Japan Portfolio Brief — Tuesday, November 10, 2026

Covers the Mon Nov 9 US session and the Tue Nov 10 Tokyo and Seoul sessions (both closed). **Data-quality warning (continuing):** research ran on search-result summaries only. WebFetch could not reach most hosts (TDnet, kabutan, DART, MOF, Honda, SMM, CNBC, Bloomberg, Japan Times), so no primary filing was opened. "QUIET/UNVERIFIED" means "nothing found," not "confirmed quiet." Earnings dates are mostly aggregator-sourced. Korea coverage is thinner than usual: 12 Korean tickers got no individual search (listed in section 2). Check TDnet/DART before acting on any single-name call.

---

1. Top of the stack

1. SoftBank Group (9984): Jul–Sep quarter swung to a net loss of about ¥1.1tn, but the stock closed +13.9% before the release. Shares closed +¥472 (+13.88%) at ¥3,872, the top Nikkei gainer, in a broad AI/chip rebound (Investing.com). That arithmetic implies a Nov 9 close of ¥3,400, which corroborates the Nov 9 Korean-language report we had flagged as unverified. The headline loss is about ¥1.1tn (about $7bn; one source has ¥1,115.3bn) against an LSEG range of +¥233bn to -¥113bn, versus a ¥2.5tn profit a year earlier (Investing.com, The Star, SED). Drivers: a ¥597.2bn loss on US power-generation equipment for AI data centres (against ¥1.5tn of cumulative payments) and Intel hedge losses; financing costs more than doubled to ¥462bn (MLQ, FourWeekMBA; secondary summaries). OpenAI valuation was held unchanged from the March year-end, so no gain or loss this quarter, and OpenAI IPO plans reportedly slipped to next year (The Star). The ABB Robotics ($5.4bn) deal status remains unverified: China reportedly blocked it Nov 5 (Nikkei Asia), with $1.75bn of LBO financing arranged to be drawn at closing (Business Recorder). Guidance and CDS levels were not found. MATTERS: a bad print landed after a 14% run-up, so the Nov 11 reaction is the open question. The stock has almost halved since early June.

2. Risk-on reversal: Nikkei about +2.8% to roughly 60,460, Topix +1.98% to 3,893.71, KOSPI +4.39% to 5,239.13. Nikkei figures: about 60,459.58 (+2.87%) per IBTimes, +2.76% per Investing.com (sources disagree slightly; the Topix level is single-sourced). Advantest +4.6%, Tokyo Electron +6.1%; Toyota was the biggest drag; breadth 2,894 up / 721 down. KOSPI (intraday high 5,300.92, ending a three-day slide) was led by Samsung Electronics (+4.7%, about ₩198,900) and SK hynix (about +7%, about ₩1.21m); a buy-side sidecar fired; KOSDAQ +4.48% to 667.61 (SED, Ajupress, Nate). Foreigners returned, News1 calling it the first net buy in 8 sessions (flow figures conflict) (News1). The US set up the move: on Nov 9 the S&P 500 rose 2.35% to 7,549.94, Nasdaq +2.74% to 25,253.14 (out of correction), Dow +1,104 points; SOX +6.85%, AMD +13%, Nvidia -4.27% on a board probe of its CEO (CNBC, Kiplinger, TradingKey). Brent fell about 5.9% to $92.57 on easing US-Iran tension. MATTERS: two days of sharp rebound after last week's ~6% daily drops; the AI-beta regime is still not resolved, and US CPI is the next test.

3. JGB: weak 30-year auction and a hawkish BoJ read. The Nov 10 30y auction drew bid-to-cover 3.36 vs 3.88 at the prior auction and a 12-month average of 3.6 (snippet only; tail and size not found) (Bloomberg). Yields afterward (single source, not closes): 2y 1.775%, 5y 2.105%, 10y 2.685%, 20y 3.59%, 30y 3.865% (rallies.ai). The BoJ's Summary of Opinions (released Nov 10) says a December hike has a "good chance" and many members see a near-term hike as necessary (Japan Times, snippet only). Swap-implied odds are about 70–73% for Dec 17 (Bloomingbit, rateprobability.com; dates unclear). MATTERS for the JGB position and the banks (section 4).

