EM Portfolio Morning Brief — Friday, 6 November 2026

Coverage: full watchlist sweep; past 24 hours (5–6 Nov). **Data caveat:** the search index is thin for 5–6 Nov and many primary hosts (sec.gov, JSE SENS, DART, most Gulf/Indian/Korean portals) could not be opened. Almost everything is search-snippet level. "QUIET" means *searched, nothing found*, not *verified nothing happened*. Several names (Gulf banks, Indonesian/Philippine/Malaysian/Indian names, Prosus, VEIL) were only lightly covered today. Conflicts are flagged inline. Today's US payrolls print (08:30 ET) was not yet indexed.

1. Top of the stack

1. **Korea: second straight crash. KOSPI fell 5.28% on 5 Nov to 5,383.80, then another 6.02% today (6 Nov) to 5,059.69, the lowest since April 2025; intraday low 4,911.28 (-8.78%) with a circuit breaker halt of about 20 minutes. KOSDAQ 678.41 (-5.11%) then 644.27 (-5.03%).** Two-day fall ≈11%; down more than 42% from the 19 Jun peak of 9,385.59 (JoongAng, Seoul Economic Daily, Kyunghyang). Cause: AI/semiconductor unwind after the US midterms ("blue wave shock": fears of tighter regulation of AI data-center buildout and weaker AI capex) (SBS, Invezz). Samsung Electronics -7.6% (5 Nov) and -6.35% (6 Nov, 188,700); SK hynix -9.5% then -10.44% (1,132,000). Foreigners sold ≈KRW2.77tn net today, ≈KRW1.92tn of it SK hynix (BigGo, soft). USD/KRW ≈1,356.6 at the 3:30pm quote, the sharpest one-day won fall since 12 May (single source; final close not found). Exposure: Samsung C&T, Samsung Life, SK Inc (Samsung Electronics / SK hynix stakes) and the whole Korean sleeve (LG Chem pref, LS, Hyosung, etc.). **BoK held at 3.0% on 22 Oct with the Governor hinting at a hike; next meeting reportedly 26 Nov** (Kyunghyang); a hike into this drawdown is a live risk.
2. **US: the 4 Nov rally reversed violently on 5 Nov.** Reported closes: Dow -3.44% to 51,523, S&P 500 -4.36% to 7,353.7, Nasdaq -5.52% to 24,315 (correction), on an "AI tech wreck" (JournalArta; Investing.com shows slightly different percentages; one CNBC live-blog URL is dated 4 Nov but matches the 5 Nov drop, so confirm dates). This reconciles with yesterday's 4 Nov closes (Dow 53,356, S&P 7,688.62). Democrats appear to have won **both** chambers (resolves yesterday's open Senate question; exact counts unverified) (CBS, CNBC). 10y ≈4.84% (single secondary source); DXY ≈flat (unverified). **October payrolls today 08:30 ET (consensus ≈+59–65k, unemployment 4.2%)** (CNBC preview, FXStreet); the result was not indexed. One preview cites ≈66% odds of a December Fed *hike* (unverified; yesterday's brief had ≈81%).
3. **Oil rebounded: Brent settled $98.29 (+$3.67), WTI $90.52 (+$2.40) on 5 Nov**, on tanker attacks and doubts over Gulf shipping, after the 4 Nov drop to $94.62 (Investing.com; the URL slug conflicts with its headline, but +$3.67 reconciles exactly with yesterday's $94.62 settle). This resolves yesterday's Brent settle question. Spot ≈$104.6 on MarketScreener is a different (spot) basis. Relevant for PRIO3, Medco, Gran Tierra.
4. **Banxico surprise: cut 25bp to 6.25% on 5 Nov, 3–2 vote** (two dissenters for a hold); statement called it a "punctual adjustment", and El Financiero reads a hold at 6.25% into 2027. USD/MXN ≈18.74, peso -0.96% (El Financiero, Ámbito). Resolves yesterday's open Banxico stance question. Mexican 2H Oct inflation 3.62%. Next decision date not found.
5. **Gran Tierra (GTE) Q3: soft operations, sale is the driver.** Production 39,904 boepd (-4% q/q, -7% y/y), revenue $168m (+13% y/y), adjusted EBITDA $68m (vs $85m Q2), funds flow $32m (-48% q/q), FCF ≈$1m, cash $141m; Colombia border closure cost ≈$3.7m. A third-party summary shows a $42m net loss (unconfirmed in the primary release) (GlobeNewswire, TradersUnion). Call today 9:00 Alberta. The ≈US$1.33bn Colombia/Ecuador sale to Maurel & Prom (closing ≈31 Dec) remains the key mechanic.

