GGOF Portfolio Brief — Monday, October 26, 2026

Covers Fri Oct 23 through Mon Oct 26 morning (the weekend), plus corrections to the Oct 23 brief. ***Source caveat:*** *the search tooling returned mostly summaries, not primary filings, and surfaced almost nothing dated Oct 24–26 for individual names. "QUIET" means no news found in the window, not that none exists. Items marked (unverified) rest on one source, a snippet, a stale page or conflicting sources. Several pages could not be fetched. Every factual claim carries a link.*

1. Top of the stack

SK hynix may report tomorrow, not Thursday. The Oct 23 brief had Q3 on Oct 29. A Korean report from Oct 9 says Q3 results and details of additional shareholder returns come "on the 27th" (Segye Ilbo); no source I found confirms Oct 29 (a calendar-style source says Oct 28, probably the ADR listing). Treat Tue Oct 27 as the best-supported date and check the company IR notice. Consensus operating profit is about KRW 77–78tn (Money Today); DS Investment is lower at KRW 70tn (TrendForce, snippet). The August KRW 40tn buyback-and-cancellation programme is expected to be topped up with Q3. This is the key read-through for SK Inc., Samsung Electronics, SMH and ALGM (Oct 29).

Oil and rates are the macro headwind, and the numbers in the last brief need fixing. Brent settled at **$116.72 on Fri Oct 23**, a six-month high; $113.17 was Thursday's settle (CNBC). Brent was about $114.60 Monday morning after weekend Houthi claims on Yanbu and Rabigh, as Qatari mediators reached Tehran (FinanceFeeds, Discovery Alert). The 10-year yield is about **5.00%** (4.999% Friday after a 19bp drop Thursday), not 5.1%; the 30-year is 5.31%, and the fed funds rate is 3.75–4.00% after a September hike (CNBC). Friday's closes: S&P 500 −0.52% to 7,623.68 and Nasdaq Composite −0.21% to 25,955.34 (Kiplinger, snippet, unverified). Sunday-night futures were slightly up after Trump ruled out an Iran strike (Benzinga). For the book: Treasury longs (WNZ6, IEF) and the equity hedges are exposed to the same week.

Event cluster this week. FOMC statement Wed Oct 28 at 2:00pm ET, Warsh press conference 2:30pm; a hold is expected (~88%) with a December hike priced at roughly 71–80% (CNBC, Schaeffer's). Microsoft and Alphabet report that evening, Amazon Thursday after the close. Correction: **Meta already reported on Oct 21** (revenue $64.6bn, +26%, 2026 capex raised to $135–145bn) (CNBC). On Thursday Oct 29 also expect Caterpillar (5:30am CDT), Lilly (10am ET call), Repsol, TotalEnergies, Allegro, advance Q3 GDP and core PCE (Caterpillar, Lilly).

Ceconomy / JD.com: the EU deadline is Nov 4, not Oct 23. Several sources put the Commission's foreign-subsidies decision deadline at Nov 4 (Retail Insight Network, search summary) after JD strengthened its remedies; I found no explicit extension notice and no reported decision. A Reuters-sourced report said JD "is set to win EU approval" (Euronext). Austrian and Spanish FDI reviews are reportedly still open (SCMP), and an aggregator cites a Nov 10 long-stop (unverified, Parqet). Practical read: the decision is a Nov 4 event, and the long-stop leaves little slack after it.

European Lithium → Critical Metals: court hearing today, ratio is 0.045 not 0.035. EUR holders approved the schemes on Oct 22 at 99.96% (Kalkine). The WA Supreme Court's second hearing is Oct 26; effectiveness Oct 27 (EUR suspended at close), record date Oct 29, implementation Nov 5, new CRML shares trade and EUR delists Nov 6 (StockTitan). The Aug 19 amendment made the ratio float with CRML's 20-day VWAP: 0.045 at or below $8.00,

0.025 at or above $16.00 (Fool AU); coverage of the vote states 0.045 (Manila Times). The court outcome is **unverified**: one aggregator says approved (rallies.ai), all others say pending. Check the ASX release.

