1. Top of the stack

Hot CPI pushed the 10-year to about 5% and December hike odds to about 90%. October headline CPI rose +0.4% m/m against +0.3% expected, and core rose +0.3% against +0.2%. Shelter was +0.3%, gasoline +1% and food +0.5%. BLS published no y/y rate because of the 2025 shutdown gap (CNBC). The 10-year rose about 10–13bp to about 4.99% and briefly traded above 5%. The 2-year jumped about 17–18bp to about 4.75%, its biggest one-day rise since April 2025, and the 30-year reached about 5.35% (intraday/tracker levels; CNBC, CNN). The $42B 10-year auction went badly: it stopped at 5.020%, tailing the when-issued yield by 1.0bp; bid-to-cover was 2.46 against a 2.54 average; and indirect bidders took 61.2%, the weakest share since 2016 (RTTNews). CME FedWatch shows about 88–91% odds of a 25bp hike at the Dec 8–9 FOMC and 9–13% for 50bp. Governor Waller had said a core print of 0.3% or more could justify 50bp (Investing.com). Equities gave back only part of Monday's gains: S&P 500 7,520.93 (−0.38%), Nasdaq 25,065.87 (−0.74%), Dow 52,231.89 (−0.30%) (Washington Post). For holders, this hits the duration hedge (WNU6 has expired; check the Dec Ultra Bond) and the long-duration names (PLTR, MAGS, LLY). With cash bonds closed today, the next test is Thursday's $25B 30-year auction.

Nvidia is now a governance story, with earnings Tuesday Nov 17. NVDA fell 5.5% on Tuesday to $168.80, about −17.5% over five sessions (Yahoo Finance, Fast Company). On Nov 8 the board opened an independent investigation into reports linking Jensen Huang to an alleged Chinese spy at Megaspeed, and on Nov 10 it hired Wachtell Lipton to run it (CNBC, CNBC). A federal probe is reported, and a securities class action has been filed in San Jose (CNBC). Korean memory is trading as if the issue is about people, not demand. Kospi closed +2.60% at 5,375.36 today after +4.39% Tuesday, with SK hynix about +5.4% and Samsung Electronics about +3.3–3.6% (Seoul Economic Daily, TechFlow; both unverified). Nov 17 is the decisive date for 000660, 005930, SMH, MAGS, ALGM and 3445.

COST: $30 special dividend (about $13.3B) and a $4B buyback reauthorization. Record and ex-date are **Nov 24** and payment is Dec 4. The stock closed at $1,066.14 and rose about 1.6–2% after hours (Costco IR). This is a cash return of about 2.8%. Expect the price to open about $30 lower on Nov 24, and check how any hedges or options on COST adjust.

CEC GY: JD.com settlement expected around Nov 12, then a delisting offer. All closing conditions are met after the Nov 3 EU FSR clearance. Secondary sources say JD.com targets closing and settlement around Nov 12 (unverified; Rapporteur, Newsquawk). JD.com has said it will not pursue a domination agreement (reportedly for three years) and that a delisting offer may follow soon after completion. Minorities holding the remaining roughly 15% should decide whether to wait for that offer or exit in the market near €4.60.

China extended its battery and graphite export-control pause to Jan 10, 2027 (GPH CN). MOFCOM said on Nov 9 that the suspension of Announcement No. 58 (lithium-battery and artificial-graphite anode materials) and related measures continues from Nov 11 to Jan 10, 2027 (Oriental Daily; unverified, snippet). This settles last week's Nov 10 date question. A separate pause on graphite dual-use exports to the US (No. 72), reportedly due to expire Nov 27, does

not appear in the extension list; its status is unverified (Crux Investor). A longer pause takes some urgency out of the US-sourced graphite story.