2. What matters, by region/theme

EM macro thread (dollar/EM FX, China policy, commodities)

- **Dollar / rates:** see Top. The two-day US swing (rally then -4% S&P) swamps the DXY/yield signal: DXY ≈flat and the 10y ≈4.84% suggest the EM damage is equity-driven (AI/semis), not a dollar move. Next FOMC 8–9 Dec.
- **EM FX:** KRW 1,356.6 (weaker). MXN 18.74 (weaker after the cut). BRL ≈R$5.48–5.49 on 5 Nov (+0.67%, weaker; CNN Brasil, snippet). IDR, INR, ZAR, CNH, TRY: nothing current found today (last verified: IDR Rp18,156 on 2 Nov).
- **China policy: correction to yesterday's unverified item: the US–China tariff truce appears to have been extended to 10 Jan 2027 at the Trump–Xi Washington summit (≈24 Sep)**, so the "10 Nov expiry" is likely stale (ARY, Northeast Times, The Week); a May 2026 item gave 10 Nov, which pre-dates the extension. No primary (White House/MOFCOM) text found, and whether the export-

control/affiliates suspension was extended on the same terms is unverified. Reported follow-on meetings: APEC (Nov) and G20 Miami (Dec), dates unverified. China October trade data due ≈7 Nov (weekend), CPI/PPI ≈9–10 Nov (dates unverified). Hang Seng/CSI300/Taiex/CNY closes for 5 Nov not found (last: HSI 23,919.50 on 4 Nov per yesterday's brief). LPR 3.0%, unchanged.

- **Commodities:** Brent $98.29, WTI $90.52 (see Top). Gold: COMEX Dec opened $4,075.40 on 5 Nov, hit $4,134.30 intraday, later ≈$4,099; no settle found (Yahoo Finance). Silver reportedly jumped to a near two-month high on 5 Nov; a delayed MarketScreener snapshot shows ≈$67.30 (+8.26% over five days), which conflicts with yesterday's ≈$52.3, so treat all silver levels as unverified (index.vn). Copper: COMEX ≈$6.65/lb on 4 Nov; no 5 Nov LME/COMEX settle; Section 232 uncertainty is widening the COMEX/LME spread (Metal.com). Lithium carbonate: GFEX ≈CNY104,740/t on 12 Oct and below CNY100,000/t in the week to 23 Oct (Mysteel); no November quote.

Korea

- **Market:** see Top. Everything in the sleeve carries this beta; individual company news was essentially not found for 5–6 Nov.
- **LG Chem pref (051915) — MATTERS (unverified today):** yesterday's brief carried Q3 OP KRW561.2bn (-17.4% y/y), below the KRW613.6bn forecast, with a net loss and petrochemicals -KRW175.6bn (SBS Biz, TF Media). Today's search could not re-confirm it; check DART.
- **LS Corp (006260):** high-beta casualty candidate; consensus had been revised up 31% on power-grid/AI data-center demand, Q3 OP estimate ≈KRW463bn (Sat Economy); Q3 date unconfirmed (≈18 Nov, low confidence).
- **LG Corp (003550):** Q3 reportedly 12 Nov (Quartr, unconfirmed). **Samsung C&T (028260):** Q3 already out 28 Oct (construction OP KRW277bn, +149.5%; consolidated figure conflicts: KRW1.14tn vs ≈0.83tn) (SBS Biz); mark-to-market on Samsung Electronics. **Samsung Life (032830):** Q3 estimated 12 Nov (calendar estimate); same mark-to-market exposure. **SK Inc (034730):** exposure to SK hynix (-9.5%, -10.4%); SK Innovation Q3 prelim OP KRW3.704tn; SK Inc date unconfirmed, likely by 14 Nov.

- **QUIET (nothing found):** 361 Degrees, Bank of East Asia, China BlueChemical, China Dongxiang, DiDi, Dingdong, Hello Group (ADR Q3s typically mid-to-late Nov, dates unconfirmed), KWEB (trades on China internet beta).

