI is out at 8:30 ET today.** Consensus is +0.4% m/m headline and +0.3% core, after September's +1.3%. Jobless claims were 200K against 195K expected (FXStreet). This is a headwind for IEF and the long-bond hedge, and the **UBZ6 first notice (about Nov 30)** puts the roll decision into next week.

Oil: Brent rose 3.3% to $95.82 on new Gulf attacks. Iran said four tankers were hit by explosions in Hormuz, and the Houthis claimed strikes on Saudi Aramco sites. **Brent settled $95.82 and WTI $88.74** on Nov 12 (Euronext/Reuters). Trump posted that the US does not need a deal with Iran (Fox live). Brent is still headed for a second weekly loss of about 2.5% (The National). The move supports TTE, ENI and REP, and it is also part of why yields are rising.

Deal mechanics: Ceconomy has closed, and ZIM's closing has slipped into 2027. CEC GY: JD.com completed its purchase of 59.8% at €4.60 on Nov 12 and, with Convergenta, holds about 85.2%. The free float is reportedly only about 4%. Reports say JD wants to delist soon, but nothing has been filed yet (retail-news.de, investing.com DE; unverified). Remaining holders now wait for a delisting offer, which must be in cash at no less than the 6-month VWAP, while trading liquidity dries up. **ZIM:** in its Q3 call, Hapag-Lloyd's CEO called end-2026 "too optimistic." He now expects **closing in Q1 2027, probably the second half of the quarter**, with an improved

Israeli filing coming "very soon." He called the deal "plan A" and said alternatives would be considered if it fails (FreightWaves, Investing.com transcript). ZIM is about $30 against the $35 offer (unverified, may be stale), so the longer wait reduces the annualised return on the spread. **BHF** remains unresolved: no extension or termination 8-K, with **23 days to the Dec 6 outside date**.

2. What matters, by group

Group 1 — Rails / shipping / financials

- **CEC GY — MATTERS.** The deal has closed; see §1. Next to watch are a delisting offer or a Frankfurt delisting application, and index-deletion notices. JD's EU foreign-subsidies clearance carries a 10-year arm's-length condition, overseen by a trustee, on intra-group dealings (JD 6-K, snippet only). The investor agreement rules out a domination agreement for at least 3 years (ms-aktuell; unverified).
- **ZIM US — MATTERS.** See §1. Hapag raised its 2026 EBITDA guidance to $4.6–5.0bn. Brazil's CADE is also reviewing the Hapag–ZIM vessel-sharing agreement (Seatrade). **ZIM Q3: Wed Nov 18 pre-market, call 8:00 ET** (PR Newswire).
- **BHF US — QUIET, but the clock is running.** No new filing. The latest word is still the Q3 release: DE, NY and MA approvals will not arrive by Dec 6, and an extension is under discussion "with no assurance" (SEC). AM Best has Brighthouse Life's "A" rating under review with negative implications (AM Best; headline only).
- **NSC / UNP — QUIET in window.** No new STB order. Comments on merits and on rate retaliation are due **Nov 18**, the UP/NS reply to CPKC **Nov 19**, DOJ/USDOT comments **Dec 3**, and UP's retaliation document production **Dec 4** (Trains, FreightWaves). The STB said retaliation evidence "bears heavily" on its public-interest test, which is a negative signal for the deal.
- **AAUC CN — QUIET.** Kurmuk is ramping up after first gold; commercial production is targeted by year-end (GlobeNewswire via Morningstar).
- **ALTI US — QUIET.** Nothing new since Q3 (Nov 9). Nancy Curtin is still interim CEO, and there has been no sale-process update since September (Finviz).

