EM Portfolio Morning Brief — Friday, 13 November 2026

Coverage: full watchlist sweep. The window runs from the Thu 12 Nov Asia close through Fri 13 Nov, covering:

- Asia closes;
- Gulf: UAE trading only, as Saudi is shut on Fridays;
- Europe intraday;
- Brazil and US closes for 12 Nov.

Data caveat: this run again had search-snippet access only. sec.gov, infomoney, IBGE, Korean dailies, kabutan, tradingeconomics and several Indonesian hosts could not be fetched.

- "QUIET" means we searched and found nothing. It does not mean we verified that nothing happened.
- **US October PPI (08:30 ET today) was not yet indexed at writing time.**
- Conflicts between sources are flagged inline.

1. Top of the stack

1. **Nvidia's CEO is out, and the US rate shock is deepening. Together they make a double hit to North Asian tech and China internet.**
   - **Jensen Huang resigned as CEO and left the board with immediate effect on 12 Nov.**
     - CFO Colette Kress is interim CEO, and Harvey Jones becomes the first independent chair (Nvidia, 8-K).
     - CNBC's sources say the board forced him out (CNBC). The press allegations behind it are unproven.
     - **NVDA closed -4.34% at $166.19**, after trading ≈-13% at the open. AMD rose 5.9% and AVGO 5.5% (Motley Fool).
     - **Nvidia's Q3 results stay on 17 Nov.**
   - **Asia on 13 Nov:**
     - **KOSPI -0.98% to 5,290.53**, reversing from above 5,500 intraday. SK hynix fell 3.0%. Foreigners turned net sellers: ₩550bn on the KRX provisional figure, or ₩703bn per another outlet (Korea Times, Seoul Economic Daily).
     - **Hang Seng -1.55% to 23,637.60; HS Tech ≈-3%**, and about -6.5% on the week. Alibaba and Tencent each fell ≈3% (Bastille Post, Rallies).
     - **Taiex +1.35% to 43,675** after -2.63% on 12 Nov. TSMC was +≈0.4%; the exact close was not found (AP via Yakima Herald).
   - **Rates:**
     - **DXY ≈103.2, a 19-month high** (Euronext/Reuters).
     - The 30-year auction tailed at **5.441%**, with bid-to-cover of 2.36, the weakest since June (TradingView/SA).
     - The US 10-year is ≈5.1%; that comes from a single lower-tier source and is unverified.
     - A December Fed hike is ≈85–91% priced (CNBC).
   - **Exposure:** TSMC, KWEB, Prosus (via Tencent), LG Electronics pref, the Korean holdcos, and the entire EM FX book.
2. **Young Poong (000670) loses the appeal on the Korea Zinc share issue to HMG. That is one ruling won and one lost in two days.**
   - **The Seoul High Court (13 Nov) overturned the first-instance decision. It upheld Korea Zinc's ₩527.2bn issue of 1,045,430 shares to HMG Global**, finding a genuine business need and a basis in the articles of incorporation (etoday, Asia Economy, Seoul Economic Daily).
   - Young Poong says it will fight on; an appeal to the Supreme Court is expected.
   - The day before, Young Poong had won the case cancelling Korea Zinc's March 2025 AGM resolutions (FN News).
   - The stock was **+9.52% at ₩31,650 in the morning, before the ruling** (Viva100). **The post-ruling close was not found; expect a give-back.** A conflicting undated quote of ≈₩67,100 is unexplained.
   - The friendly HMG stake survives, which weakens the board-control arithmetic for Young Poong/MBK. **This is a position-review item.**

3. **Brazil: Banco do Brasil falls 8% on its Q3 miss, and the BRL sells off despite the Senate passing the fiscal bill.**
   - **BBAS3 -8.35% to R$15.48 on 12 Nov**, the worst stock in the Ibovespa and its biggest post-results drop in 18 months. It had been -12.7% at the open (Exame).
     - **Agro 90-day NPL is confirmed at 6.92%**, against 4.84% a year earlier (Genial, EBC).
     - **Cost of credit was R$21.2bn**, confirmed. The R$22.1bn figure from yesterday has no source and looks transposed.
     - Genial put its R$20.10 target under review. No post-results downgrade has been found yet. Citi (Sell, R$15) and Safra (Sell, R$19) had already cut ahead of the results.
   - **The Senate passed the main text of PLP 299/2026, 45–31.** The package is worth ≈R$50–60bn for 2027 and caps real spending growth at 2% when triggered. **Four amendments are voted Tue 17 Nov**, and then the bill goes to the Chamber (Agência Senado).
   - The market judged the package not structural enough:
     - **USD/BRL +1.6% to ≈5.652**, the weakest BRL since June 2025.
     - DI futures rose along the whole curve, with long tenors above 15%.
     - Ibovespa -0.43% to 171,324; another source has -0.64% (Money Times, O Povo).
   - **October IPCA was soft: +0.14% m/m against 0.25% consensus**, though 4.63% y/y is still above the ceiling (Suno).
   - **Negative for BLTN** through the weaker BRL and higher DI rates.
   - B3 and Cyrela results are in §2.
4. **Indonesia: the rupiah steadied and the IHSG rallied again, but a BI hike next week is now live.**
   - **IDR closed 13 Nov at 18,206, +0.18% off the record low**, on BI intervention across NDF, DNDF, spot and SBN (Kontan).
