GGOF Portfolio Brief — Wednesday, November 4, 2026

Covers the past 24 hours (Tue Nov 3 into Wed Nov 4 morning). ***Source caveat:*** *web search is US-only and returns mostly summaries; pages from SEC, Yahoo and StreetInsider could not be opened, so no primary filing was read. Where a name says QUIET, it means nothing was found in the window, not that nothing happened. Items marked (unverified) rest on one source, a snippet or conflicting sources. Several second-tier names (EXO, PUIG, INDUA, Sanken, BVI, IPRV, MSE, KDDI, NTT, PGHN, SMH, DNP, Toppan, IPX, JUP, 6425, CAT, LLY, REP) returned nothing usable.*

1. Top of the stack

Ceconomy (CEC GY): EC cleared JD.com's takeover on Nov 3, with conditions. The Commission approved the deal under the Foreign Subsidies Regulation. Conditions run 10 years: intra-group dealings (including JD's financing of Ceconomy) must be at market terms, and JD must offer third-party retailers its logistics and technology services on the same terms as Ceconomy (EC press release, Nov 3, Europawire, Nov 3, Retail Insight Network). The binary event flagged yesterday has resolved favourably. One secondary report says this was the last hurdle and closing is expected within days (KuCoin flash); the closing date and any remaining conditions (Austria/Spain FDI) are unverified. Expect a closing announcement, settlement of the €4.60 offer and delisting steps.

Palantir (PLTR): beat and raise, stock still fell on a bookings slowdown. Q3 revenue $2.313B (+96% y/y, +20% q/q) against about $2.18B consensus, US commercial $984M (+148%), adjusted EPS $0.44, adjusted operating margin 62%, adjusted FCF $1.22B. FY26 revenue guide raised to $8.530–8.534B (about +91%); Q4 guide $2.649–2.653B. The bear point is total contract value of $2.918B, up only 6% y/y after +49% in Q2, which the CFO attributed to shorter Sovereign AI contracts (press release 8-K, Fortune, Nov 2). The stock closed down about 1.7% on Nov 3 per CNBC's headline, after steeper early losses (some outlets say >5% intraday); the exact close is unverified (CNBC, TipRanks). Truist, Piper and Morgan Stanley raised targets. This corrects Tuesday's brief, which carried the Palantir numbers as unverified.

Midterms: Democrats projected to flip both chambers; futures fell, yields and the dollar eased. CNBC desk projections early Nov 4 show at least 245 House and 54 Senate seats (CNBC). After the close Nasdaq-100 futures fell as much as about 2% and S&P futures about 1.3%; the 10-year dropped about 6bp to roughly 4.91% and the dollar index slid to 101.21 (Fox Business, Vantage). Cash markets on Nov 3: S&P 500 7,567.72 (+0.3%), Nasdaq Composite 25,372.01 (+0.8%), Dow 51,786.15 (−0.4%, dragged by Apple), per search summary (Yahoo Finance). The first read is a risk-off open for tech-heavy holdings (MAGS, PLTR, SMH).

Korea: Kospi −3.59% on Nov 3, rebounding Nov 4. Kospi closed at 5,648.79 on an AI-capex scare and US chip selloff; Samsung Electronics −4.59% to ₩218,500, SK hynix −5.71% to ₩1,388,000, even though SK hynix said on its Q3 call that customer requests exceed twice its supply (Seoul Economic Daily, MarketScreener). Early Nov 4: Kospi back above 5,800, Samsung +3.4%, hynix +5.1% (intraday, unverified) (Bloomingbit). Volatility is high both ways.

Position mechanics: EULIF/CRML implementation Thu Nov 5, new CRML shares trade Fri Nov 6, ratio 0.045. Both schemes became effective, EUR shares were suspended on the ASX, record date was Oct 29; CRML shares are issued directly rather than via CDIs (Finviz, effective, Taiwan News, vote). No confirmation that implementation has occurred yet. Confirm OTC ADR (EULIF) handling with the broker.