Group 2 — Luxury / consumer / Korea / autos / energy / alternatives

- **000660 KS / 005930 KS — MATTERS.** See §1.
- **034730 SK Inc / 028260 Samsung C&T — QUIET.** These are look-through holdings of hynix and Samsung; no closing prices were found.
- **051910 LG Chem / 373220 LGES — QUIET, dated overhang.** LG Chem's roughly ₩2.5tn LGES sell-down runs Nov 27–Dec 24 (Seoul Economic Daily).
- **ENI IM / REP SM / TTE FP — MATTERS via oil.** See §1. TTE rose about 1–2% on Nov 12 (Yahoo). Eni bought back 4.46m shares during Nov 2–6 (Eni).
- **Europe / MSE FP.** The Euro Stoxx 50 closed about 6,399 (+0.09%) on Nov 12 (Edge). The Stoxx 600 set another intraday record as defensive stocks offset the Nvidia shock; its closing level was not found (Investing/Reuters).
- **PGHN SW — MATTERS.** Goldman cut it to **Sell, target CHF610 (from CHF770)** on Nov 10 (Investing). The US evergreen fund received **$2.2bn of Q3 redemption requests and paid $728m**, the 5% NAV cap (ad-hoc). **The Global Value SICAV split vote has no result yet.** One source puts the meeting on **Nov 20** (unverified, TheAltView). If approved, the new sub-funds go live Nov 30 and the redemption limit falls from 5% to 2.5%. **BX / IPRV:** QUIET.
- **GENS SP — MATTERS.** Q3 net profit fell 42% to S$54.7m and gaming revenue fell 22% (Yahoo SG). Maybank sees no recovery yet, with Q4 rooms cut to about 900 by renovations (AseanGaming). The stock closed at S$0.61. A reported S$1.63bn rights issue at S$0.80 is **unverified**: a rights price above the share

price makes no sense, so check the filing (ad-hoc). **GENT MK:** QUIET. The RM1.25bn rights issue is targeted to complete in Q1 2027 (BusinessToday).

- **NPN SJ / PRX NA — QUIET. The Tencent board meets Wed Nov 18 to approve Q3** (confirmed via HKEX notice, Tiger). The Prosus/Naspers dividend-or-capital-repayment election closes **Nov 25**. The interim results date is still unconfirmed: Nov 24 or Nov 25 (unverified). Prosus bought back €101.8m of shares during Nov 2–6 (EuropaWire).
- **EULIF / CRML — MATTERS (structural).** Critical Metals completed its acquisition of European Lithium on Nov 5. It now owns 100% of Tanbreez, holds US$264.5m of cash, has 194.2m shares outstanding and has started a strategic review (MarketScreener). EULIF holders should confirm with their broker that the ADR has converted to CRML shares.
- **COTY — NOISE.** Citi raised its target to $4.50 (Neutral) (MarketBeat). The strategic review is due by year-end. **IPAR / ITP / PUIG:** QUIET.
- **MC FP / CDI FP — NOISE.** The only new item is China retail plans: a Hennessy flagship and a 2027 Dior show in Shanghai (ad-hoc). The December EGMs are unchanged.
- **MF FP Wendel / BVI FP — QUIET.** Wendel's €2.55 dividend is paid **Nov 19**, and it goes ex Nov 17 or 18 (GlobeNewswire). Bureau Veritas Q3 organic growth was 6.2%.
- **PSH LN / PSUS — QUIET.** The Q3 13F is due about **Nov 16** (GuruFocus).
- **9433 KDDI — NOISE.** Zacks cut the ADR to Hold after a small miss on Nov 6 (DailyPolitical).
- **Copper (QCQ6 expired) — QUIET.** The last data point is about $6.20/lb on Nov 10, a four-month low (Trading Economics).
- **QUIET (nothing found):** RACE, EXO, INDUA, 6707 Sanken, ALGM, P911, 8TRA, VOW, NTT. Sanken and ALGM trade with semis on Nvidia headlines.