Brazil / LatAm

- **Macro:** Ibovespa **-0.82% to 166,191.45** on 5 Nov, giving back the post-Copom gain; two outlets headline "+1.71%" with the same level, an apparent sign error, so confirm at B3 (BPMoney, Brasil Inovador). Copom held at 13.75% unanimously on 4 Nov, ending five 25bp cuts (Suno). Fiscal: Finance Minister is Dario Durigan (since March, replacing Haddad); 2026 primary target 0.25% of GDP surplus with budget freezes (Itatiaia, undated). No dated 5–6 Nov economic-team news. Next Copom 8–9 Dec.
- **BLTN / EMGA — MATTERS (no fund-specific research today):** a hawkish hold, a weaker BRL (≈R$5.48) and Banxico's cut are the drivers; NAVs not found.
- **Gran Tierra (GTE):** see Top.
- **Earnings:** BBAS3 Q3 11 Nov; B3SA3 and CYRE3 12 Nov (after close for CYRE3) (Investalk BB, Paraíba Business); CVCB3 listed today (6 Nov), results not found; AGRO3 listed 5 Nov, results not found (BPMoney); LREN3 date conflicts (Seu Dinheiro: 5 Nov after close with call 6 Nov; Investalk: 27 Oct), no results found; HEPS Q3 scheduled 5 Nov after US close, results not found (Panabee); XP mid-

Nov (guess). **AMX:** Q3 out 20 Oct (net profit MXN24.3bn +7%; bought 72.83% of Desktop in Brazil) (El CEO). **Bunge:** Q3 out 29 Oct (adj. EPS $2.56 vs $2.41; guidance $9.25–9.75 held) (Bunge release). **QUIET:** PRIO3 (oil is the driver), MOVI3, BBAS3, B3SA3.

Middle East / Africa

- **MTN (MTN SJ) / IHS — completion still unverified.** Nothing dated after late August found. Terms $8.50/share (≈$6.2bn EV; MTN already ≈24.7%). IHS holders approved 4 Aug; IHS completed its Latin American tower sale 7 Aug; Nigeria FCCPC cleared ≈24 Aug conditional on MTN selling down up to 30% of its Nigerian business; South Africa, Cameroon, Côte d'Ivoire and Zambia approvals reported outstanding as of the last report found; MTN guides to H2 2026 closing (Nairametrics, Nairametrics). **Single-source 17 Nov 2026 outside date with 45-day auto extensions** (Pulse2). Guardian Nigeria's "MTN completes" headline is contradicted by its own body (Guardian). JSE SENS not reachable.
- **TBC Bank (TBCG LN) — Q3/9M due today, 6 Nov;** results not yet found. Baseline Q3 2025 net profit GEL368m. Ignore the UzDaily "697bn soum loss" (Uzbek subsidiary, internally inconsistent) (UzDaily).
- **Gulf and South Africa:** no TASI/ADX/DFM closes for 5–6 Nov found. **QUIET (not found, lightly covered):** Alpha Dhabi, Aramex (Q3 ≈12–13 Nov inferred), Emaar, First Abu Dhabi Bank, Saudi National Bank, Yamama Cement, Absa. Lower oil on 4 Nov and the rebound on 5 Nov are the main Gulf drivers.