2. What matters, by group

Group 1 — Rails / shipping / financials

- **CEC GY — MATTERS.** See §1.
- **ZIM US — MATTERS (negative, no new news).** Israel's Government Companies Authority halted its review on Sep 29 after Hapag-Lloyd and FIMI missed the deadline for a detailed revised proposal; not a formal rejection (Seatrade Maritime, Ynet). A revised offer appears to have been submitted (Globes), but I could not confirm it from the text and found no Israeli decision since. Reports say several government bodies and the workers' union oppose; a headline says failure in Israel costs no break fee (container-mag). Maersk contingency report is single-source (unverified). Q3 date not found.
- **BHF US — QUIET.** HSR expired and FINRA approved; Delaware, New York and Massachusetts insurance approvals were outstanding as of the Q2 10-Q; outside date auto-extended to **Dec 6** (10-Q). Shareholders approved the $70 cash deal Feb 12 (BusinessWire). Q3 date not found; whether any state approval landed since is unconfirmed.
- **UNP / NSC — QUIET.** STB procedural schedule issued Aug 18 (Docket FD 36873); final briefs due May 28, 2027; merits decision not expected before fall 2027 (Railway Age, Freightwaves). A Nov 18 comment deadline is suggested by a headline only (unverified) (Pulse2).
- **AAUC CN — FLAG: possibly a closed deal.** Zijin Gold's C$44 cash takeover (C$5.5B, announced Jan 26) cleared Investment Canada and ECOWAS/COMESA; outside date was extended to Jul 29 (BNN Bloomberg, Intellinews, ~Jun 2). No closing confirmation found; the ticker may be delisted. Previous briefs' "Q3 date" for AAUC is moot if so. Owner to confirm the position status.
- **ALTI US — QUIET.** Q3 estimated Nov 9 after the close, consensus EPS $0.05 (unconfirmed; Q3 2025 was postponed on the day) (Earnings Whispers). Interim CEO Nancy Curtin since Mar 31; management guided cost cuts to show in H2 (Seeking Alpha).

Group 2 — Luxury / consumer / Korea / autos / energy / alternatives

- **RACE IM — MATTERS (positive).** Q3 (Nov 3): revenue €1,896m (+7%, ~+10% constant currency), net profit €431m (vs €382m), shipments 3,368 (vs 3,401; planned model-changeover dip; China/HK/Taiwan down, EMEA and Americas up), special series ~22% of shipments. Guidance raised: 2026 revenue ~€7.65bn (from 7.60bn), adjusted EBITDA ≥ €3.0bn, adjusted EPS ≥ €9.85; order book into 2028 (Stock Titan release, Yahoo call highlights, Menafn). Share-price reaction not found.
- **PSH LN / PSUS US — MATTERS (moderate).** Q3 call held Nov 3. Ackman said the market mispriced hyperscalers and sees a ~~$0.5T opportunity in Fannie/Freddie (GuruFocus, PSH). Pershing Square Inc. (NYSE: PS): permanent capital 96–98% of fee-paying AUM~~ ($24bn), 20% return target, $1bn "Ventures" launch (GuruFocus, PS). Howard Hughes going asset-light; Pershing stake ~47%. Q3 NAV not found; whether PS relates to PSUS remains unverified.
- **EULIF US / CRML — MATTERS.** See §1.
- **CDI FP / MC FP — QUIET (live structural event).** Agache/Dior reorganisation: minorities (2.44%) to receive a cash offer priced off LVMH and fixed 5 business days before the December EGM (Option Finance, Sep 24). Nothing new this week.
- **IPAR US / ITP FP — MATTERS (event tonight).** Q3 results Nov 4 after the close, call Nov 5 at 11:00 ET; 2027 outlook due Nov 19. Pre-announced: US Q3 sales $430m (flat), 9M $1.115bn (+1%); Paris entity €265.5m (+4.8%), targeting the top of ~€870m 2026 guidance (Capital.com, Option Finance). A Quartr summary showing a 7.3% fall conflicts and was not relied on.
- **COTY US — QUIET.** FQ1 projected around Nov 4 but unconfirmed (Right Trader); consensus revenue ~$1.5bn vs $1.6bn. Check the company calendar.
- **000660 KS / 005930 KS — MATTERS.** See §1.