2. What matters, by group

Group 1 — Rails / shipping / financials

- **CEC GY — MATTERS (mechanics).** See §1. FY results are due Dec 14.
- **BHF US — QUIET, watch item.** No amendment 8-K, termination or state approval was found in the window. Best's News reported on Nov 6 that extension talks are under way (paywalled, headline only; AM Best). Delaware, New York and Massachusetts approvals are still pending and will not come by the **Dec 6 outside date**; HSR, CFIUS and FINRA are done (10-Q). Termination fees are reportedly $226M payable by Aquarian and $143M payable by BHF (unverified). No current price or spread was found.
- **ZIM US — QUIET; Q3 results Wed Nov 18 pre-market, call 8:00 ET** (confirmed by ZIM IR). Nothing new on the Israeli review. Hapag-Lloyd said in late September it would finalize the revised structure within about 45 days, which points to around now. A revised deal needs new board approvals and a fresh filing (Seatrade, Container Magazine). If the Israeli state blocks the bid, no $160M break fee is payable, which is a key downside asymmetry.
- **NSC / UNP — NOISE (procedural).** An STB order dated Nov 4 requests more documents on possible influence over shipper participation, and BNSF filed a reminder of the deadline on Nov 10. Public comments are due **Nov 18**, and a UP/NS reply to a CPKC request is reportedly due Nov 19 (single German source, unverified; ad-hoc-news).
- **ALTI US — NOISE (follow-up).** The Q3 call added a new $85M credit facility to fund advisor hiring and guided to a $20–23M non-cash Q4 loss on the stake in a European equities manager. Nancy Curtin is still interim CEO (Motley Fool transcript, GuruFocus). No share reaction or analyst action was found.
- **AAUC CN — QUIET / minor positive.** Kurmuk first gold pour is reported for Nov 9 (aggregator, unverified; Panabee). Allied is weighing a 2027 base dividend and an NCIB for up to 10% of float, which still needs TSX approval (Miningmx). Gold's −2.1% move on Tuesday is a headwind.

Group 2 — Luxury / consumer / Korea / autos / energy / alternatives

- **005930 KS / 000660 KS — MATTERS.** See §1. Tuesday's closes were ₩198,900 (+4.74%) and ₩1,212,000 (+6.69%) (FinanceFeeds). Kospi is still about 40% below its June peak above 9,000, which reconciles the "8,000+" figures flagged as suspect yesterday. No direct HBM link to the Nvidia probe was found. The HBM4 8-high mix shift reported in late October is the older demand-side issue (Wccftech).
- **034730 KS SK Inc / 028260 KS Samsung C&T / 051910 KS LG Chem / 373220 KS LGES — QUIET.** These move with the Kospi. LG Chem's Oct 28 price-return swap on 6.54M LGES shares at ₩382,500 cut its stake to about 76.6% (Stockopedia).
- **ENI IM / REP SM / TTE FP — MATTERS via oil.** Brent settled about $91.49 (−1.17%) and WTI about $86.04 (−0.93%) on Tuesday, Brent's lowest settle since August. Brent traded briefly below $90 after Trump said military action against Iran was "not necessary at this point" (FinanceFeeds). Oil rebounded today, with Brent at $92.53 at 04:20 GMT, as attacks on Hormuz shipping offset truce hopes (The Star/Reuters). European energy lagged on Tuesday (Shell −2.1%). No stock-specific news.

- **Europe context.** Stoxx 600 closed about 658.32 (+0.3%), within 2 points of its August record, helped by an ECB official's hint at a December hike (Irish Times). The Euro Stoxx 50 closed 6,327.87 (+0.59%; MarketScreener), which is the MSE FP proxy.
- **CDI FP / MC FP — QUIET (structural).** The only item was a routine LVMH buyback disclosure (GlobeNewswire). The Dior and Agache EGMs are planned for December, AMF waivers are still needed, and the follow-on offer is indicated at **€469.05 per Dior share** in Q1 2027 (Investing.com FR). No EGM notice or AMF ruling yet.
- **EULIF US / CRML — QUIET, mechanics open.** Holders get 0.045 CRML per European Lithium share. European Lithium left the ASX on Nov 6 and is seeking delisting from Frankfurt and the OTCQB. Post-deal CRML has 194.2M shares and about $264.5M cash (Finviz). No EULIF OTC conversion notice or CRML price was found.
- **VOW GY / P911 GY / 8TRA GY — NOISE.** Traton rose about 1.8% to €35.17 after the US approved International Motors' Section 232 content application (ad-hoc-news, unverified). A block sale of VW's Traton stake, cutting it to 75%+1, is possible at any time. Porsche SE booked a 9M loss on a write-down of its VW stake (Quartz, unverified).
- **COTY US — QUIET, event risk.** The consumer beauty strategic review is due by end-2026 (Cosmetics Business). **IPAR / ITP FP:** Q3 sales were $430M, flat, with about $10M of giftsets shifted into Q4 (Premium Beauty News). **PUIG SM:** nothing found.
- **GENT MK — NOISE.** Maybank upgraded its ESG score (GGRAsia). RAM sees net debt rising to about MYR35bn by 2028 (AseanGaming). The Genting Malaysia offer at RM2.35 is unconditional and closes Nov 24 or Dec 1 (unverified). Q3 is due about Nov 19–26 (unconfirmed). **GENS SP:** no Q3 found; check SGX.
- **EXO NA / RACE IM — QUIET.** Ferrari is buying back stock at about €355–374 (Finviz).
- **ALGM US / 6707 JP — QUIET.** ALGM is showing 48V products at electronica, Nov 10–13. **Ignore** an AK&M item dated Nov 7 about a roughly $6.9bn onsemi bid; it repeats the 2025 bid that was withdrawn (Yahoo).
- **9433 JP KDDI / 9432 JP NTT — QUIET (results now found).** NTT's H1 operating profit fell 12.2% to ¥830bn on a prior-year one-off, and FY OP guidance was raised to ¥1.73tn (NTT). KDDI's H1 revenue rose 4.7% and OP 0.8% to ¥559bn (BusinessNetwork).
- **PSH LN / PSUS US — QUIET.** NAV was $78.89 at Oct 31 (October +3.0%, YTD −6.9%; PSH). The weekly NAV is due today.
- **NPN SJ / PRX NA — QUIET.** The Prosus buyback continues (€80.9M for Oct 26–30; EuropaWire). Interims are due about **Nov 24** (unconfirmed; TipRanks). The Tencent Q3 date is unconfirmed but probably mid-November.
- **MF FP Wendel — QUIET, dividend.** The €2.55 dividend goes ex Nov 17 or 18 (sources differ) and is paid Nov 19. Investor Day is Dec 2, and the deputy CEO leaves Nov 30 (MFN).
- **BX US / PGHN SW / IPRV LN — QUIET.** KKR's record Q3 is a supportive read-across (Investing.com). Partners Group investors vote this week on splitting a €6.6bn evergreen fund (unverified; boerse-global).
- **INDUA SS — QUIET.** NAV was SEK 509 at Oct 31 (Inderes). **BVI FP — QUIET.** It is near €30.22 resistance (Idéal Investisseur).
- **QCQ6 copper — EXPIRED** (see §4). COMEX traded about $6.22/lb on Nov 10. It fell about 3.5% in the week to Nov 6, and COMEX inventories reached a record 790kt (SMM).