2. What matters, by group

Group 1 — Rails / shipping / financials

- **CEC GY (Ceconomy) — MATTERS.** See §1. Bundeskartellamt has cleared and German FDI cleared with data-protection conditions (SCMP). JD holds 59.8% plus Convergenta's 25.4% (EQS). Residual risk: China's Aug 19 order telling domestic entities not to cooperate with the EU probe (date unverified, DealStreetAsia). No live spread found.
- **ZIM US — MATTERS, slow burn.** No new event found. Hapag-Lloyd and FIMI's revised structure cuts the golden-share foreign-holding trigger from 24% to 10%, adds a Far East route, puts all 16 ZIM Israel ships at government disposal and lists ZIM Israel only in Tel Aviv (Globes, Maritime Executive). Israel's GCA closed its review of the original structure (Container News). Conditions-precedent deadline Feb 2027 (unverified, Calcalist summary). The Q2 release says the deal still awaits regulatory approvals (ZIM). No Q3 date found.
- **BHF US — QUIET (live).** Remaining conditions are Delaware, New York and Massachusetts insurance approvals; HSR, CFIUS, FINRA and the Feb 12 shareholder vote are done (10-Q). Outside date auto-extended to Dec 6. No approval news. Q3 results estimated ~Nov 6 (unconfirmed).
- **UNP / NSC — QUIET.** Each NSC share converts to 1 UNP share plus $88.82 cash; $2.5bn break fee (NSC 10-Q). NSC filed its Q3 10-Q (filing, excerpt only; merger expenses higher). The STB unanimously denied dismissal requests on Sept 22 (single aggregator, Autobound). Close expected 2H 2027. The Dec 3 milestone cited last time is not re-verified.
- **AAUC CN — QUIET.** Latest items are August (AGM, Q2, a board appointment) (StockAnalysis). The watchlist note is stale: the Zijin takeover was terminated Jul 29 per the prior brief. Q3 date not found.
- **ALTI US — QUIET.** No news found. Last year's Q3 came Nov 12 (ALTI IR); expect a similar date (inference).

Group 2 — Luxury / consumer / Korea / autos / energy / alternatives

Real news

- **ENI IM — MATTERS (positive).** Q3 on Fri Oct 23: adjusted net profit EUR 2.8bn (~+120% YoY) versus ~EUR 2.48bn expected; extraordinary dividend EUR 0.46/sh (ex Dec 7, paid Dec 9); 2026 buyback raised from EUR 3.4bn to 3.8bn; ordinary dividend EUR 1.10; operating cash flow guidance raised to EUR 16.5bn and production growth to +6–7%. Shares were up ~3.8% intraday (AGI, Milano Finanza, Teleborsa). Consensus figure from a preview (Forbes IT). Read-through is good for TTE and REP with Brent at $115+.
- **GENT MK (Genting Berhad) — MATTERS (negative); missed in the last brief.** Oct 9: renounceable rights issue of ~RM1.25bn (~US$306m), RM800m to repay debt due within 12 months; Lim family entities undertake 45.1% of proceeds, price at a 25–30% discount to TERP (The Star). Shares fell 22.9% to RM1.45 on Oct 12, the lowest since 2007, hitting limit-down (The Star). CreditSights sees leverage down only 0.2–0.3x to ~4.3x, and S&P has flagged "fallen angel" risk (The Star). EGM date, final price and ex-date not yet fixed as of Oct 15; completion targeted Q1 2027.
- **BVI FP — MATTERS (positive); the last brief had it QUIET.** Q3 reported Oct 21: revenue EUR 1,569.7m, +10.1% total and +6.2% organic; 2026 guidance confirmed; 2027–28 target raised to a double-digit revenue

CAGR at constant currency (Idéal Investisseur, release). Restated 2025 base differs across sources.

- **BX US — MATTERS, slight miss (low confidence).** Q3 distributable earnings $1,715.7m (−9% YoY), ~$1.32/share (inferred from table) versus ~$1.36 forecast (8-K, Benzinga). No stock reaction found. Dividend record date Nov 2. Read-through to IPRV and PGHN.
- **000660 KS (SK hynix) — MATTERS, imminent.** See §1.
- **005930 KS (Samsung Electronics) — MATTERS Oct 30.** Preliminary Q3: KRW 195tn sales, KRW 107.4tn operating profit (Samsung). Full results/call listed Oct 30 (AJ Bell); TipRanks says Oct 29 (estimate).
- **VOW GY — MATTERS.** Q3 deliveries 1.885m (−14.3%), China −38.5% (Trading-Treff); 2026 delivery guidance −3% to −7%. Results date of Oct 29 comes from the prior brief and is **unverified** (VW page not fetchable).
- **8TRA GY — mild positive.** Prelim Q3 unit sales 78,900 (+10%) on US strength (VW Group); 9M report due Oct 28 (search summary, Vermögenszentrum).
- **EULIF / CRML.** See §1. The Aug 21 $12.50 call has **expired** (not freshly re-verified; remove). Independent expert found the share scheme unfair on a control basis, though the court allowed the meetings (The Lawyer Mag). Implied EUR value ~0.045 × CRML (my arithmetic; roughly $0.27–0.31 at $6–7; no current CRML price found).
- **QCQ6 / copper — QUIET to mild.** Aug contract has passed delivery; Dec (HGZ6) was ~$6.48–6.50/lb Friday (one recap +1.78% at $6.476, Cappnotes; official CME settle unverified). Dec first notice 11/30, expiry 12/29 (Barchart), so no roll urgency.

Quiet names (status lines)

Gold closed ~$3,996, its first close under $4,000 since mid-July (snippet, FinanceFeeds). Silver is down ~11% from ~$60.90 on Oct 1 and ~55% below the January record of $119.51. Driver: oil and higher-for-longer rate expectations (Trading Economics). Thursday's move is unverified (sources conflict). No SLV/SIL/VZLA quotes found.
- **VZLA US** — QUIET on company news; AGM results Oct 9, first silver H2 2028 (Investing News).