- **ALGM US — MATTERS (positive).** FQ2 FY27 sales $277m (+29%) vs $265–275m guide, non-GAAP EPS $0.26, record design wins since the 2020 IPO, bookings up eight straight quarters (8-K). Release date and share reaction not found.
- **ENI IM / TTE FP — NOISE.** Q3 already out (Eni Oct 22–23, guidance raised, extra dividend and bigger buyback; Total Oct 29, gearing 9.1%, $2.5bn buybacks for Q4 and Q1) (Egypt Oil & Gas, Finviz). **REP SM** — no Q3 data found. Brent is now about $104–105 (see Group 4), down from $113 last Friday.
- **VOW GY / P911 GY / 8TRA GY — QUIET.** Porsche SE H1 loss ~€2.2bn including a €3bn VW impairment (New Mobility). VW reportedly cutting its Traton stake from 87.5% to just above 75% (aggregator only, unverified) (Finanztrends).
- **PRX NA / NPN SJ — QUIET.** Next report projected Nov 24 (estimate, unverified) (TipRanks).
- **MF FP — QUIET.** Interim dividend €2.55 payable Nov 19; Investor Day Dec 2; Deputy CEO Darmon leaves Nov 30 (from Tuesday's brief).
- **GENT MK / GENS SP — QUIET.** Rights issues pending (RM1.25bn / S$1.63bn), completion targeted Q1 2027. Genting Berhad Q3 usually late November (unverified).
- **BX US — QUIET.** Dividend paid Nov 9 (carried).
- **EXO NA, PUIG SM, INDUA SS, 028260 KS, 034730 KS, 051910 KS, 373220 KS, 6707 JP, BVI FP, IPRV LN, MSE FP, 9433 JP, 9432 JP, PGHN SW — QUIET (nothing found).** Japan H1 reports for KDDI, NTT and Sanken fall in roughly Nov 4–12; dates unconfirmed.

Group 3 — Small/mid-cap & special situations

- **LIO LN — MATTERS (results today).** 3Q26/9M26 scheduled Nov 4; figures not yet indexed (DirectorsTalk). Targets: ~15% loan growth, ROE >20%, 30–50% payout.
- **SLV US / SIL US — NOISE (macro).** Kitco spot at the Nov 3 close: gold ~$3,929 (−$16), silver ~$49.66 (−$0.87, ~−1.7%) after strong US jobs data lifted yields; gold ~$3,928 on Nov 4 after the Democratic House projection (Kitco gold, Kitco silver, Kitco PM, Vantage). Silver quotes elsewhere run ~$50.1–50.3 (Trading Economics), so levels differ by source and time.
- **VZLA US — QUIET.** No news since late August; shares ~$4.0–4.8 in August vs a 52-week range of $4.03–9.82 (aggregators) (Investing.com). Q3 likely mid-November (unverified).
- **GPH CN / GPH-WA — QUIET (policy-date risk).** No November company news. China's suspension of the Oct 9 measures runs to **Nov 10**, and the suspension of stricter graphite end-use checks on exports to the US runs to **Nov 27** — two different measures per summaries (JD Supra, China Daily); this reconciles Tuesday's conflicting Nov 10 vs Nov 27. Latest permitting item found: FAST-41 update Apr 28; outcome of the targeted Sep 29 permit decision not found. Warrant series note unchanged (GPH.WT.A, C$2.25, ~Feb 2029; verify against the TSXV notice).
- **NAK US — QUIET, binary.** No ruling after the Jun 25 oral argument; could land any day (Mining News North).
- **DDL US — QUIET, pending.** Meituan deal (~$717M for the China business) still awaiting SAMR clearance as of Aug 20; rivals complaining (Stock Titan 6-K, IonAnalytics).
- **DIDIY US — QUIET.** Q3 date unconfirmed: Nov 12 (estimate) vs late November (last year Nov 26) (Earnings Whispers).
- **3445 JP — QUIET.** Q3 report Nov 13 per TipRanks (third-party) (TipRanks).
- **BUKA IJ — NOISE.** Q3 out Oct 25–27: net loss Rp885.89B, 9M revenue Rp5.64T (Databoks).
- **CDZI US** — QUIET; Q3 date unknown, likely November.
- **SMH LN, 7912 JP, 7911 JP, IPX LN, JUP LN, 6425 JP — QUIET (nothing found).** SMH carries the AI-capex/chip read-through from Nov 3–4. Japanese H1 reports (DNP ~Nov 13, Toppan ~Nov 18, Universal Entertainment) are unverified.