Group 3 — Small/mid-cap & special situations

- **GPH CN / GPH-WA — MATTERS (policy).** See §1. No company news. Q3 is due about Nov 13 (unconfirmed).
- **SMH LN — MATTERS.** SOX rose about 7% on Nov 9 while NVDA fell (CNBC) and slipped about 0.35% on Nov 10 after CPI (Benzinga). SMH fell about 20% in the week to Nov 5 (24/7 Wall St).
- **SLV / SIL / VZLA — MATTERS (metals down).** After CPI, silver fell 2.8% to $51.92 and gold 2.1% to $4,053 (USAGOLD). Silver is down about 15% over a month (Trading Economics). VZLA has no company news.
- **7911 JP TOPPAN — H1 Nov 13** (sector calendar; Gyokai Digest). **7912 JP DNP:** H1 around Nov 13–14. **3445 JP RS Tech / 6425 JP Universal:** Q3 about mid-November (inferred from prior years).
- **DDL US — QUIET, binary.** No SAMR decision. Q3 is due about **Nov 19** (unconfirmed; Earnings Whispers).
- **DIDIY — QUIET.** Q3 is more likely Nov 26–27 than Nov 12, based on the prior-year Nov 26 date.
- **NAK US — QUIET, binary.** The Pebble ruling is expected by end-2026 (Quantisnow).
- **CDZI US — QUIET.** Pipeline-permit litigation continues (Earthjustice). Q3 is due about Nov 12–14 (inferred).
- **BUKA IJ — QUIET.** Kontan reports an MSCI review of Indonesian market access, a market-wide overhang (unverified; Kontan).
- **LIO LN — QUIET.** The GEL 3.25 dividend's FX reference window is Nov 30–Dec 4 (AJ Bell). **IPX LN:** FY results are due about Nov 26–Dec 1 (last year Dec 1; ticker.app). **JUP LN:** QUIET (Q3 AUM was a record £75.9bn; Investment Week).
- **EP059897 Pfd — UNRESOLVED.** Searches found nothing; it needs a Bloomberg or CUSIP lookup by the owner.

Group 4 — Futures / macro hedges

- **Rates:** see §1. The **30-year auction is Thu Nov 12**, and cash bonds are closed today. **HYG / IEF:** no daily data found. The rate move implies IEF fell on Nov 10 (inferred).
- **FTSE 100:** 10,751.59 (−0.3%) on Nov 10, with gold and energy miners weighing (Share Talk).
- **Uranium:** about $91.14/lb on Nov 9 per trackers (ANS). TradeTech's long-term price reached a record $99.00 on Oct 31 (Crux Investor). No UxC print in the window.
- **Week in context:** Nov 5 brought the post-election AI-capex selloff (SOX −12%). The Nov 6 jobs surprise lifted hike odds. Nov 9 saw a +2.35% relief rally on oil and Iran. On Nov 10, hot CPI, a weak 10-year auction, the 10-year at about 5% and Nvidia −5.5% ended it. Asia ignored the US wobble on Nov 11 (Kospi +2.6%). The market now prices a December hike as near-certain, and the open question is 25bp or 50bp.