Group 3 — Small/mid-cap & special situations

- **SMH LN — MATTERS.** The SOX closed at 10,506.67 (−0.54%) on Nov 12 (Yahoo), a small loss given NVDA's −14% open. NVDA is SMH's largest weight, and Tuesday's print is the next catalyst.
- **3445 RS Technologies — MATTERS (mixed).** Q3 came out today. Jan–Sep ordinary profit was ¥13.2bn (+10.5%), but the Jul–Sep quarter was ¥4.26bn (**−12.4%**). Operating margin rose to 19.9%. Full-year guidance of ¥17.2bn is unchanged and 77.2% achieved, which implies a softer Q4 (kabutan). The quarter was a slight miss against a consensus of about ¥4.5bn (unverified, kabuyoho).
- **6425 Universal Entertainment — MATTERS.** Q3 came out today. Jan–Sep ordinary profit was ¥0.72bn, against a ¥17.1bn loss a year earlier, but the Jul–Sep loss widened. It has reached 33% of the ¥2.2bn full-year plan, and no revision was seen (kabutan; unverified, truncated snippet).
- **7911 TOPPAN / 7912 DNP — PENDING.** H1 results were scheduled for today, but neither had been indexed when this was written (kabutan, kabuyoho). Check TDnet.
- **DDL US — MATTERS.** Q3 detail: RMB195.7m of the RMB298.1m net income comes from stopping depreciation on assets held for sale. Non-GAAP net income was RMB307.6m, and cash fell to RMB4.36bn from RMB4.88bn (PR Newswire). Meituan pays a $75M fee if SAMR blocks the sale. No ruling yet.
- **SLV / SIL / VZLA — MATTERS (metals lower).** Silver is about **$49.97**, down from about $52 in yesterday's figures (FXStreet). Gold is about **$3,947–3,958**, below $4,000 (Fortune). Both are near 52-week lows as real yields rise. VZLA was C$4.61 with nothing new; next earnings are about Dec 4 (StockAnalysis).
- **CDZI US — PENDING.** The Q3 release is not yet found. The call is listed for **today, 4pm ET**, with consensus EPS of −$0.14 (MarketBeat). The stock fell 11.7% to $3.33 on Nov 10, and short interest is about 15.75% (GuruFocus).
- **GPH CN / GPH-WA — QUIET (Q3 not found).** Recent news: final Ohio air permit (Nov 2), and an Ohio Phase 1 plan of US$80M with an investment decision in Apr 2027 and first sales in Q4 2028 (StockTitan). **China's**

US-specific graphite suspension (MOFCOM No. 72) still lapses Nov 27, and no extension has been seen (Pillsbury).

- **NAK US — NOISE.** Down 2% with no Pebble ruling. Q3 is about Nov 16 (Yahoo).
- **DIDIY — QUIET.** $3.37; Q3 is Nov 26–27 (Investing.com).
- **BUKA IJ — NOISE.** Older 9M detail: revenue Rp5.6tn (+19%), driven by gaming (Kontan).
- **IPX LN — QUIET.** No notice of results yet. Last year's notice came on Nov 12, before results on Dec 1. An aggregator says Dec 2, 2026 (unverified, StockInvest). **JUP LN:** NOISE; a holder's stake fell to 10.99% (TradingView/RNS). **LIO LN:** NOISE; goes ex-dividend Dec 3.
- **EP059897 Pfd — UNRESOLVED.** It is still not identified. The working guess is still the Cadiz Series A preferred (CDZIP), which declared a $0.56 Q3 dividend on Sep 25 (Placera). The owner should confirm.

Group 4 — Futures / macro hedges

- **US equities (Nov 12):** S&P 500 **7,592.40 (−0.35%)**, Dow 52,297.09 (−0.36%), Nasdaq 25,366.09 (−0.39%) (Yahoo/AP). The Nasdaq-100 close was not found. **This morning:** ES (Dec) about +0.1%, NQ (Dec) about −0.1%. Cisco is up about 3% on a beat-and-raise (TipRanks).
- **Rates — MATTERS.** See §1.
- **FTSE 100:** closed **10,863.09 (+0.25%)**, led by Burberry and 3i after the strong Q3 GDP print (Sharecast).
- **Uranium — QUIET.** Futures are above $91/lb, the highest since February (Trading Economics; date unverified). The long-term price set a record $99 on Oct 31 (Crux).
- **HYG / credit — QUIET.** No new OAS print was found. Vanguard notes CCC spreads near 1,000bp, but stress is confined to that tier (Vanguard). **IEF:** a headwind from the 10-year above 5.1%.
- **Week in context.** Monday brought an oil-relief rally (S&P +2.3%). Tuesday's hot CPI and a weak 10-year auction pushed the 10-year to about 5%. Wednesday was a CoreWeave-led chip melt-up (S&P +1.3%). Thursday, Huang resigned and the 30-year auction was soft; the S&P lost only 0.35% but the 10-year rose to 5.10%. The S&P is roughly flat on the week, while the 10-year is at a three-week high and 50bp hike odds are building. Rates and oil, more than AI, are now driving markets, and today's PPI is the next input.

Group 5 — US large-cap core

Closes are Nov 12, mostly from single quote-page snippets (unverified).