- **EP059897 Pfd — UNRESOLVED.** Not identified; owner to supply ISIN/issuer. Not searched or guessed.

Group 4 — Futures / macro hedges

- **Expired contracts (see §4):** NQU6, ESU6, Z U6, WNU6, UXQ6. QCQ6 is past its Aug delivery month. YBYU6 unresolved.
- **Equities:** see §1. FTSE 100 closed Nov 3 at 10,638.43 (−1.14%) on miners and banks and US–Iran tension; BoE decision Thu Nov 5 (BBN Times). Nasdaq-100 close not found.
- **Rates:** 10-year about 4.95–4.96% at the Nov 3 close (+4–6bp), 30-year 5.33%; Nov 4 morning 10-year ~4.91% (CNBC, Fox Business). This resolves Tuesday's conflict: the 5.1% mid-October level was higher, and yields fell late in October. CME FedWatch Dec hike odds about 77–79%, up from 72–74% after a firm JOLTS (Vantage). Source-reported Fed range 3.75–4.00% (unverified; check). HYG/IEF moves not found — IEF is likely a modest gainer on Nov 4 if yields hold lower (inference).
- **Commodities (Nov 3, approximate):** Brent ~$104–105 (one source: −7.6% to $104.77 on diplomacy news; Rio Times shows $109.58, looks like an outlier), WTI ~$96.8 (Mitrade). COMEX copper ~$6.39–6.40/lb, −2.2% (one ticker showed $6.65; conflict) (Trading Economics). Gold/silver: see Group 3.
- **Uranium:** October month-end spot/term not found. Latest: Sep 30 spot $89.63, term $96.50 (Cameco); ~Nov 2 TradeTech term $97, spot ~$89.75 (Substack, low reliability). Cameco reported Q3 Oct 30 and missed on profit (Startup Fortune).
- **Week in context:** Oct 29 Alphabet's capex drop; Oct 30 Intel −28.6% and a tech rout (per earlier briefs); Nov 2 Apple/Palantir prints; Nov 3 Kospi −3.6% while US large caps held; Nov 3–4 Democratic sweep drives a futures sell-off but lower yields. Swing factor: AI-capex return versus a hawkish Fed (hike odds ~78%). Next: BoE and Tapestry Thu, payrolls Fri.