Group 4 — Futures / macro hedges

All dated futures on the watchlist have expired or are past delivery (see §4). Levels below are cash-market proxies.

- **NQ / ES** — MATTERS. S&P 7,623.68 (~−2.5% from the Oct 6 record of 7,818.93) and Nasdaq Composite 25,955.34 Friday (sources above); no Nasdaq-100 or Dec-futures quotes found.

- **HYG** — QUIET / unverified; no October spread data found. The AI-financing worry (CoreWeave debt) is the credit risk.

Week in context. Oct 16 Nasdaq ~−2% (S&P 7,659.44) on AI financing worries (Goodreturns); rebound Oct 19–20; Meta beat Oct 21; Oct 22 AI selloff with Brent $113; Oct 23 Brent $116.72 and a 5% 10-year with indexes slightly lower again. Weekly: S&P −0.5%, Nasdaq −0.7% (unverified). The pattern is oil and a 5% 10-year as the headwind and AI capex as the trigger. Nov 3 US midterms follow.

Group 5 — US large-cap core

- **CAT US** — QUIET until **Thu Oct 29** (release 5:30am CDT, call 7:30am; consensus EPS ~$6.92–6.95, revenue ~$20.3–20.4bn, Benzinga). Q2 beat: adjusted EPS $8.17 vs ~$6.2 (10-Q). Calendars showing Oct 28 or Nov 4 are wrong.
- **LLY US** — QUIET now, MATTERS **Oct 29** (corrects "date not found"); consensus EPS sources conflict ($8.26–9.83); ~39% revenue growth expected (Hudson Labs).

- **MAGS US** — MATTERS; Meta reported Oct 21, MSFT/GOOGL Oct 28 and AMZN Oct 29 follow; Apple ~Oct 29 (unverified). The ETF holds a large T-bill sleeve (~47.6% in August, Wealthfront).

- **COST US** — QUIET; next earnings December; staples rotation lifted COST and WMT ~11% in a month to Oct 20 (TIKR).
- **IBKR US** — QUIET since the Oct 15 Q3 print; October metrics likely ~Nov 2 (unverified).
- **WMT US** — QUIET; Q3 FY27 ~Nov 19 (outside window, second-hand); ~39.5x forward P/E flagged (TIKR).

---

3. Probably noise

- **BUKA's 45.68% control stake** — a 0.8pt creep by the controlling holder, not a bid.
- **Samsung C&T / Samsung Biologics deal date slipping to Dec 31** — a timing change on a bolt-on.
- **LGES ex-subsidy "loss" headline** — the figures conflict by KRW 350bn between sources; wait for the full results.
- **Weekend Iran/Houthi headlines** — real for oil, but Sunday's no-strike comment and Qatari mediation already pulled Brent back ~$2; don't trade each headline.
- **Conflicting earnings-date calendars** (Oct 28 CAT, Nov 2 LLY, Oct 28 ALGM) — third-party estimates contradicted by company announcements.
- **TOPPAN / DNP price quotes** — conflicting aggregator data, probably a split or stale page; ignore until verified.

- **The Dow "−652 points" Friday figure** — possibly Thursday's move mislabeled (unverified).

5. Follow-up questions to investigate

1. **SK hynix:** Is Q3 on Oct 27 or 29? How large is the additional shareholder return on top of the KRW 40tn programme, and does the won hit the print?
2. **EUR/CRML:** Did the WA court approve today, and what is the VWAP-based ratio at implementation? Is 0.045 locked?
3. **Ceconomy:** Is Nov 4 the real EC deadline, and what happens at the Nov 10 long-stop if Austria/Spain FDI are not done?
4. **Genting Berhad:** What are the final rights price, ratio and EGM date? Does a Moody's/S&P downgrade follow? Is any exposure intended via GENS (Singapore) as a hedge?
5. **Rates:** With a December hike priced at ~71–80% and the 10-year at 5.0%, how do the WNZ6 and IEF positions fare around Wednesday's FOMC and Thursday's PCE?
6. **Oil:** Does Brent at $115+ push Eni/TTE/Repsol further, and is Repsol's +96% YTD already pricing it?
7. **Megacap AI prints:** After Meta's capex raise to $135–145bn, what do MSFT/GOOGL/AMZN capex guides do to MAGS and PLTR?

8. **Silver:** With silver at ~$54 and gold below $4,000, where are SIL, SLV and VZLA, and is GPH's permit (and funding) intact?
9. **Blackstone:** Was the DE miss real ($1.32 vs ~$1.36) and how did BX trade?
10. **Volkswagen:** Is the Oct 29 date right, and does Traton's Oct 28 report set a tone for VW's China-driven weakness?
11. **Unresolved identifiers:** EP059897 Pfd and YBYU6; GPH-WA series.
12. **Luxury:** What was the Hermès Oct 22 reaction and does it extend to LVMH/Dior? Needs a primary source.
