

UK Asset-Manager Executive Pay — Structure & Quantum Comparison

CEO & CFO base salaries · annual bonus and LTIP structures · latest AUM · Liontrust (LIO) benchmarked vs. IPX · PMI · JUP · POLR · As at 23 July 2026

Peer set — five UK-listed active managers, with **Liontrust (LIO LN)** as the anchor. The shared template is a **modest base + heavily deferred / share-based variable + a 3-year LTIP with a 2-year post-vest holding period**. The real differentiators are the *depth* of bonus deferral, the presence of a fund-manager profit-share pool, and whether *net flows* are directly rewarded.

How to read this

- **Fixed pay** — **Liontrust is the outlier**. Its CEO base (£584k) is the highest of the group — above Jupiter (£484k, ~4× the assets) and roughly double Impax (£300k) / Premier Miton (~£350k).
- **Ceilings** — **where disclosed, Liontrust tops the list**. LIO's maxima (450% bonus + 350% LTIP ≈ **800% of salary**) exceed Jupiter's (425% + 375%), despite Jupiter being far larger. A framework anchored to a bigger firm than LIO now is.
- **Structure** — **similar template, different alignment**. All run 3-yr LTIPs with a 2-yr hold. Differentiators: LIO's **100% bonus deferral**; Polar's **fund-manager profit-share**; Impax's **bonus into own funds** — “skin-in-the-game” features LIO lacks at ED level.
- **Flows** — **only Polar rewards them**. AUM is diverging (POLR £45bn and JUP £74bn growing; LIO £19.6bn, IPX £23.3bn, PMI £8.6bn in outflow), yet **only Polar's LTIP** carries a direct net-flows metric.

Caveat & sources: filing-hosting sites and financial-news domains were not directly retrievable in this environment (egress policy / 403); figures are from search-surfaced summaries of the firms' latest annual reports / Directors' Remuneration Reports and AUM RNSs, plus aggregators (Simply Wall St, TipRanks, Investigate, Citywire, Portfolio Adviser, Investing.com, MarketScreener), and should be confirmed against each company's report before use. Latest-AUM RNSs: Liontrust FY2026 (Jun-26); Impax Q3 (30 Jun-26); Premier Miton Q3 (30 Jun-26); Jupiter H1-26 / CCLA; Polar Capital AuM update (30 Jun-26). Bonus/LTIP maxima confirmed for LIO and JUP (policy); *n/d* for IPX, PMI, POLR.