4. Resona (8308) and Honda (7267), SMM (5713), Suzuki (7269), Subaru (7270) were scheduled to report around Nov 10, but no results were found. Resona's interim is listed for today (kabuyoho); the last known guidance is FY net income ¥330bn (raised ¥20bn Jul 31) (FilingReader). Honda's interim is listed Nov 10 (kabuyoho) against full-year

operating profit guidance of ¥650bn at ¥155/$ (TimesLIVE). SMM's IR page (via snippet) lists Q2 results Nov 10 along with a buyback/holding-policy notice and an impairment-loss notice, with no amounts found (SMM). Subaru's date conflicts (Nov 10 calendar vs Nov 6 trade press). UNVERIFIED: read the TDnet releases first thing.

5. Identity check, 8524: confirmed as 北洋銀行 = The North Pacific Bank (Sapporo), distinct from Hokuhoku FG (8377). 8551 remains The Kita-Nippon Bank (Iwate). Which one the owner holds is still open (section 4).

---

2. What matters, by theme

Macro thread (week in context)

- **BoJ:** policy rate 1.25% after a hold on Oct 29–30 (Bloomberg). Our macro source says the last hike was September; a Resona summary cites a June hike (conflict, unresolved). Ueda signalled strong prospects of a December hike after the October hold; a Reuters analysis said December was "all but locked in" (AOL/Reuters). One FXStreet-derived item says expectations "weakened"; not reconciled. Next meeting Dec 17 (possibly Dec 18 Tokyo), not verified against the BoJ calendar.
- **JGBs:** see Top 3. The 10y was 2.83% on Nov 4 (bondscovery) and about 2.685% after the auction, with a 2.570–2.750% weekly range (Alo Japan). 5y auction Nov 12, size not found (Sep and Oct 5y auctions were about ¥2.5tn each; inference) (MOF). Fiscal: no fresh Nov 9–10 news; Takaichi said Oct 19 she would keep JGB issuance "at appropriate level" (FXStreet).
- **Yen:** USD/JPY about 158 (157.95 early Europe Nov 10) ahead of US CPI (FXStreet). MOF disclosed on Nov 9 a record ¥7.98tn single-day intervention (Jul 30), part of ¥15.399tn over Jul–Aug (Nation Thailand, investingLive). Katayama's verbal warnings are about two weeks old (investingLive); no new intervention found today. Sources conflict on a US-Japan joint-action report; treat as unverified.
- **Korea:** BoK base rate 3.00%, held Oct 22 after hikes in July and August (Trading Economics); the next meeting date was not found (typically late November; the prior run had Nov 25/26, unconfirmed). USD/KRW closed the day session at 1,337.5 (-9.6 won), the strongest won since Oct 30, helped by exporter selling and lower oil (SED, Korea Times). Market structure: the third Commercial Act amendment (mandatory treasury-share cancellation, generally within a year; existing holdings covered) passed Feb 25 and reportedly took effect around Sep 10 (effective date unverified) (LawTimes). Backdrop for holdcos; nothing new today.

Megacaps / tech

- **SoftBank (9984):** Top 1.
- **NAVER (035420): NOISE for Nov 10.** +3.1% to about ₩192,900 (possibly intraday), a beta move with KOSPI (Ajupress). Nvidia's ₩1.34tn subscription was paid Nov 6 (prior run). Q3 results about Nov 11, 16:00 KST per the prior run's aggregator source; unconfirmed.
- **Seiko Epson (6724):** Q2 reported about Nov 5, with an EPS beat and raised EPS guidance per ADR-based sources (unreliable); the ADR gapped down afterward (TheCerbatGem, DefenseWorld). QUIET now.
- **MegaChips (6875):** H1 date conflict (Nov 5 vs Nov 6); no results found (MarketScreener). Probably already out; UNVERIFIED.
- **Optex (6914):** a Q3 report is estimated for about Nov 10 (TipRanks estimate; the prior run had Nov 13); results not found (TipRanks).
- **Sony, Keyence, Canon, Omron (results possibly Nov 10, unverified), SHIFT, Appier, Oro (Q3 Nov 16 per prior run), Sanken (Nov 11 per prior run), RS Technologies (Nov 13 per prior run):** no news found;

QUIET/UNVERIFIED. Chip-led rebound likely lifted RS Technologies, Sanken and MegaChips (inference, no prices found).