- **MAGS — MATTERS (via NVDA).** No close was found. NVDA's −4.3% is about −0.6% for the fund at equal weight.
- **LLY — QUIET.** $1,427.28 (−0.7%). **Ex-dividend today ($1.73).** R&D Day is Dec 7; CMS negotiated prices are due by Nov 30.
- **COST — QUIET.** $1,092.21 (+0.4%). Bernstein raised its target to $1,155. **The $30 special dividend has a Nov 24 record date** (Yahoo).
- **CAT — QUIET.** $605.28 (+0.6%) (Finviz). The stock is still about 20% below its level a month ago. The dividend is paid Nov 19.
- **WMT — QUIET.** $126.19 (+0.4%). **FQ3 Nov 19 pre-market.**
- **PLTR / IBKR / TPR — QUIET.** PLTR $171.58 (−0.5%), IBKR $81.33 (−1.4%, after +6.3% the day before), TPR $132.63 (−0.5%) (Yahoo).

---

3. Probably noise

- **"Nvidia down 14%".** That was the open, not the close; NVDA closed −4.3% and is up premarket.
- **"Third affair allegation" headlines** (Yahoo live). Huang has already resigned, so further personal allegations change little for the stock. The Dec 1 House interview is the item to watch.

- **"UP–NS merger final" (WSLS, Nov 11).** This is wrong; the STB review runs to at least May 2027.
- **American Prospect piece on UP's Vena video.** This is commentary, not a regulatory action.
- **Genting Singapore "S$0.80 rights issue".** The price is above the share price, so it is likely garbled; verify before acting on it.
- **ad-hoc-news "Prosus results Nov 9".** These repeat last year's figures.
- **Target and rating changes** on COTY, COST and KDDI.
- **Routine buyback filings** (Prosus, Eni) and the Jupiter holding notice.

Dec 8–9	FOMC (25bp hike about 87%, 50bp about 13%)	

Undated but live: Nvidia permanent CEO search; BHF amendment or termination and the Delaware exam; Ceconomy delisting offer; ZIM's revised Israeli filing (Hapag says "very soon"); DDL SAMR ruling (long-stop Feb 2027); NAK Pebble ruling (late 2026); Dior EGM notice and final price; Coty review (by Dec 31); VW's Traton block sale; Allied NCIB acceptance; Iran/Hormuz and attacks on Saudi energy sites; IPX notice of results.

Decisions to consider:

1. **Duration hedge, this week:** with the 10-year at 5.10–5.14% and two soft long-end auctions, confirm the expired WNU6 was rolled. Plan the UBZ6 roll before first notice (about Nov 30), and size it after today's PPI.
2. **AI and memory before Nov 17:** the leadership risk is settled, but foreigners are selling Korean memory into rallies. Decide whether SK hynix and Samsung exposure goes into the print at full size.
3. **BHF:** 23 days to Dec 6 with no extension filed. The decision whether to hold for an extension or cut is unchanged and gets more urgent each day.
4. **CEC:** the deal has closed, and the stock now has about 4% free float with no dated delisting offer. Decide whether to keep holding illiquid stock for the delisting offer or sell in the market.
5. **ZIM:** closing has moved to H2 Q1 2027, so the annualised return on the about-$5 spread is lower. Recheck the position against the Nov 18 Q3 print.
6. **COST:** adjust options and hedges for the $30 special dividend (record Nov 24).
7. **Futures housekeeping:** the copper and uranium contracts have expired and YBYU6 is unresolved. EULIF needs its conversion confirmed.

---

5. Follow-up questions to investigate

1. **PPI:** Does today's print hold the 50bp odds near 13% or push them higher? How does the long end react, and where does that leave the UBZ6 roll?
2. **NVDA:** Does Kress keep or reaffirm guidance on Tuesday? Does the CEO search or the Dec 1 House interview affect hyperscaler or China export relationships? Why did foreigners sell Korean memory even as NVDA recovered?
3. **BHF:** Is an extension 8-K filed before Dec 6, and on what terms? Does AM Best act on the rating review?
4. **CEC:** When does JD file a delisting offer, and at what price relative to the 6-month VWAP and the €4.60 offer?
5. **ZIM:** What does the revised Israeli filing contain, and does the >10% holder group force a new shareholder vote? What does management say on Nov 18?
6. **Partners Group:** Is the Global Value vote on Nov 20, and do evergreen redemption caps keep binding into Q4?
7. **Genting Singapore:** What are the actual rights-issue terms, if there is one?
8. **TOPPAN / DNP / CDZI / GPH:** today's pending results. Check for any guidance changes and for Cadiz's Northern Pipeline funding.
9. **GPH / graphite:** Is MOFCOM No. 72 extended before Nov 27?
10. **Watchlist hygiene:** What are YBYU6 and EP059897? Remove the CRML option, update the AAUC, EULIF, CEC and GENT labels, and roll the expired futures.
