GGOF Portfolio Brief — Thursday, October 29, 2026

Covers Wed Oct 28 through Thu Oct 29 morning. ***Source caveat:*** *web search is US-only and thin on same-day items; many pages could not be fetched, so most claims rest on search-result summaries rather than primary filings. "QUIET" means nothing found in the window, not that nothing happened. Items marked (unverified) rest on one source, an undated snippet or conflicting sources. Caterpillar, Lilly, Allegro and Repsol report this morning and results were not yet indexed.*

1. Top of the stack

Hawkish hold at the Fed, and Alphabet is down ~10% after hours. The FOMC held at 3.75–4.00% on Oct 28 (Warsh's first press conference as chair), 10–2, with Cook and Hammack dissenting in favor of an immediate 25bp **hike**; the range reflects the Sept 16 hike (CNBC takeaways, Kitco). This resolves yesterday's open question on the policy range. Warsh gave no forward guidance; a December 9 hike remains live but I found no post-presser FedWatch number. The 10-year closed about 5.02–5.03% (sources differ; unverified), the 30-year ~5.33% intraday. Indices rose for a third day: S&P 500 7,743.98 (+0.28%), Nasdaq 26,549.85, Dow 52,475.10 (Motley Fool, Xinhua). Hedge review (WNZ6, IEF, ES/NQ) should account for a 5% 10-year plus a hike-leaning committee.

Megacap prints split. Alphabet Q3: revenue $127.6B (+25%), Cloud $30.7B (+103%), but capex $51.4B, 2027 capex "significantly" higher (CNBC says above $300B), FCF about −$9.1B and an EPS miss reported; shares about −10% after hours (CNBC, StockTitan; EPS basis conflicts, unverified). Microsoft FQ1: revenue $92.28B (+19%), EPS $4.89 vs ~$4.73, Azure +48% vs ~44.8% expected, capex below forecast, shares +3–5% after hours (CNBC, investingLive). Net for MAGS is offsetting; Amazon reports today after the close (Amazon), Apple Nov 2 (9to5Mac). A 2027 capex number above $300B is a positive read for the semis and Korea memory complex and a pressure point on hyperscaler FCF.

SK hynix and Samsung both delivered record quarters. SK hynix reported Oct 28: revenue KRW 104.6tn (first quarter above 100tn), operating profit KRW 83.3tn (79.7% margin), ~9% above the 76.3tn consensus; DRAM/HBM said sold out through 2029; a shareholder-return package of about KRW 100tn is reported but its components sum to 90tn, so verify (Seoul Economic Daily, Ajupress). Stock move conflicts (+4% to +10%). This also settles yesterday's Oct 28 vs 29 question and the "Dalian approval" headline remains unchecked. Samsung Electronics final Q3 (Oct 29): sales ~KRW 195.3tn, operating profit ~107.4tn (in line with guidance), HBM4 revenue >3x QoQ, record capex KRW 84.4tn, Q3 cash dividend KRW 4,601/share (~KRW 30tn, payable November), with 55–75tn of the 90–110tn 2026 return still to be detailed by end-January (Samsung, Asiae, FN News). Read-through positive for SK Inc, ALGM, SMH and RS Technologies.

EUR/CRML: record date is today; schemes effective. Shareholders approved Oct 22, the WA Supreme Court approved both schemes Oct 26, the schemes took effect Oct 27 and EUR was suspended from ASX at that day's close. Record date Oct 29, implementation **Nov 5**, EUR delists from ASX 10:00am AEDT **Nov 6**. Ratio **0.045** CRML per EUR share (subject to rounding), with a sale facility for holders of ≤50,000 securities (Kalkine suspension, Kalkine approval, InvestingNews). I did not open the ASX notices; how the EULIF OTC ADR is converted still needs broker confirmation.

Volkswagen 9M confirms the Porsche hit; Puig sets "Vision 2032". VW (Oct 29): operating result ~€0.1bn vs €5.4bn, special items €8.7bn (€7.8bn in Q3) including a €6.4bn Porsche goodwill impairment and ~€1bn China impairments; Q3 operating loss ~€5.8bn; FY guidance kept (RoS up to 1%) (VW, Investing.com, Il Sole 24 Ore); largely pre-announced Sept 18. Puig CMD (Oct 28): net sales >€8bn by 2032 (from €5.04bn in 2025), adj. EBITDA margin >22.5% (20.7%), FCF >€900m, 40% payout, mainly organic (FashionUnited, WWD); market reaction not found.

Group 1 — Rails / shipping / financials

Search found nothing dated Oct 28–29 for any of these names.

- **CEC GY (Ceconomy) — MATTERS (catalyst ahead).** EC Foreign Subsidies Regulation decision on JD.com reportedly due **Nov 4**, approval expected after improved remedies, single Reuters-sourced report (Euronext/Reuters, TechNode). Germany cleared with data conditions; Austria and Spain FDI reviews reportedly pending (SCMP). One source mentioned Oct 23; treat Nov 4 as the date to verify on the EC site.