Banks / financials

- **Resona (8308):** Top 4; guidance ¥330bn (raised Jul 31, post-BoJ hike), interim dividend ¥18.5 (FilingReader). Likely beneficiary of a December-hike narrative.
- **Kita-Nippon (8551):** Q2 Nov 12 (kabuyoho); Q1 ordinary profit ¥2.63bn (+58.2%), guidance unchanged (Monex Scouter). QUIET.
- **North Pacific Bank (8524, if this is the held name):** interim Nov 13, 14:00; consensus ordinary profit growth +36.2% (Traders Web). QUIET.
- **MUFG (8306):** no news; Q2 date not found (last year Nov 14; likely about Nov 13–14, per prior run Nov 13) (JP X 2025). **SMTG (8309):** no news; date not found (SMFG is Nov 13 13:00 per Traders Web; the prior run had Nov 12).
- **SBI (8473):** reported Nov 2: H1 record, pre-tax ¥324.3bn (+52.9%), net ¥230.6bn (+39.1%), but Jul–Sep net only +1.6% to ¥82.5bn; ¥2.5bn unauthorized outflow at SBI Crypto (single secondary source) (SBI, Minkabu). NOISE/QUIET now.
- **Japan Post (6178):** no Nov news; Q1 net ¥125.3bn, FY guide ¥380bn; a ¥600bn capital injection into Japan Post Co. is reported, undated (RTTNews, TipRanks). Q2 about Nov 13 per prior run, unverified.
- **Shimizu Bank, Kyoto Financial, Fidea (8713), Mitsui Fudosan (8801, Q2 Nov 11 per TradingView vs Nov 6 per YCharts, conflict), TOC (8841), Yakult (2267):** no news; QUIET/UNVERIFIED. Fidea's Jan 1, 2027 bank merger is a known mechanic.

Industrials / autos / materials

- **Honda, Suzuki, Subaru, SMM:** Top 4. **Mitsubishi Materials (5711):** results Nov 11 (kabuyoho); FY ordinary profit forecast was raised from ¥73bn to ¥180bn on tungsten. Catalyst. **JAPEX (1662):** H1 Nov 12 (kabuyoho); guidance cites the Iraq shutdown and a ¥45 dividend (Quartr). Brent's -5.9% is a headwind for the read-through. **JR Central (9022):** Q1 operating profit ¥219.1bn (-0.9%) (JR Central); Oct interim not found.
- **Kubota, Daikin, Nakayama Steel, Ebara Jitsugyo, Fudo Tetra, Hi-Lex (FY results mid-Dec), KH Neochem, Obara, Shibaura Machine, Tigers Polymer (Nov 11 per prior run), Valqua, Keisei, Shochiku, Tokyotokeiba, Katakura, Universal Entertainment:** no news found. QUIET/UNVERIFIED (many report interim results in Nov 5–14).

Korea names

- **LG Chem pref (051915): MATTERS (not new).** Q3 revenue ₩15.496tn (+34%), operating profit ₩561.2bn (-17.4%), petrochemicals lost about ₩170bn (Korea Center). On Oct 28 the board approved selling 6,535,939 LGES shares (about ₩2.5tn) via a PRS at a ₩382,500 base price; disposal window Nov 27–Dec 24; about ₩400bn (about 20% of after-tax proceeds) to shareholder returns including a ₩300bn buyback (sources disagree on buyback vs cancellation); LGES stake falls to 76.59% (SBS Biz, SateEconomy). Nothing new Nov 9–10. LG Corp (003550): read-through (inference).
- **Taekwang Industrial (003240): MATTERS, unresolved.** Trustone's July letter demanded changes to the value-up plan, a higher dividend and a split; Taekwang filed criminal complaints in September; Trustone said it would sequence rights (including an EGM) after an Oct 3 reply deadline (MTN, SBS Biz, Bizwatch). No EGM demand, court action or November filing found; check DART.

- **LS Corp (006260):** Q3 operating profit forecast ₩461bn vs ₩157bn a year earlier, consensus raised 31%; LS Cable backlog a record ₩9.55tn at end-Q2 (pre-earnings forecasts; results not seen) (SateEconomy). **SK Inc (034730):** Q3 consensus raised about 54% (same source). **Samsung C&T (028260):** a Q3 beat reported, no figures found (SBS Biz). **Hyosung Corp (004800):** only subsidiary news. **SK Discovery (006120):** only a July interim dividend of ₩500.
- **UNKNOWN (no individual search run; not confirmed quiet):** Amorepacific Group, F&F, ILJIN Holdings, LG Electronics pref, Daewon Sanup, Eusu Holdings, Misto Holdings, Motonic, Seoul City Gas, Samyang Tongsang, Ubiquoss. The semiconductor-led rally likely helped SK Inc and chip-adjacent names (inference). Q3 filing deadline Nov 14.