Group 5 — US large-cap core

- **COST — MATTERS.** See §1.
- **CAT — MATTERS (moderate).** It fell about 2.4–2.7% to about $584.57, and target cuts continue (Morgan Stanley $675, Evercore $833). Backlog is a record $78B. The Anthropic 1.7GW gas-generator order now has a second source, which reports Anthropic took over an order originally placed by OnePWR (TradingKey). That remains secondary sourcing.
- **LLY — NOISE.** It rose about 1–1.5% to about $1,423 after Jefferies set a Street-high $1,700 target (MarketBeat). **Ex-dividend $1.73 on Nov 13.**
- **WMT — NOISE ahead of the catalyst.** Targets were raised ahead of FQ3 on **Nov 19**: UBS $149, BMO $136, Mizuho $135 (TipRanks). Walmart is investigating alleged kickbacks of about $15.7M at Flipkart.

- **PLTR — NOISE.** It closed $168.82 (−0.2%). Commentary flags defense-budget risk under a Democratic Congress (Motley Fool).
- **MAGS — NVDA-driven.** It is an equal-weight Mag 7 fund, so it carries Nvidia's −5.5% and the Nasdaq's −0.74%.
- **IBKR — QUIET.** October DARTs were 4.306M (+5% m/m) and accounts 5.678M (+34% y/y) (StreetInsider). Higher rates help net interest income. Ex-dividend Dec 1.
- **TPR — QUIET.** Nothing new since the Nov 5 beat-and-raise.

---

3. Probably noise

- **"onsemi bids $6.9bn for Allegro" (AK&M, dated Nov 7).** It recycles the March 2025 bid, withdrawn in April 2025. Not new.
- **Fed hike odds of "99%" (one Investing.com item).** It is an outlier against the 88–91% FedWatch readings.
- **10-year "above 5%".** That was an intraday print. The auction stopped at 5.020%, and the closing level was about 4.99%.
- **FTSE 100 close of 10,789.51 (Investing.com).** It conflicts with 10,751.59 elsewhere; use the lower print until it is confirmed.
- **Genting Berhad ESG upgrade, Prosus/LVMH routine buyback filings.** Housekeeping.
- **Wall Street target hikes on WMT and LLY.** These are positioning ahead of known catalysts, not new information.

Decisions to consider:

1. **Duration hedge:** with the 10-year at about 5% and a weak auction, check whether the expired WNU6 was rolled into Dec Ultra Bonds. The roll window opens with first notice on Nov 30, and Thursday's 30-year auction is the next stress test.
2. **AI beta into Nvidia Nov 17:** consider sizing in SK hynix, Samsung, SMH, MAGS and ALGM. Korean names have rallied about 7–12% in two days while NVDA fell about 17.5% in five.
3. **COST:** adjust for the $30 special dividend ex-date of Nov 24 on any options or hedges.
4. **CEC:** decide on the residual stake ahead of the expected delisting offer.
5. **BHF:** weigh spread against time value as Dec 6 approaches.
6. **Futures housekeeping:** decide on the expired copper and uranium contracts.

---

5. Follow-up questions to investigate

1. **Rates:** Does Thursday's 30-year auction tail like the 10-year did, and is the weak foreign/indirect demand (61.2%) a trend? Does BofA's 50bp call gain followers?
2. **Nvidia:** What does the Wachtell review cover, will Huang brief Congress, and does management address it on Nov 17? Is Korean memory's rally pricing in a clean print?
3. **CEC:** Did settlement occur on Nov 12, and what are the price and timing of the delisting offer?
4. **ZIM:** Has the revised Hapag-Lloyd/FIMI structure been filed in Israel, and what is the current spread to $35? Q3 is on Nov 18.
5. **BHF:** When is the outside-date amendment filed, and on what new date and terms?
6. **GPH / graphite:** Was the US-specific dual-use pause (No. 72, Nov 27) also extended?
7. **COST:** Does the $13.3B special dividend signal lower buyback intensity, and how will options on COST be adjusted?
8. **CAT:** Is the Anthropic 1.7GW order confirmed by Caterpillar?
9. **Oil:** Do Hormuz shipping attacks reverse the Iran-deal discount, and where do ENI/REP/TTE settle?
10. **Watchlist hygiene:** What are YBYU6 and EP059897? Remove the CRML option, update the AAUC and EULIF labels, and roll the expired futures.