Southeast Asia / India

- **Indonesia / MSCI 11 Nov — MATTERS:** MSCI said in June it would consider options including a consultation on reclassifying Indonesia from EM to frontier if accessibility/transparency progress was not evident by this review (NST); announcement 11 Nov, effective 1 Dec. **IHSG closed 5,057.05 on 30 Oct (-0.8%)**, Barito group stocks (BREN, TPIA, CUAN, BRPT) lower, BRPT as much as -6.96% to Rp1,070 (Bisnis); this supersedes the 5,282 (28 Oct) level. Earlier Kontan: BRPT risked removal if it closed below Rp1,280 during 19–30 Oct; it traded at Rp1,070 on 30 Oct, so **breach looks likely but index treatment is unconfirmed**. BRPT is one of only nine Indonesian names still in MSCI Global Standard (Investortrust). Exposure: BBRI, BRPT, INDF, MEDC, BUKA, HIDR. No 5 Nov IHSG close found.
- **Philippines / Malaysia / India:** Ayala Land, GT Capital, Genting, Reliance, Bank of India: QUIET (not found); no Sensex/PSEi/KLCI closes found. **Prosus (PRX):** not found.
- **Vietnam funds: VOF** latest NAV still the 2 Oct estimate $815m / $6.89 per share (£5.22), discount -20.6% at 30 Jun, buying back shares (LSE RNS, VOF factsheet); October NAV ≈10 Nov. **VEIL:** nothing found.
- **ReNew (RNW) — dates still not retrievable.** Scheme of arrangement; Court Meeting needs ≥75% by value plus a majority in number (SEC 13E-3 exhibit). One undated source cites $8.15, conflicting with the $7.02 cash price in the 2026 filing; treat $7.02 as the working figure (note the filing CIK was cited as 1848763 today vs 1283718 in prior notes; verify on EDGAR). The 28 Oct scheme document (Court Meeting, General Meeting, rollover deadline) could not be opened.

Metals & mining / US-listed

- **Pan American Silver (PAAS):** Q3 4 Nov: FCF $377m, $300m returned ($701m YTD), silver 6.07Moz (silver AISC $11.21/oz), gold 167.9koz, liquidity $3.4bn; 2026 gold guidance cut to 660–680koz and silver at the low end of 25–27Moz, per yesterday's brief (PAAS release). Share reaction not found (ignore an "+11%" item from the Q3 2025 print).
- **Albemarle (ALB):** adjusted EPS $2.58 (small beat vs ≈$2.57), adjusted EBITDA $645.5m (8-K); this supports the $2.58 reading over the $2.15 miss in yesterday's brief; a TipRanks "19c vs 88c" item is stale. Share reaction not found; Q4 guided down sequentially (yesterday's brief).
- **Allied Gold (AAUC) — new, MATTERS mildly:** Q3 4 Nov: production 91,195oz (+5% y/y), AISC $2,378/oz, net earnings $29.1m ($0.22/sh), adjusted $49.3m ($0.37); Kurmuk in production; guidance 240–270koz for 2027 and ≈300koz for 2028 (MD&A). Zijin holds ≈9.2% (hold ends 11 Dec).

Abra weather/slope issues; Grasberg ≈two-thirds of prior mill throughput; CMJ, date tag unreliable); Ivanhoe (Kamoa-Kakula 290–310kt guide; Q3 financials not indexed).

- **QUIET:** First Quantum (Cobre Panamá restart prep; Q3 date not found), Goldgroup (next earnings ≈18 Nov estimate), Kootenay Silver, Vizsla (Sinaloa security risk; site status unverified).

- **"Oct payrolls -105k / Nov +64k" results** — 2025 data.
- **TradingView KOSPI "5,937.66"** — wrong date.
- **LG Electronics pref / Samsung C&T consolidated Q3 / Amorepacific / Hyosung** — already out and priced, overwhelmed by the market move.
- **Bunge, AMX** — Q3 already out; no news.

4. Time-sensitive / positions watch

- **US T-bill (US912797SA68):** CUSIP 912797SA6 matured **1 Oct 2026** (corroborated previously by Econoday, TradingView, Gabelli and SEI holdings; no new evidence today). **Decision: remove from the book or roll the proceeds; `watchlist-em.md` row retained with the matured flag.**
- **Korea:** after a two-day ≈11% KOSPI drop (circuit breaker today), review Samsung C&T, Samsung Life and SK Inc for mark-to-market and liquidity, and LS Corp/LG Chem pref for AI-capex sensitivity. Weekend risk: further US AI selling and a possible BoK hike (26 Nov).
- **RNW:** retrieve Court Meeting / General Meeting / rollover-election dates from the 28 Oct scheme document (EDGAR); decide rollover vs cash before the deadline.
- **MTN / IHS:** the reported **17 Nov outside date** (single source) falls inside the window; check JSE SENS and the IHS 6-K for completion, delisting or extension.

5. Follow-up questions to investigate

1. **KOSPI:** is the AI-capex/regulation narrative the whole story, or are margin calls/forced selling involved? Final 6 Nov USD/KRW close; will the BoK react at or before 26 Nov?