---

3. Probably noise

- **Seiko Epson ADR gap-down:** unreliable ADR data, results were Nov 5.
- **SBI Crypto ¥2.5bn outflow:** single secondary source, immaterial to group.
- **BoJ "hike expectations weakened" snippet:** conflicts with ~70% odds and the Summary of Opinions; unreconciled.
- **"Fed hike bets" mentions in FX snippets:** odd, unverified.
- **bbntimes "Nikkei 64,075 / SoftBank -6%" and tokenpost "-6.72% / SoftBank -14%" hits:** other dates.
- **Foreign-flow figures in Korea (₩371.7bn net buy vs ₩147.5bn KOSDAQ net sell):** conflicting; use direction only.
- **"Shift Up" (Korea) Q3 on Nov 10:** a different company from SHIFT Inc. (3697).

4. Time-sensitive / positions watch

JGB No. 466 (0.50%, JP1024661QB1) — matured Sun Nov 1; settlement still unverified. Terms re-confirmed: 2-year, issued 2024-11-01, maturing 2026-11-01, coupons May 1/Nov 1 (MOF 2y auction page, MOF result). Payment is presumed Mon Nov 2 under the holiday rule, not source-verified. The ISIN-to-bond mapping is still inferred; no source confirms JP1024661QB1. No failure or irregularity reports found. **Decisions:** (1) confirm with the custodian that proceeds settled (now nine days since maturity); (2) the reinvestment decision is overdue, with the 2y at about 1.78%, 5y about 2.1%, 10y about 2.7%, 30y about 3.87% after a weak auction, a 5y auction on Nov 12, and a December hike about 70% priced; (3) update `watchlist-japan.md` once redemption is confirmed. The position stays on the watchlist and is flagged, not dropped.

Open identity question for owner: 8551 Kita-Nippon Bank (Iwate) vs 8524 North Pacific Bank (Hokuyo, Sapporo; confirmed this run as 北洋銀行). Original list wording ("North Pacific Bank") matches 8524. Coverage continues to follow the 8551 ticker; please confirm which is held.

Portfolio-level: the two-day rebound (Nikkei about +5.2% over Nov 9–10, KOSPI about +3.5%) retraces part of last week's roughly 6% daily drops but not Korea's July-to-now decline. SoftBank's loss print against a 14% pre-print rally is the main idiosyncratic risk for Nov 11; review AI-linked concentration (SoftBank, SK Inc, Samsung C&T, RS Technologies, MegaChips, Sanken, Hyosung/LS) and margin/collateral mechanics.

*Calendar (= aggregator/inferred/unconfirmed):**

- Nov 10 (already passed, results not seen): Resona*, Honda*, Suzuki*, Subaru*, SMM*, Omron*, Optex*

- Nov 11: SoftBank share reaction; NAVER Q3 (16:00 KST)*; Mitsubishi Materials; Sanken*; Tigers Polymer*; Mitsui Fudosan* (date conflict); US CPI timing not confirmed
- Nov 12: Kita-Nippon*; JAPEX*; SMTG*; JGB 5y auction*
- Nov 13: 8524 (14:00)*; MUFG*; SMFG 13:00*; Japan Post*; Appier*; RS Technologies*
- Nov 14: Korea Q3 filing deadline (ILJIN, F&F, LS and others)
- Nov 16: Oro Q3*
- Late Nov: Bank of Korea meeting (date unconfirmed; prior run said Nov 25/26)
- Nov 27: LGES PRS disposal window opens (to Dec 24); NAVER new-share listing
- Dec 17/18: BoJ meeting*

5. Follow-up questions to investigate

- **SoftBank:** What did the Nov 10 release say on guidance, the ABB Robotics termination or write-down, CDS, the ¥597bn power-equipment loss, and about $30bn of OpenAI-related H2 obligations (one unverified report)? How did the stock trade on Nov 11?
- **JGB 466:** Did the custodian settle the redemption, and where should proceeds go? What were the Nov 10 30y tail and the Nov 12 5y size?
- **8551 vs 8524:** Which bank is actually held?
- **Resona, Honda, Suzuki, Subaru, SMM:** What did the Nov 10 TDnet releases show? Did Honda raise the ¥650bn guide? What is SMM's impairment amount and buyback size? Is Subaru's date Nov 6 or Nov 10?
- **BoJ:** Is the policy rate 1.25%, and was the last hike in June or September? Confirm the Dec 17 meeting date and a sourced hike probability.
- **Taekwang:** Has Trustone filed an EGM call or court action since Oct 3?
- **LG Chem:** Is the ₩300bn a buyback or a cancellation, and when does it start?
- **Korea:** What is the BoK's November meeting date? Run per-name checks on the 11 unsearched Korean tickers.
- **Network access:** allowing global.honda, smm.co.jp, kabutan.jp, jpx.co.jp/TDnet and asiae.co.kr would materially improve next runs.