Group 5 — US large-cap core

- **PLTR — MATTERS.** See §1.
- **MAGS — MATTERS.** Apple fell about 2% on Nov 3 after a beat with weaker margin guidance (Dow drag) (Schwab); the Nasdaq snapped a three-day losing streak and chips rebounded. Nasdaq futures indicate a weak open Nov 4 (§1). Fund last quote found ~$68.75 on Nov 1 (52-week $55.09–74.78) (Robinhood); no Nov 3 NAV.
- **IBKR — MATTERS-lite (corrects Tuesday's flag).** October metrics were released Nov 2: DARTs 4.306M (−4% y/y, +5% m/m), client equity $928.6B (+19% y/y, −4% m/m), margin loans $106.8B (+31%), accounts 5.678M (+34%), commission/order $2.46. The first y/y DART decline against a +58% record comp (IBKR via FinancialContent, FXNewsGroup). Shares rose 3.0% on Nov 3 (TradingKey). Next metrics ~Dec 1.
- **TPR — MATTERS (catalyst).** FQ1 FY27 Thu Nov 5 pre-market, call 8:00am ET; company guide EPS ~$1.55 (consensus $1.48) (Finviz). One site's Nov 12 date looks wrong.
- **COST — QUIET (catalyst today).** October sales expected today per a preview (not a company notice); not yet found (ad-hoc-news). September base: net sales $30.02B (+13.0%), comps +7.6% ex-gas/FX (Costco).
- **WMT — QUIET.** FQ3 expected Nov 19 per aggregators, not company-confirmed (MarketScreener).
- **LLY, CAT — QUIET.** Nothing found in the window. LLY Q3 was reported Oct 29 (revenue $24.4B, guidance raised, per Tuesday's brief).

---

3. Probably noise

- **Silver/gold −0.4% to −1.7% on Nov 3.** Rates-driven daily wobble; levels differ by source and timestamp.

- **Intraday Palantir "−6%" headlines.** The close was about −1.7%; fundamentals beat. Watch the TCV trend, not the print.
- **Index.vn "11-6-2026" gold-down-3% item.** Dated after today; unreliable.
- **Eni and TotalEnergies Q3 coverage.** Already reported Oct 22–29.
- **Calendar-site earnings dates (Coty, Tapestry Nov 12, WMT, DIDIY).** Aggregator estimates; trust company IR notices.
- **Maersk "backup bid" for ZIM.** Undated, single-source.

Decisions to consider: (1) CEC GY: EC condition cleared, so the risk now is closing mechanics and settlement timing; (2) EULIF holders ahead of Nov 5 implementation at 0.045; (3) the post-midterm tech-futures sell-off and Dec Fed hike odds near 78% against MAGS/PLTR/SMH exposure; (4) re-establish the lapsed copper, equity-index, FTSE, Treasury and uranium hedges if intended; (5) confirm AAUC status.

5. Follow-up questions to investigate

1. **CEC GY:** When exactly does JD close, and what are settlement, delisting and squeeze-out mechanics for a holder?
2. **PLTR:** Is the TCV slowdown (+6%) a timing artefact of Sovereign AI contract length? What does remaining performance obligation say?
3. **Midterms / MAGS:** Does a Democratic sweep change tariff, AI-regulation or fiscal assumptions behind the futures sell-off, and is the 10-year decline the start of a trend ahead of the Dec 9 FOMC?
4. **Korea:** Is SK hynix's "demand exceeds twice supply" comment enough to offset AI-capex fears? What is the Nov 4 close?
5. **ZIM US:** Was the revised Hapag-Lloyd/FIMI structure formally refiled, and when does the Israeli authority respond?
6. **AAUC CN:** Did the Zijin deal close, and is the line still held?
7. **EULIF/CRML:** Do OTC ADR holders receive CRML shares automatically and on what date?
8. **PSUS / PS:** Is the Pershing Square Inc. filer related to PSUS, and what are Q3 NAV and the discount?
9. **IBKR:** Is the first y/y DART decline a one-month comp effect or a retail-activity turn?
10. **GPH:** What is the status of the Sep 29 permit target, and will China extend the Nov 10 / Nov 27 suspensions?
11. **Watchlist hygiene:** What are YBYU6 and EP059897? Which Dec-dated contracts should replace the expired futures, and what is UXQ6's true underlying?