- **ZIM US — QUIET.** Hapag-Lloyd $35 cash, FIMI to take an Israeli carrier holding the golden share (Globes); no news on Israeli GCA approval status. Q3 date unannounced; last year mid/late November (inference).
- **BHF US — QUIET.** Shareholders approved Feb 12 (BusinessWire); DE/NY/MA approvals not reported; outside date Dec 6 per yesterday's 10-Q finding. Q3 release probably ~Nov 5–6 with no call (inference from 2025).

Group 4 — Futures / macro hedges

All dated futures on the watchlist are expired or past delivery (see §4); levels below are cash proxies.

- **NQ / ES** — MATTERS. Nasdaq Composite 26,549.85, S&P 7,743.98 (§1). Futures this morning: no quotes found; Alphabet −10% after hours is the drag.

- **WNU6 / IEF** — MATTERS. 10-year ~5.02–5.03% (unverified), 2-year ~4.71%, 30-year ~5.33% intraday. The 10-year hit 5.23% on Sep 28, the highest since 2007.

Week in context. Oct 22–23 AI selloff with oil at $113–117 and a 5% 10-year; Oct 23 gold −2.8%, silver −5.9%; Oct 26–28 three straight up days (S&P 7,623.68 → 7,676.77 → 7,722.60 → 7,743.98). Oil plus a 5% 10-year and a hike-leaning Fed are the headwind; AI capex is the swing factor and today's Alphabet reaction tests it. Still to come: Amazon today, Apple/Palantir Nov 2, Nov 3 midterms.

Group 5 — US large-cap core

- **CAT US — MATTERS today.** Q3 pre-market, call 8:30am ET; no results indexed. Consensus EPS ~$7.04–7.12, revenue ~$20.6–20.8bn; ~$600m tariff cost guided; shares closed $713.31 on Oct 27 (+3.1%) after ~−15% over the prior month (Caterpillar, 24/7 Wall St).
- **LLY US — MATTERS today.** Q3 call 10am ET; no results indexed. Revenue consensus ~$22.4–22.6bn; EPS consensus conflicts across sources (yesterday: $5.4 / $7.0 / $9.8) because of acquired-IPR&D charges; watch Foundayo (oral orforglipron) and the $85–87bn guide (Hudson Labs).
- **MAGS US — MATTERS.** NAV 70.09 on Oct 23 (Roundhill). GOOGL ~−10% and MSFT ~+3–5% after hours roughly offset; META fell ~7% to $648.85 on Oct 22 after its print (incl. a $9.89bn legal charge); AMZN today after close.

---

3. Probably noise

- **Porsche AG 9M** — out Oct 27, outside the window; expected after VW's Sept 18 pre-announcement.
- **VW's €8.7bn special items** — mostly pre-announced; the news is the Q3 operating loss, not the impairment.
- **Eni and Blackstone Q3** — out Oct 22–23 and priced.
- **LGES KRW 756bn headline** — 45X subsidy credit inflates it; consensus ex-subsidy was the comparison.
- **Conflicting 10-year closes (5.00 / 5.015 / 5.03%) and Brent prints ($111.64–116.37)** — source and contract differences.
- **Stale TradingView "HG ~$4.30" copper quote** — mis-scaled; ignore.
- **Single-analyst CRML allegations (Panabee)** — unverified, not acted on.

5. Follow-up questions to investigate

1. **Fed:** What are December hike odds after the presser, and how do WNZ6, IEF and HYG react to a 5% 10-year with two hike dissents?
2. **Alphabet:** Is the EPS miss real or a basis difference ($2.67 vs $3.02 vs $2.12), and does a 2027 capex above $300bn help or hurt the semis and MAGS?
3. **SK hynix:** What is the true shareholder-return breakdown (KRW 100tn headline vs 90tn components), the real stock reaction, and the "Dalian approval" headline?
4. **Samsung Electronics:** How will the remaining KRW 55–75tn be split between dividends and buybacks, and what is the 2027 policy?
5. **EUR/CRML:** How is the EULIF ADR converted, and is any action needed before record or implementation date?
6. **Genting:** Will the Genting Singapore S$1.63bn and Genting Berhad RM1.25bn rights issues land together, and when are the EGMs?
7. **Caterpillar and Lilly (today):** Results, guidance, and which Lilly EPS basis was used.
8. **Ceconomy:** Is Nov 4 the true EC date, and have Austria and Spain cleared?
9. **UNP/NSC:** What are the STB filing-window dates, and what does BNSF/CN opposition imply for timing?
10. **Dingdong:** Did SAMR clear and the Meituan sale close?
11. **Puig:** Market reaction to Vision 2032, and the outcome of the Estée Lauder talks.
12. **Dior SE:** Terms and timing of the reported Arnault holding reorganization.
13. **Unresolved identifiers:** EP059897 Pfd, YBYU6, GPH-WA series.
